At the Churches

Presbyterian.

Rev. Elwood P. Lyon, D. D., Ph. D., noted evangelist from Pasadena, Cal., who has visited Bend twice before this, will be in Bend next Sunday and will preach at the First Presbyterian church in the morning at 11 o'clock. Dr. Lyon is a Christian Jew of note, and those who have heard him previously know what a treat is in store for them now.

At the evening service the pastor will consider the following topic: "Adventism in the Light of the Bible." The reason for this topic will be given at that time. If you are interested in the day you keep for Sabbath, you had better not miss this. H. C. Hartranft, pastor.

Christian Science.

Christian Science society services Sunday at 11 a. m., 418 Bond street. Subject, "Spirit."

Methodist.

Mr. Parkinson will preach at the Methodist church on Sunday, both morning and evening. In the morning at 11 o'clock and in the evening at 8. At the 11 o'clock service the theme will be "A Better Day and a Better Man." For the 8 o'clock service the subject will be "The Divine Invitation and the Human Response." Sunday school is at 9:45 and young people's meeting at 7. Prayer meeting at 8 p. m. Thursday. All services are open to the public and a hearty welcome for all who desire to worship here. On Monday evening at 7:30 the fourth quarterly conference will be held. Immediately after that, at 8:30 and until 10, all the people of this community are invited to inspect the new parsonage and to meet Dr. Pemberton, the district superintendent.

First Woman's College.

The first woman's college incorporated as such, was Elmira college founded in 1852.

TWO BEAUTIFUL LAKES

SQUARE LAKE : LONG LAKE

Why talk about the wonders of the Yellowstone national park, Glacier national park, the ocean beaches with their balmy saline breezes, and waters too cool to enjoy? Why think about the din of the city, its roaring traffic and its hurrying peoples, its hot and sultry thoroughfares? Why think only of a trip on the road in your motor car, when there are a thousand or more wonders right at your own threshold—places where you can go with little effort?

Central Oregon has thousands of unadvertised and uncommercialized wonders. How much do you know about its lakes? How much do you know about its streams? How many of you know the names of its peaks you see almost every week? How many of you know the trails that lead from the automobile highway? What do you think about its trees? How many of its flowers can you name? Do you know a white pine tree from a fir, a cedar from a tamarack? Would you know a huckleberry bush if you saw one? These and hundreds of things are open to those who venture off the beaten tread of the automobile.

Back in the mountains no more than 50 miles from Bend there lies a chain of lakes. There are four known to the writer and there are several others in what is commonly known as Eight Lake Basin that are going to become familiar to him before the snow flies. His curiosity has been aroused by seeing two of these lakes in the past week. These two more or less isolated bodies of water are Square lake and Long lake, both of which lie only a few miles south of Three Fingered Jack, near the divide and in the vicinity of Hogg Pass.

To reach these two lakes one must either hike in on foot from Suttles lake or obtain saddle horses.

The distance from the northeast end of Suttles lake to Square lake is about eight miles or about a three-hour hike or ride. One might easily leave Bend about noon, arrive at Suttles lake about 3 o'clock and be at Square lake at 6 or 7 in the evening. It is well to do this because the fish bite exceptionally well in the late hours of the afternoon. The trail all the way is good. There are no steep pitches that cannot be climbed. It is a steady pull all the way from Suttles lake to Square lake with the exception of the last mile. On the main trail there is a sign "Salt Ground No. 144." Just before reaching this sign there is a trail which turns to the right. By following this tributary one will find no difficulty in reaching Square lake.

Square lake covers no more than 40 acres of territory. It is protected on one side by high hills, heavy brush, tuiles and timber. The water is clear and not too cold. The shore line extends out some little distance when it breaks abruptly. It is at these jump places that the finny beauties—rainbows, dories and red sides lurk at the invitation of the "red upright," "professor" and "royal coachman." The trout taken from the lake die a game death. They do not give up. They die before they give up. They are not whoppers, so to speak, but they are just right to give the sportman all he can handle on the average fly rod. When they hit they hit hard and keep up the fight until they are landed in the net.

