WILL BEND PREPARET

The frequent recent warnings that we may expect a recurrence of the influenza epidemic, or pandemic, this fall have led the United States public health service to report on extensive investigations made by it in the past months.

The important facts developed by the service in its investigations, which were carried on in every state and important city, and even in foreign countries, are as follows:

"Probably, but by no means certainly, there will be a recurrence of the influenza epidemic this year.
"Indications are that, should it occur, it will not be as severe as says the report. the pandemic of the previous win-

"City officials, state and city boards of health, should be prepared in the event of a recurrence.

"The fact that a previous attack brings immunity in a certain percentage of cases should allay fear on the part of those afflicted in the previous epidemic.

"Laftenna is present by disset and

'Influenza is spread by direct and

indirect contact.
"It is not yet certain that the germ has been isolated, or discovered, and as a consequence there is yet no positive preventive, except the enforcement of rigid rules of sanitation and the avoidance of personal contact.

sonal contact.

"A close relation between the influenza pandemic and the constantly increasing pneumonia mortality rate prior to the fall of 1918 is recognized.

"It is now believed that the disease was pretty widely disseminated throughout the country before it was recognized in its epidemic state. This failure to recognize the early cases appears to have largely been due to the fact that every interest was then centered on the war."

No cure or specific for the dis is suggested by the service, but it urges preparedness as the best way to deal with it.

Big Private Telephone Exchange.

The size of the private telephone exchange grows with the erection of every hotel or office building of any considerable proportions. The largest ever constructed is that of a New York hotel which has been recently room 30 feet by 14 feet. The oper-ating force consists of one chief operator, one assistant chief operator, eight supervisors and 110 attendants. The switchboard consists of twenty-three positions. Thirteen positions are equipped with telautographs used for paging and announcing only. The switchboard has a capacity of 3,340 extensions and 180 trunks. The hotel has telephone service in each of its 2,200 rooms, and there are forty public telephone booths served by four switchboards connected with the main switchboard. The following gives some iden of a few of the items which make up part of the telephone system: 630 fuses, 1.170 condensers, 2, 400 relays, 5,350 tamps, 48,500 jacks 750,000 soldered connections, 7,926,000 feet of wire.

AND YOU KILL I

MINORITY IN FOREIGN RELATIONS COMMITTEE THUS CHALLENGES REPORT OF LODGE MAJORITY

WORLD PEACE IN BALANCE

Until Treaty Becomes Effective Ferment in Industrial and Financial World Will Continue.

Washington (Special)-The minority nembers of the senate committee on foreign relations made their report Thursday to the senate on the peace treaty and league of nations coven ant. The report was signed by Sena tors Hitchcock, Williams, Swanson, Pomerene, Smith and Pittman. report is a direct challenge to the majority report of the committee made to the senate Wednesday, which recommended a number of amendments and reservations to the treaty and covenant. The minority report declares that the adoption by the senate of these amendments or reserva-tions would kill the present treaty and necessitate the reopening of negotiations with the allies and Germany.

The report is a plea to the senate and the country for ratification of the treaty without amendment or reservation, to the end that industrial conditions be stabilized on the basis of world peace, guaranteed by the nations of the world organized in a

World Is in Ferment.

"The industrial world is in ferment" says the report. "The financial world is in doubt and commerce halts while this great delay in the peace settle ment has been caused by the majority of a committee known to be out of harmony with the majority of the senate and the majority of the people. This is government by obstruction as well as by a minority.

"Our export trade already shows the undeniable effects of delay and doubt in treaty ratification and peace settle ment. For the first seven months following the armistice our exports averaged almost seven hundred milllons per month, but in July they fell to \$570,000,000. Europe undoubtedly wants our products but can only take them in full quantity if our financial institutions provide the credit to bridge over the period necessary restore European industry to producand will not be furnished as long as the peace settlement is in doubt.

Delay Prevents Trade Revival.

"Public credit has heretofore carried this great balance of trade. Our government, however, has about reached the end of its authority given by Congress and will advance but little more. From now on if we are to keep up our commerce with Europe private enterprise must furnish the credit to cover the trade balance till European industries get started and are able to pay us with their goods. Peace settlement It is pleasant to observe that the delays and doubts paralyze this reviv-Oregon Journal has not stopped its al. If uncertainty continues depres-

"Referring to the action of the maported. In its Sunday issue it said: Jorlty of the committee, we unite in "The whole power of the state government of Oregon, all the influence of the public bodies of the state, and the united weight of the Oregon delegation in congress ought to be brought to bear for the passage of the Mondell bill. Not to relating the anid areas is treachery to claim the arid areas is treachery to the republic and a crime against the people." of them could by any possibility be accepted even by the great nations the treaty.

Sacrifice German Peace Concessions.

"To adopt an amendment or to reject the treaty means that the United sions secured from Germany by a dictated peace. Among the concessions which the United States would sacrifice by the adoption of any amend-ment or the rejection of the treaty may be included the following:

"First, Germany's acknowledgment of responsibility for the war and her promise to make restitution for damages resulting from it.

"Second, Germany's promise to us opened to the public. It occupies 3,165 at the treaty that she will not impose square feet of floor space, having an operating room 110 feet long by 15 feet wide, a terminal room 30 feet long and 25 feet wide, a restroom 23 feet by 15 feet and a locker and washin the treaty that she will not impose discriminate against, imports directly or indirectly from our country. "Third, Germany's promise to us in

the treaty that she will make no dis-rrimination in a man ports on ship-ping bearing our flag and that our shipping in German ports will be given as favorable treatment as German

ships receive. "Fourth, that for six months after the treaty goes into effect no customs futy will be levied against imports from the United States except the lowest duties that were in force for

the first six months of 1914. "Fifth, Germany's agreement with as that the United States shall have the privilege of reviving such of the treaties with Germany as were in existence prior to the war as we may rione desire.

