## A SURVEY WANTED.

The investigation of the Benham Falls reservoir site which has been made by Professor W. O. Crosby in the past few weeks has taken him pretty thoroughly over the Deschutes valley. Although the reservoir site itself covers a comparatively limited area the geology of the whole section has a bearing on the problem which he has had under consideration and accordingly he has visited practically every portion of it and has seen its lakes and gorges, its lava flows and caves, its mountains and extinct volcanoes.

To the trained geologist every feature of the country was of great interest. There was something different on every hand. Not only were the geological formations fine examples of their kinds but the questions they suggested kept the mind of the observer constantly on the alert.

Because there was so much to be seen here and so many things that required so little explanation to be thoroughly understood it seemed unfortunate that popular knowledge of it all might not be more wide spread, and Professor Crosby agreed heartily with the suggestion, made to him one day, that the United States geological survey ought to be interested to come in to make topographic maps of the valley and geological studies of special areas such as the Newberry crater. On such foundations could be built an acquaintance with the country that would mean a world of interest to our students and many others who still have minds open to the wonders of nature.

Can't we do something to get the Geological survey interested.

## FEAST FOLLOWS ARAB FAST

Institution of the East Much Resembles the Christian Observance of Lenten Season.

As the Mohammedan year is a lunar one, the months rotate through the different seasons, and the fast of Ramadan becomes a severe affliction upon the faithful when the month happens to fall in the hot days of summer. The sick, travelers and soldiers in time of war are temporarily released from this duty, as well as nursing women and others to whom it might prove injurious. The fast is followed by the feast of Bairam, which was established by Mohammed, who seems to have been guided by the Christian institution of Lent, which in the early church varied from four to six weeks. On this day every family of the true believers offers a sheep to God, and the streets of the cities are filled with men carrying the destined victims on their backs. Among the Arabs the festival begins at four in the morning, when great crowds collect at the residence of the nearest pasha or bey, awaiting his appearance in the court of the palace. At five o'clock his highness enters, accompanied by members of his family and his staff; cannon are fired, the peculiar bands of the East play suitable airs, and the chief captain announces that the hour of sacrifice has arrived, and that his highness, after prayer, will be present at this act. All then adjourn to the mosque, and when the sacrifice is over the pasha re-enters the court, and those of high rank kiss his hand; the inferior slightly touching it with their lips. This occupies about an hour, when all retire to take coffee, the captain thanking the crowd for their presence as a mark of attachment to their ruler.

## FOUGHT THE FLOWING BOWL

Eastern Monarchs and Religious Leaders Long Ago Lifted Their Voices Against Drunkenness.

Temperance movements and prohibition crusades date back at least 3,000 years. It was China that first tried to be bone-dry. Early reforms along temperance lines are attributed to the priests of India and Persia. But the Chinese claim that in the eleventh century before Christ their emperor, so disgusted over the prevalence of drunkenness, ordered all the grapevines in the kingdom uprooted.

A hundred years before this bone-dry effort, in the twelfth century before Christ, King Wen tried partial reform in China. Wen, founder of the Chou dynasty, promulgated an "An-

## Announcement Against Drunkenness," according to ancient Chinese documents handed down by Confucius.

King Wen declared "drinking has long been a national vice." He ordered that wine be used only in connection with sacrifices—and even then drunkenness was not to be tolerated.

The temperance reforms also existed in Egypt centuries before Christ. Here's what a teacher said to a youth who had been looking upon the flowing bowl too freely:

"Drink not beer to excess. The words that come out of thy mouth thou canst not recall. Thou dost fall and break thy limbs and no one reaches out a hand to thee. Thy comrades go on drinking; they stand up and say: 'Away with this fellow who is drunk.' If anyone should then seek thee to ask counsel of thee, thou wouldst be found lying in the dust like a little child."

## Life's Master-Key.

Life's master-key is a personal possession. It's yours to use. It's your estimate of yourself plus sufficient initiative to bring ideals to pass. You're bound to be questioned and discounted at every turn. Others have the same mental concept of their worth as you do. It's your job to show them who is most fit. No, you needn't begin that old quarrel about the survival of the fittest. Life knows mercy as literature more than it does of conduct. Nature's laws are just, impartial and irrevocable. They know neither sex nor social position. He who by instinct works with them wins, he who does the opposite fails. When opportunity steps into view you must grasp the forelock or join the great army of those who spend the time in regrets and those who sigh, "if I had only known."

## Power of Imagination.

A doctor, treating an old woman for typhoid fever, took her temperature on each visit by putting a thermometer under her tongue. One day, when she was nearly well, the doctor did not take her temperature. He had scarcely got 100 yards from the house when her son called him back. "Mother is worse," said the young man. "Come back at once!" The doctor returned. As he went into the sick room the old woman looked up at him reproachfully. "Doctor," she said, "why didn't you give me that tube under my tongue today? That always did me more good than all the rest of your trash!"

## Something Saved.

A music teacher, giving a lesson to a careless pupil, was becoming impatient with her. Finally, at a most complicated part of a difficult piece, the pupil lifted her hands from the piano and searched for her handkerchief. It was the last straw. "Oh," exclaimed the teacher, "was there ever such a girl? You lose your position, you lose your fingering, you lose your handkerchief—you lose everything!" "Oh, no," responded the pupil, with a twinkle in her eyes, "not everything! I haven't lost my temper!"

## USE WHITE FEATHER TO GET BACK JOBS

[By United Press to The Bend Bulletin.]

MANCHESTER, Eng., Aug. 25.—Demobilized soldiers are getting even with young women who in the early days of the war would write them anonymous letters containing white feathers.

