## DEVELOP THE WASTE PLACES.

In an interesting address before the National Editorial association at the time of its recent visit to the northwest, Herbert Cuthbert, of the Pacific Northwest Tourist association, pointed out the economic value of our waste places. Our mountains, our sea shore, lakes, canyons and gorges, are all, in a way, waste places since they are not used in production, but they have a value to nearby communities which, here in the west, is only just being realized.

Mr. Cuthbert's argument was for the development of these so-called waste places as tourist attractions, and he pointed out that in the state of Maine forty million dollars was spent annually by tourists, while in California during the season tourists spend a million dollars a day.

To the people of Central Oregon in general, and of Bend in particular, the appeal should come with especial weight. Nowhere in the whole country is there another section which contains so many and so diversified attractions. Nowhere is there so much to interest the tourist and enable him to satisfy his love of fishing, or of scenery, or of mountain climbing. Visitors in the past season have told us this, and we are beginning to realize that we have been sitting here with our eyes blinded to it all.

Let us open them wide and then proceed to the development of our resources.

Yesterday's classified advertisements contained two that were very suggestive of present-day conditions. One called for a man dishwasher at \$105 per month and the other for a country school teacher at \$90.

Here's hoping that the conciliation board will produce results acceptable to all.

And the sound of the air drill was heard in the land.

## COMMUNICATIONS

To the Editor:  
Under date of Sept. 11th the following advertisement appeared in your paper:

"WANTED—Man dishwasher at logging camp, \$105.00 per month. Apply at office Brooks-Scanlon Lumber Co."

"WANTED—Teacher for District 29, Lake Co., Ore., at \$90.00 per month. Lady preferred. Apply to T. M. Mussen, clerk, Stauffer, Ore."

The comparison here appears odious to the extent that I should like to raise the question as to how long the business interests propose to remain indifferent to the future of a profession that is one and inseparable with the welfare of our boys and girls and their training for life's work. Since we demand the best food and the best clothing obtainable for our children why should we not demand the same type of mental and moral training for them. The argument that "We secure teachers" does not hold for tomorrow or any future time, since low wages and the high cost of living are surely and effectively forcing competent teachers to seek other lines of employment.

It is high time that the commonwealth better itself, not only that justice be done, in the case of those at present employed in our schools, but further that wages be set at such a figure as will insure the attraction of the best talent to the profession.

Yours respectfully,  
J. E. LARSON.

**Some Coln of Vantage.**  
From the Metropolitan tower, New York, on a clear day can be seen the homes of one-sixteenth of the entire population of the United States.

## CLAIMS HONOR FOR GEORGIAN

Savannah Newspaper Asserts That Elias Howe Was Not Inventor of the Sewing Machine.

The centenary of the birth of Elias Howe, the modest Yankee who invented the sewing machine, took place on June 9. There was no extended observance of the day, observes Hartford Courant, yet it was Howe who took a good deal of the drudgery out of the lives of millions of American women. He also increased the power of his fellow men to produce garments and other material that formerly needed the patient handwork of individuals.

But it is interesting to observe, in connection with the anniversary, that the Savannah News undertakes the rather hopeless task of trying to convince its readers that it was not Howe, but a Georgian, Francis R. Goulding, who constructed and operated the first sewing machine. This paper says that this man, a Presbyterian preacher living in Liberty county, married a Savannah girl and then began work on a sewing machine in order that he might save his fair wife much hard work. Alleging this was long before Howe patented his machine, and also that Goulding never patented his, they try to show his motives were purely altruistic and not commercial.

It all sounds good, but it will take considerable "space" in the Georgia newspapers to convince the world that Goulding takes the prize.

## MONKEY CHAIN CALLED MYTH

Recent Travelers in South America Explain Probable Origin of Story Once Implicitly Believed.

An interesting article by Prof. E. W. Gudger, in a recent issue of Natural History, deals with the time-honored story on which most of us were brought up that South American monkeys are in the habit of crossing alligator-infested streams by linking their tails and legs to form a living bridge. Pictures of this feat once figured extensively in the school geographies, and Professor Gudger reproduced such a picture from a Fourth reader published as late as 1897. The story was first told, so far as known, by the Jesuit priest Padre Jose Acosta in a work published in 1589. Several later writers have repeated the tale. The first person to dispute its veracity was Baron Humboldt. Recently explorers of South America, when they mention the story at all, express skepticism. Finally, Messrs. Leo E. Miller and George K. Cherrie of the American Museum of Natural History, who have done so much traveling and collecting in South America, have suggested to Professor Gudger a plausible origin for such tales. They think that the story of the "monkey bridge" has come about through observation of a procession of monkeys crossing a ravine or stream on a pendent liana. —Scientific American.

## Why Americans Lost Contract.

"Speaking of Chinese railroads reminds me of the failure of an American manufacturer to obtain a contract for locomotives because his European competitors made a more careful study of Chinese peculiarities," writes Lynn W. Meekins in the Scientific American. "One locomotive was ordered from each of the competing companies. In every respect save one the American product was unmistakably superior. However, it had been painted black before shipment from the works, and on the way across the Pacific it became more or less rusted.

