DUTY OF WATER

It is a matter of congratulation that a study of the duty of water on the C. O. I. project is to be made this summer. As we understand it the present 1.8 acre feet contracted to be delivered during a season is an arbitrary figure set when the project was new and before there was any information as to the actual amount of water needed to produce crops in this section. Now, as the project began to carry more settlers, and as questions arise as to the sufficiency of the water supply, it is important to know how much land may be irrigated.

Under the supervision of the O. A. C. authorities there can be no doubt that the work will be properly done. Their funds are limited, however, and it is possible that the work will not cover as much ground as it should in order to give the conclusions to be drawn from it the weight they should have. That is, they may be called upon to generalize from too few instances.

It would cost very little to have the scope of the work practically doubled. As we understand it the college has \$800 for the work it will do. Another \$800 would mean as much work again. If the irrigation district would put up this amount the results would be well worth the expenditure.

By count there are now at least four sidewalk jobs waiting to be done. Would it not be a good plan to finish one before starting on the next.

There is one flier that needs no field to land on. That's time. He's always on the wing.

There must be some snow in the done. Would it not be a good plan mountains now.

Synopsis of the Annual Statement of the Netherlands Fire & Life Insurance Company

of Holland, in the state of The Hague on the thirty-first day of December, 1919, made to the insurance supervisors of the state in accordance with law.

Put it in The Bulletin.

Holland's Strand.

Dame Holland says (I rather like her, admire her nerve and dauntless will): "I won't give up that famous piker whose maiden name was Kaiser Bill. It's no use rearing 'round and pawing, bluffs and pleas will cut no ice; we need the cordwood he is sawing, since coal is scarce and high in price. He piles up ricks of beech and maple, he drags huge sawlogs from afar; he whacks up elm, which is a staple, wherever hearths and ranges are. In vain your talk, O special pleaders, in vain your protests and your roars; you'd like to hve Bill hew your cedars and split your lordly sycamores." Old Bill has laid aside his sabre to saw up logs, that pots may boil; and in these days of high priced labor he asks no money for his toil. In honest sweat his effort steeps him, said sweat is streaming from his brow; no wonder, then, that Holland keeps him, and says she'd rather lose a cow.

CHRISTIAN SCIENCE LECTURE IS HEARD AT BEND GYMNASIUM

To hear the lecture given Sunday afternoon by Paul Stark Seeley of Portland on Christian Science, a good crowd was in attendance in the B. A. A. C. gymnasium. The following summary of Mr. Seeley's lecture, furnished by the Christian Science society, could not be printed yesterday because of lack of space:

"The fact is—as the Bible makes very plain—that the one true and enduring man, God's man, is, as stated in the first chapter of Genesis, made in the likeness of God; that is, he has the character and nature of God, and why should this not be so? Does not a cause pro-

duce an effect like itself? Jesus made it plain that this is the fact when he said: "I and my Father are one" (John, 10:30), one, that is, in quality and nature. Often he referred to the Father which dwelt in him—in other words, the mind of God, or God, which was his consciousness.

"Man is predestined to be the living witness or evidence of God. His expression and consciousness, even as the sunbeam is ever the witness and evidence of the presence of the sun. God's one agency of expression is the spiritual universe and spiritual man.

"Christian Science not only pro-

sents the true concept of man, but shows that it is attainable in some considerable measure right here and right now. It shows that in each and every one of us—and there is no exception, no, not one—there is a natural ability and competency to mentally work our way out of the wilderness of material beliefs, out of the net of material selfhood into our natural unity and agreement with ever-present good, mind, the consciousness which is God, our real life and being. The process is wholly mental, as Paul indicated when he said, "Be ye transformed by the renewing of your mind" (Romans, 12:2).

"Only 40 years ago the first Christian Science church was organized in Boston. Since then nearly 1800 organizations have been formed throughout the world. A publishing society, employing more than 700 people, is supplying the ever-increasing demand for literature explaining the teachings of Christian Science. Christian Science is offering to the world today a volume of testimony as to the efficacy of its healing work unexcelled in the history of therapeutic systems. From business men, educators, lawyers, judges, physicians, ministers, and men and women of all trades and classes it is offering evidence of health and happiness restored to the individual. These testimonies may be heard in the Wednesday evening meetings of the church, or read in the Christian Science Journal, the Christian Science Sentinel, or the Herald, which is published in

French and German.
"It was in 1866 that Mrs. Eddy overcame a serious injury through reliance on spiritual, as wholly apart from material law, and became convinced of the present availability of this law for suffering humanity. For three years thereafter she studied the scriptures most diligently and from them derived a fuller understanding of this spiritual law of life and its applicability to every need of men. The results of these and the preceding years of consecrated study and research were given to the world in 1875 through the Christian Science textbook, "Science and Health With Key to the Scriptures," which has become, next to the Bible, the most widely read book in the Christian world."

The White MAZDA Lamp

For Store, Office and Home

You have never seen any other light like this—brilliant, yet without glare; soft and evenly diffused. There is comfort and pleasure in working or living under the light from this new

EDISON MAZDA LAMP

It is made tipless, in the 50-watt size only. It can be used in any socket or fixture where you now have clear lamps of 40, 50 or 60 watts. Burns in any position.

Stop in and let us show you this new lamp lighted.

Bend Water Light & Power Co.

Do you vote blindly, or have you a practical knowledge of the issues at stake, or of the ability of the candidate when you go to the polls?

The right to vote, remember, is one of the great privileges of a democracy, and it is the only truly American method of righting wrong, or of preventing it.

The Sheelin-Hixon Company.

TIME

The one thing on earth that is thrown away most recklessly and which can never be regained.

TIME SAVING

Goes hand in hand with THRIFT and INDUSTRY in any one's journey toward success.

How You Can Get A Car

There's a dearth of new automobiles. Deliveries are difficult to obtain. There's no immediate relief in sight---

BUT

We have a number of used cars--several makes, most of which have been overhauled and are in good condition. These cars are in good mechanical condition. A reasonable cash payment and small monthly payments will deliver one of these cars to you.