The lake is surrounded by a variety of bushes, all of which have a rich, green color. There is a heavy growth of underbrush and the flowers are abundant just now. Sunrise should find one out of his pine-bough bed. When the first rays peak over the crest of the hills and illuminate the little basin, a picture too choice for word-de-

scription greets the riser. The hills take on a brighter color. The green of the hills and the bushes changes. The rocks seem to have life. The odor from the pines and the firs is exhilarating. It's a hearty breakfast one enjoys.

Long lake is only a short distance from its neighbor. It is only about 200 feet wide and three-quarters of a mile long, but it is deep. The gamiest kind of rainbows greet the angler. This lake, like its neighbor, is sheltered by a wealth of natural beauty.

35,000,000 TIRES TO BE MADE IN 1919

Six and one quarter million cars in use requiring at least four tires per car, per season or over 20 million tires for a single year. A million new cars coming into use this year, each car equipped with at least four tires, making a total minimum market for not less than 35 million tires per season.

Is it any wonder why new tire companies spring up almost like mushrooms in a mad attempt to

gather the rainbow profits so apparent to the outsider.

There are probably more than 300 new tire companies starting in various parts of the United States this year, making brands and brand of tires.

A tire factory can be built in short order but it is an exact science to build a good tire, one that will give good service, stand up under the hardest kind of usage, and give the consumer genuine all-around satisfaction.

In an industry like the tire industry where the expert chemist is a necessity to the proper frictioning of fabrics and the compounding of treads, where the practical experienced rubber compounder and engineer is indispensable, haste is waste and nothing but long apprenticeships of careful and experimental manufacture will determine the quality of the product.

Many tire manufacturers begin their career with a predetermined price, followed by an extensive advertising campaign, and then try to build a tire to suit the occasion.

The almost invariable result is a flash and a roar, later crepe on the factory doors, flowers omitted and the sheriff in possession, the public holding the bag and stung.

Buyers and Builders...

Fred Fish will soon begin work on a new residence in Kenwood.

The Bend Hardware company has begun an addition to its warehouse.

D. A. Boydsten has begun the erection of the eighth and ninth residences erected by him in Bend this year.

Dennis Carmody this week purchased the residence of Mrs. Ann Forbes in Pinelyn park.

I. N. McGilvray has commenced the erection of a new five-room bungalow in Staats addition.

C. W. Myers is making some improvements on his property on West Eleventh street.

An unattractive backyard has

Drop in on your way home take your family a quart of fresh ICE CREAM They will appreciate your thoughtfulness. Special orders for parties, etc. Childers & Armstrong

been converted into one of the most promising pieces of ground in the city. The property in question is the lot at the rear of the Pilot Butte Inn. By developing home shrubbery with native rock, attractively arranged, W. C. Birdsall has made what will in a short time be a favorite rookery for hotel guests. In addition a wide driveway for automobiles has been made at the rear of the hotel, and a driveway through the basement of the hotel makes it possible for motorists to drive into the yard. On the west side a heavy wall of concrete has been constructed, as a retaining wall, making an attractive appearance from the river view. The lawn grass, planted recently, is thriving.

Three Days of Cut and Slash Prices

Table with 3 columns: Day (Tuesday, Wednesday, Thursday), Item Name, and Price (Reg. Price, Sale Price). GENERAL PERSHING NOT CALLED HOME

Neither Chief of Staff March nor Secretary Baker Has Any Knowledge of Rumored Recall.

[By United Press to The Bend Bulletin.] WASHINGTON, D. C., Aug. 9.—Unofficial reports from Paris to the effect that General Pershing had suddenly been called home were not confirmed by the war department today. It was stated officially that neither Secretary Baker nor Chief of Staff March had heard of the supposed recall.