Promise to Restore Property Lost. "Sixth, Germany's promise to us to restore the property of our citizens selzed in Germany, or to compensate

TRI-STATE TERMINALCO.

"Seventh, Germany's very important agreement validating all acts by the United States and by the alien erty custodian by which we seized and proceeded to liquidate \$800,000,000 worth of property in the United States belonging to German citizens.

"Eighth, Germany's agreement that the proceeds of the sale of these properties may be used to compensate our citizens in Germany, if Germany fails to do so, or to pay debts which Germany or Germans owe to American citizens, or to pay American pre-war claims against Germany for property destroyed and lives taken similar to the losses because of the destruction

"Ninth, Germany's agreement that she will compensate her own citizens for property, patents, and other things belonging to them in the United States selzed during the war by our government.

"Tenth, Germany's agreement that no claim can be made against the United States in respect to the use or sale during the war by our govern-ment, or by persons acting for our government, of any rights in industrial, literary or artistic property, in-

Shipping Agreement Affected.

"Eleventh, Germany's agreement ast the United States shall retain over 500,000 tons of German shipping seized in American ports which much more than compensates us for shipping lost during the war.

"Twelfth, we would lose our mem-bership on the reparations commission which will be the most powerful international body ever created and which will have enormous control over the trade and commerce of Germany with the rest of the world for years to come. It not only supervises the use of German economic resources and the payment of reparations, bu it can restrict or expand Germany's imports and distributes much of her desirable exports, including dyes. In no way can the United States assure itself against discrimination in German imports and financial policies unless we have a member upon this great reparations commission.

"We are therefore, without any qualification, against amendments. "The reservations proposed by the

majority of this committee are of such a character as at once betray their authorship. They are the work of senators organized for the purpose of destroying the league and possibly de feating this treaty. Their phraseol ogy is such as make this purpose plain. They are in no sense interpretative reservations to be used to make clear language in the treaty that might be considered doubtful, but they are so framed as to receive the support of senators who desire the defeat of the

Reservations Held Alterations.

"While masquerading in the guise of reservations they are in fact alterations of the treaty. They have all the vices of amendments and the a tional vice of pretending to be what they are not. Presented as parts of the resolution to ratify the treaty they would in fact, if adopted, result in its defeat. All of them apply to the league of nations section of the treaty. Those who oppose the league

of nations realize that it is invincible in a square fight and they hope to destroy it by this indirection.

"The league of nations has stood the test of world-wide criticism and unlimited attacks. It stands today as the only hope for world peace. After all the assaults of many months its purposes and provisions stand out clearly defined, unaffected by criti-

cism and unyielding to attack. "The league of nations proposes to organize the nations of the world for peace, whereas they have always heretofore been organized for war. It proposes to establish the rule of international justice in place of force. It proposes to make a war of conquest impossible by uniting all nations against the offender.

"It is the first international arrangement ever made by which small and weak nations are given the organized strength of the world for protection.

'It is a working plan for the gradual reduction of armament by all members simultaneously in proper proportion and by agreement.

Provides For Arbitration.

"It sets up arbitration as a friendly method of adjusting disputes and in quiry when arbitration is not agreed In both cases it provides a cooling off period of nine months during which the differences will be adjusted. "It preserves the territorial integrity and political independence of each

member and leaves to each the exercise of its sovereign rights as a na "It will save the world from wars and preparations for wars. It will It will

reduce armies and navies and taxes "It is the only plan proposed to releem the world from war, pestilence and famine, the only one by which a stricken world can be redeemed from the disasters of the late war and the langers of impending international chaos. Those who dally and delay as they seek with microscopes to find some petty flaw in its structure have sothing themselves to propose. They have appealed to every prejudice and resorted to every desperate method of attack to destroy this great international effort to establish peace but they suggest nothing in its place.

"We renew our recommendation that the work of the peace conference be confirmed, the will of the people ful-filled and the peace of the world advanced by the ratification of this !reaty—the best hope of the world -even if, like all human instrumental-ities, it be not divinely perfect in svery detail."

Keep Doorknobs Tight.

Doorknob screws often work out and let the knob come off. This may be prevented by removing loose screws, covering them with glue and screwing them back into place.

In His Line.

Husbanda Are Hoping.

Recently an Irvington woman in ited a few of her friends to play cards during the afternoon. There was a strong intimation that the highest score would be rewarded with a prize.

That stimulated interest to a degree.

The women had visions of the or dinary prizes given for card profi-ciency. One of them thought of a nicely hemmed towel, another saw visions of a cut-glass tumbler, and still another dreamed of something else. There was but one table and as the hostess was barred the contest was wholly between the remaining three. Finally the games were over and the scores tabulated. Then the hostess came in with a big glass of current jelly and presented it as the prize of the afternoon. She picked the currants in her own garden and had made the

There is hope in the hearts of some Irvington husbands that the fad of giving real food as prizes will grow. Then, if their wives are good enough bridge players there may be something when husbands come home in the evening.-Indianapolis News,

No Jugo-Slav Race.

There is in strictness no such thing as a Jugo-Slav. There are Serbs, Croats and Slovenes, all of whom speak the same language, with varia tions, and are now of the same na-tionality. There is a religious question among Jugo-Slavs, which has, on occasion, been stressed by the intriguing imperialist politicians on the borders who have been anxious to pre vent national unity, the Serbs being of the Greek, or Orthodox church, and the Croats and Slovenes of the Roman church. There are no more than 12, 000,000 of them altogether, but the territory of the new nation is larger than that of Great Britain.