Numerous young women employed on tram-cars, in factories and stores are receiving white feathers for taking over men's jobs and refusing to give them up. A few of the women have taken the hint and given up their jobs.

## Explaining "Yankee."

Yankee "was a cant, favorite word with former Jonathan Hastings of Cambridge about 1713. . . . A Yankee good house, or Yankee cider and the like. . . . The students (of Harvard) used to hire horses of him; their intercourse with him, and his use of the term on all occasions, led them to adopt it."—Will Gordon, "Independence of United States," volume 1, letter 12, page 482.

## DIATOMITE PLANT IS WORKING FULL CREW

LOWER BRIDGE, Aug. 25.—The Diatomite plant has resumed operations and is now working with a full crew.

The Black Butte ditch broke on Wednesday and cut off the water for Long Hollow for two days.

Mr. and Mrs. C. F. Hoskins and family returned Thursday from Crater lake.

A. J. Fuller and Clarence Rommel went to the mountains the first of the week to get poles for a new derrick.

Mr. and Mrs. Roy Kidder were in Redmond Saturday evening.

Mr. and Mrs. Horace Brooking, Paul Brooking and Mr. and Mrs. Jack and family spent the weekend at Suttles lake.

# Tri-State Terminal Co.

Mr. Holt of Portland was at Lower Bridge the past week on business connected with the silica mill.

R. S. Towne has purchased Jim West's Cadillac car.

Darwin Walter has been working in Redmond the past week.

Mr. and Mrs. Russell Chapman and daughter and Mrs. A. J. Fuller left in their car for Hood River on Sunday, where they will visit with friends and relatives.

The farmer and the business man of this community are partners in the progress or the failure of their community.

**—If**

they pull together, the progress and prosperity is certain to come.

IF they listen to preachers of class hatred there can only be failure as a result.

**THE SHEVLIN-HIXON COMPANY**

Marion Hoskins was shopping in Redmond Friday.

T. J. Quigley returned Tuesday from Klamath Falls, where he attended the Elks' convention. He also made a trip into Crater lake.

George Reels was in Redmond Friday.

Mr. and Mrs. Newbold and family and George Tuckwell left on Thursday for an outing at Clear lake and Fish lake.

G. E. Stadig was in Redmond on business Wednesday afternoon.

## BIRTHDAY PARTY IS HELD AT MILLICAN

MILLICAN, Aug. 25.—A few of the neighbors helped William A. Rahm celebrate his 47th birthday Saturday night.

Mr. and Mrs. R. R. Keller and three sons were Sunday visitors at the C. J. Cook home.

A. T. Shaver and Mrs. L. A. Schaffer were Bend visitors Monday.

L. P. Rooney was an over Sunday visitor at his home.

R. R. Keller made a business trip to Bend Wednesday and Mrs. J. J. Holland and Mrs. Mary Rosin accompanied him. Mrs. Rosin made final proof on her homestead, while Mrs. Holland was one of her witnesses.

W. Ed Moore went to Bend Thursday.

Fred Kiger and Louis Gless bought an irrigated ranch near Bend, so the family is not going to Albany after all.

C. H. Graffenberger is busy hauling his hay home.

Virginia Rosin spent Wednesday at the Holland home.

Dr. C. Rosin left Tuesday.

Tom Going called at the Holland home several times this week. Clara and Arthur Graffenberger called at the R. R. Keller home Wednesday.

J. A. Smith was out on the ranch several days this week and went to Bend Wednesday.

## Seven Reasons Why There Should Be An Electric Range in Every Bend Home.

- 1st—Saving of time, labor and fuel.
- 2nd—Meats, vegetables and other foods retain natural flavors when cooked on an ELECTRIC RANGE that are otherwise lost in vapors when subjected to uneven heats produced by wood, coal or gas ranges.
- 3rd—Get out of bed, turn the button and breakfast is started while you are dressing.
- 4th—No dirt, no ashes. Mother's work is easier and her disposition is happier and her days are longer.
- 5th—A blessing when days are hot; cook on an Electric Range and you do not realize there is any heat in your kitchen.
- 6th—Very low rates maintained by the Bend Water, Light & Power Co. put all the comforts of the ELECTRIC RANGE in reach of all.
- 7th—Cleanliness, ease, comfort and the fact that Mother's burdens are lightened should be the main reasons for an Electric Range.

## Three Questions answered most frequently by a Business College President.

**Behnke-Walker Business College**

To Young Men and Young Women:

During the course of a year I answer thousands of questions put to me either by parents of earnest young people, or by young men and women themselves who are seeking the way to successful entrance into business life.

The three questions I am asked to answer most frequently are:

"Why is Behnke-Walker the dominant business college of the Pacific Northwest? Why are its students so uniformly successful? How can it place all its graduates in paying positions?"

To answer one is to answer all.

Behnke-Walker has come to be the largest business college because its students meet the demand of the efficient business men. Its students are uniformly successful because they remain in school under careful instructors long enough to make thorough preparation for business life. Of importance too—they have as an individual asset the invaluable prestige of a great institution—one which business men universally recognize as the fountain head for competent help.

In turn that is why Behnke-Walker can place its graduates in paying, permanent positions. The best business brains of this region eagerly seek Behnke-Walker students—so eagerly indeed that Behnke-Walker last year received 1764 calls for help from business concerns and was able to supply less than one-half. It could not then, and can not now turn out enough graduates to fill needed positions, and this despite the fact that the college is open the year round, and new students are entering every day.

Yours truly,  
*M. Walker*
