"Measure for Measure," "All's Well That Ends Well," have proverbs for their titles. And Cervantes, a name only inferior to Shakespeare, has not left us in doubt in respect of the affection with which he regarded them. Every reader of "Don Quixote" will remember his squire, who sometimes cannot open his mouth but there drop from it almost as many proverbs as words. I might name others who held the proverb in honor—men who, though they may not attain to these three, are yet deservedly accounted great.—Trench.

Decision of Character. Another advantage of this character is that it exempts from a great deal of interference and obstructive annoyances which an irresolute man may be almost sure to encounter. Weakness in every form being; arrogance and a man may be allowed to wish for a kind of character with which stupidity and impertinence may not make a free. When a firm, decisive spirit is recognized, it is curious to see how the space clears around a man, and leave him room and freedom.
