LOCAL NEWS ITEMS

TODAY'S TEMPERATURE
 Maximum, 79 degrees.

Ed Nelson was a visitor in the city today from Summer lake.

Miss Florence Borg is on a vacation trip to Portland and Seattle.

H. H. De Armond started early this morning to drive to Klamath Falls.

Lester O. Barber and Gustave Berry of Alfalfa were in Bend last night.

Miss Mabel Sphier, cashier for J. C. Penney company, is on her vacation.

T. H. Foley returned last night from a business trip of several days to Portland.

Mrs. Louis Dornecker has returned from a several weeks' vacation to Olympia, Washington.

R. E. Clanton, master fish warden, was in Bend last night.

William Delbrugge has received his discharge from the army and is now employed at the Tumalo fish hatchery.

Dr. and Mrs. E. R. Norris returned yesterday afternoon from a several weeks' honeymoon trip through California.

C. V. Silvis and C. E. Shepherd of the Huron Timber company, returned yesterday from a business trip to Klamath Falls.

N. G. Jacobson, E. P. Mahaffey and Louis Dornecker left for Klamath

Falls last night to attend the state Elk's convention.

V. R. Buckingham of Roseburg has accepted a position with Smith's grocery. Mr. Buckingham is an experienced groceryman.

Mrs. Baulah Mitchell has accepted a position with the L. K. Shepherd music store and will have charge largely of the record department.

Mrs. F. D. Becker, and little son, of Kallispel, Montana, have arrived in Bend to visit the former's parents, Mr. and Mrs. J. G. Selk. The Beckers were formerly residents of Bend.

Mr. and Mrs. J. E. Rock left last night for Cornelius, Oregon, where they expect to make their home. Mr. Rock's health has not been good and it is thought the change will be for the better.

Miss Carol Boyd has accepted a position as bookkeeper at the Bend Furniture company store. Her place with the Central Oregon Abstract company will be taken by Miss Margaret Thompson.

Mrs. H. E. Nordeen is enjoying a visit from two sisters and their families, Mr. and Mrs. George Ross of Vancouver, Washington and Mr. and Mrs. W. L. Stull of Newberg, Ore. They left this morning for a short night-seeing trip which will include Crater Lake.

August Benz, of the Lather Auto Spring company, of Portland, brother of Mrs. D. T. Carmody, and John Haas, of the Haas Meat market in Portland, drove from Portland in 10½ hours early this week, via government camp. They are now at Davis lake on an outing.

The first of the weekly flower sales, held last Saturday at the store of the Thompson Music company, netted the Library club \$28.97. These sales will be conducted every Saturday. Persons desiring to offer flowers for this sale may bring them to the Thompson music store or call over the telephone and they will be taken.

The sisters of St. Charles hospital have just completed painting a number of Oregon scenes, principally those of Three Sisters, Deschutes river and Mt. Hood. The work is done in water colors and pastels. They are on display at the Owl pharmacy. The sisters are placing these pictures on sale and the funds will be placed in a fund for the new hospital.

Sergeant Anton Fossen has returned to Bend, having received his discharge from the Fourth engineers after more than two years of service, the greater part of the time having been spent overseas. Sergeant Fossen is a brother-in-law of R. H. Fox of this city. He will make his home in Bend for a time and may later go to his ranch in the Burns country.

Where He Got the Name.

The first bulldog appears to have been bred from the English mastiff, and by process of systematic selection in breeding a smaller and more active dog than the mastiff was evolved. The smaller dog was found to be better suited for sport than the heavier and slower mastiff. The bull-baiting dog, without a doubt, required an inordinate amount of gameness.

Talented Young Graduate.

"Yes," said Farmer Wiggins, "my darter's goin' to granulate and get a deplunket. Then when she has it we're goin' to send her to a musical mesogitory to be finished!"

EXPLAINS NATURE OF THIRST

Doctor Cannon of Harvard University Shows Where Popular Conception Has Been Wrong.

The popular conception of thirst, according to a well-known medical journal, is a lessened water content of the body, a condition in which the entire organism suffers, but Dr. W. B. Cannon of Harvard university, considers it a purely local phenomenon.

"According to him, the pre-eminent factor is the relative drying of the mucosa of the mouth and pharynx. This may result either from excessive use of the passage for breathing, as in prolonged speaking or singing, or it may be caused by deficient salivary secretion. The latter, according to Cannon, represents true thirst depending on the fact that the salivary glands, which keep the buccal and pharyngeal mucosa moist, require water for their action."

The salivary glands occupy a strategic position in relation to a surface that tends to become dry by the passage of air over it. "Thus," Cannon concludes, "the diminishing action of the salivary glands becomes a delicate indicator of the bodily demand for fluid."

Hunger Helps Diabetics.

During the course of the world war, as the blockade and unfavorable internal conditions were gradually cutting down the rations of the central empires, it was frequently noted in German newspapers that, at all events, the food shortage had some redeeming features, chief of which was its beneficial effects upon sufferers from diabetes.

In corroboration of this assertion, now comes Professor Rosenfeld of Breslau with an article in a recent number of the Zentralblatt für Innere Medizin, showing how the number of deaths from diabetes was reduced during the war. In Berlin such deaths in 1918 totaled 177 against 294 in 1917, 331 in 1916, 383 in 1915, 497 in 1914 and 469 in 1913; in Munich they were 77, 73, 82, 101, 104 and 105 for the same years, and in Breslau they were 51, 72, 78, 113, 115 and 100.

Cut Metal With Smooth Disks.

Not so very long ago the discovery was made that metals could be sawed easier and quicker with rapidly revolving smooth disks of steel than with toothed circular saws. It was found that the cutting was done by the heat generated by the friction of the edge of the disk against the metal. The metal is melted at the point of contact while the steel of the disk, being cooled by the air, does not reach the melting point. The disks need no sharpening and do not wear out so quickly as the toothed saws heretofore used for cutting metal. The faster the disk revolves, the greater the amount of heat generated and the quicker the job.—Popular Science Monthly.

Oil and Helium in Canada.

Canadian commercial enterprise is again before the British public in the form of two announcements, the first being that exploitation of the oil fields of Western Canada on a large scale is in contemplation.

The second announcement refers to the discovery in large quantities in Western Canada of helium, the lightest known gas after hydrogen, which is more suitable than the latter for filling airship envelopes, as it is non-inflammable and nonexplosive.

Trade With Nicaragua.

Declared exports to the United States from Bluefields, Nicaragua, amounted to \$2,715,222 in 1918, an increase of \$1,286,452, compared with the value of the 1917 exports. Bananas were the chief article of export, the value of those shipped being \$1,161,600 in 1918, a large increase over the 1917 shipments of \$204,992.

SNOW-FLAKES

Birds and Flowers.

It has been estimated that there are 2,000 varieties of wild flowers growing in the Rocky Mountain National park, and more than 1,000 species of birds building their homes in the firs, aspens, spruces and willows of that section. Even the tiny humming bird and the forget-me-nots find life easy on the summit of Pike's peak. Some of the other flowers are the fringed gentians, columbine, buttercups and daisies and delicate pinks.

Kind-Hearted Farmers.

One day a little city girl came to the farm, and when she saw a windmill she said: "Oh, see how good the farmers are to the pigs; they have electric fans to keep them cool."