"Its appearance, therefore, was far less attractive than that of the European locomotives, which were painted in accordance with Chinese preference, and had been touched up by the manufacturers' agents after arriving in China. Don't get your colors mixed if you want to sell goods to the Chinese."

## No Flattery Intended.

"Is that a portrait of your grandmother when she was young?" asked the awkward visitor. "How it resembles you, Miss Ugleton!"

"Now you only say that to flatter me. Grandma was quite a beauty, and everybody knows that I—ahem—I make no pretensions of that kind." "I assure you, Miss Ugleton," exclaimed the A. V., "flattery is far from my thoughts. The family resemblance is striking. I've often known cases like that. There were two sisters I knew when I was a boy. They were wonderfully alike, like that portrait's like you, and yet one of them was as beautiful as a poet's dream, and the other was dreadful—that is, I mean, she wasn't at all—or, rather, she was lacking in that—that attractive quality, you know, that constitutes—what a lovely frame this portrait has, eh?"—Edinburgh Scotsman.

## India Again Importing.

All restrictions on the importation into India of any American manufactures or products, with the exception of gold and silver coin or bullion and cocaine, have been removed. Importation of cocaine and allied drugs is forbidden at all times except under a license granted by the chief customs officer at the place of import. The importation of gold and silver coin and bullion is restricted in that the government of India reserves the right to purchase all importations of same.

## Neglecting Opportunities.

"They say the peach crop is unusually fine this year."  
"Then what are so many fellows doing marrying over there in France?"

## WEST MAY WIN A. A. U. GAMES

ATHLETES FROM OREGON ARE EXPECTED TO MAKE FINE SHOWING AT NATIONAL GAMES AT PHILADELPHIA.

[United Press Staff Correspondent.]

PHILADELPHIA, Sept. 12.—General revival of interest in sports is expected to make the national games of the Amateur Athletic Union on Franklin Field, to-day and tomorrow, the greatest in history.

Return of many star soldier athletes, whose absence "over there" made rather tame affairs of the meets during the past year should make a boomer of this year's revival. Class of the contest should likewise be put on a higher plane, due to the return of the soldiers who have been taking part in inter-army and Inter-Allied meets since the signing of the armistice.

Useless the east can bring out some excellent talent, the west is looked to be an easy winner in the national games. Outside of Pat McDonald, Pat Ryan and Matt McGrath, the New York police trio of weight stars, the east doesn't seem to have any entries that will trim the aggregation that the west will send from San Francisco, Seattle, Portland, Spokane, Los Angeles, St. Louis, Kansas City and Salt Lake City.

The list of stars includes Ralph Spearow, Portland, who has cleared thirteen feet in the pole vault; Verne Windnagle, who while a student at Cornell forced Ted Meredith to his half-mile record; Arthur Tack, who has a record of 181 feet with the javelin; Wallace Caderly 48½ seconds for the quarter; Floyd Payne, a five miler who has never been

beaten; John Murphy, with a high jump of 6 feet 2½ inches, and Henry Williams, who is credited with a mark of 9½ seconds for the hundred.

The Los Angeles A. C. will be represented by the sensational sprinter, Charles Paddock, who won the 100 and 200 meter events at the Inter-Allied games; W. Yount, an all-around man in the hurdles, broad jump and hop-step-and-jump. Rjek Templeton, second in the high jump, and Reg. Coughy, winner of the 16 pound shot put at the Inter-Allied games, will represent the Olympic Club, of San Francisco.

## Daily Market Report.

### LIVESTOCK.

(Furnished by arrangement with the Central Oregon Bank.)  
NORTH PORTLAND, Sept. 12.—Nine hundred and fifty cattle received. Market steady.  
Best steers, \$10.50@11.25; good to choice, \$9.50@10.25; medium to good, \$8.50@9; fair to medium, \$7.50@8.25; common to fair, \$6@7; choice cows and heifers, \$7.75@8.50; good to choice, \$7@7.50; medium to good, \$6.50@7; fair to medium, \$5@6; canners, \$3@4.50; bulls, \$5@7; calves, \$8@14; stockers and feeders, \$6.50@9.

## Seven Reasons Why There Should Be An Electric Range in Every Bend Home.

- 1st—Saving of time, labor and fuel.
- 2nd—Meats, vegetables and other foods retain natural flavors when cooked on an ELECTRIC RANGE that are otherwise lost in vapors when subjected to uneven heats produced by wood, coal or gas ranges.
- 3rd—Get out of bed, turn the button and breakfast is started while you are dressing.
- 4th—No dirt, no ashes. Mother's work is easier and her disposition is happier and her days are longer.

- 5th—A blessing when days are hot; cook on an Electric Range and you do not realize there is any heat in your kitchen.
- 6th—Very low rates maintained by the Bend Water, Light & Power Co. put all the comforts of the ELECTRIC RANGE in reach of all.
- 7th—Cleanliness, ease, comfort and the fact that Mother's burdens are lightened should be the main reasons for an Electric Range.

Bend Water Light & Power Co.

The farmer and the business man of this community are partners in the progress or the failure of their community.

**—If**

they pull together, the progress and prosperity is certain to come.

IF they listen to preachers of class hatred there can only be failure as a result.
