of address, or of failure to receive the paper
regularly. Otherwise we will not be re-
sponsible for copies missed.
Make all checks and orders payable to
The Bend Bulletin.

SATURDAY, JUNE 5, 1920.

A GOOD POLICY

The newly adopted rule of the
state highway commission to
arrange for surfacing on all grades
built under its jurisdiction is a dis-
tinct forward step in policy that
means much to the various sections
especially interested—thatis those
especially interested—that is to
those where grading is being done.
To construct a grade and then wait
indefinitely before proceeding with
surfacing is a wasteful business. It
is like building a house and leaving
the roof off. Until the roof is
on the interior of the house is
exposed to all the elements and
may have to be rebuilt when the
time comes to put the roof on. In
the same way an unsurfaced grade
will rut and the soil become scat-
tered, necessitating much extra
work before the surfacing material
can be put down.

Possibly the new policy is of no
immediate importance to Deschutes
county, because the commission is
carrying out its promise to surface
the important section of The Dalles-
California highway now being
graded. In connection with future
work, however, it means that, once
a project is begun, it will be car-
ried through to completion. In
this section, unless a road is
surfaced it is no road at all. Many
a job of grading has been done
here that left the road in
worse shape than it was in before
the road crew struck it, simply be-
cause surfacing did not follow grad-
ing. If the commission now or-
ders grading and surfacing on all
new work we shall be assured of a
good road when the first contract
is let.

In view of the gasoline shortage,
it is suggested that folks should be
careful of their soup.

Rippling Rhymes

By the Sea.

I'm at La Jolla, by the sea; the view is something
fine, with large blue billows rolling free—five
thousand miles of brine. The grand old ocean is
my lawn, it slops against my door; no dandelions
grow thereon, to make my spirit sore. The water
booms into the caves, reminding me of this: I do
not have to mow the waves; and such a thought is
bliss. I see the billows, high and dark, the endless
surge and swell; I see the seals, and hear their
bark, as though they'd things to sell. And I could
sit and watch the sea one thousand years or two,
and every hour 'twould bring to me some message
strange and new. It's saying, as it sighs and raves,
and murmurs, moans and pleads, "You do not have
to mow my waves, or from me dig the weeds." The
salt sea sloshes round my coop, and sharks come up
and play, and I sit out, upon the stoop, and smile
the livelong day. I've always had a lawn to mow,
and weeds to dig at night; no sandburs on the
ocean grow, to mar my chaste delight.

Uncle Sam Stocks Prison Farm With Prize Herd

Uncle Sam has gone to farming
in earnest. It is not experimental
work — but food production—
helping to answer the H. C. of L.
problem in feeding hundreds of
dependents daily. The farm idea
is in conjunction with the big
federal penitentiary at Atlanta,
Ga., and is being worked out
under the personal direction of Warden
Fred G. Zerk.

The newest addition is the pur-
chase of a pure bred Holstein
dairy herd comprising 53 cows,
11 calves and 1 bull calf. The to-
tal cost of the herd was about
\$13,000. The highest price for
cow being \$500—the lowest \$175.
The herd was purchased in Wau-
kesha-co. Wis., the selections being
made from seven large herds
there. The biggest purchase was

made from the Wisconsin Masonic
Home herd, near Dotaman, Wis.
The herd is doing fine in the
southern climate and is already
exceeding the expectations by pay-
ing for itself in milk production
profits in about nine months. Three
of the cows have already set a
record of eight gallons of milk
each per day and promise more.
One hundred honor men from the
prison are now working the farm
—furnishing milk, cheese, butter,
eggs and vegetables to feed the
1500 prisoners now confined in
the big prison.

FOUR SMART STREET HATS

This group of four smart street hats
includes four kinds of braid. At the
top a soft, blocked shape is of fine
milk; to the right a hand-made hat
of satin straw is faced with satin, op-
posite, one of piping braid, requires a
veil. A rough shiny braid makes the
trim, stiff sailor below.

YOUTHFUL STYLES IN SUITS

For those who look best in suits
that are trim and simple the youthful
style shown above will prove success-
ful. It has a box-plaited skirt and a
short, straight coat. The latter is very
cleverly cut and depends upon round
buttons in two sizes and a little silk
braid for its embellishment. The collar
is a small and inconspicuous detail.

Reproductivity of Pearls.

There is nothing new under the sun,
and the idea of placing pearls in a
bag with a little rice, and finding af-
ter many years that their numbers
have increased, a very ancient prac-
tice, is claiming attention in the En-
glish press. That the rice has the
appearance of being "pecked" adds a
further touch of the familiar, and
people are asking what kind of rice
pearls like best. In the time of
Boetius de Boot, the reproductivity
not only of pearls but of diamonds
was a common belief. The explana-
tion that the pearls now occupying
attention are vegetable pearls from
the Malay states would not have satis-
fied Boetius.

No Time to Lose.

"This paper says the world'll only
last another five million years."
"By Jove, An' I ain't had my de-
mobilization papers yet!"—Windsor
Magazine.

OF FINE VOILE AND FILET

Hand-made blouses of fine, white
voile have made such a success with
women who dress well that their place
is assured. Here is one in which in-
serts of filet lace, a little embroidery
and small crocheted buttons are com-
bined in a way that will delight the gen-
tlewoman. The tiny buttons serve to
decorate collar and cuffs and larger
ones provide fastenings.

Florida's Big Spring.

What is the largest spring in the
world? Florida has one which must
be near the head of the list. This is
called Wakulla spring. It is 300 feet
across, is 80 feet deep and flows at
the rate of 120,000 gallons of water
every minute. It gives rise to a river
250 feet wide at its source. This
mammoth spring is situated about fif-
teen miles from Tallahassee.

Transvaal's Diamond Output.

At one time the mines of India pro-
duced all the diamonds of the world.
Now more diamonds are obtained at
the mines in the Transvaal in one
hour than are recovered in the entire
Indian empire in a year.

GENERAL PERSHING'S "JEFF" JUMPS A BIT

Just because the war is over is no sign that General Pershing's
horses have nothing to do. It is "play" time with them—the name
as for the general, who has been taking a bit of vacation. This pic-
ture shows the general's horse, "Jeff," as ridden by the general's aid,
Captain J. G. Quekemeyer, taking the hurdles in competition at the
Washington horse show.

Is It Still Coffee?

Two young men walking along
Chestnut street the other evening met
two girls, recent acquaintances, dressed
in height of fashion—for coats and
hats, expensive looking shoes, and in-
vited them to go to a high-class res-
taurant.
The girls agreed and after they had
finished eating, they were asked if
they would enjoy a demi-tasse.
They looked at each other.
"Is it some sort of amuse?" in-
quired one as though there might be
some hidden joke in the invitation.
"I don't think it would go good af-
ter a hearty meal," said the other.
The young fellows gave it up.
"Would you like some coffee?" asked
one of them.
"Sure," replied the girls in chorus.
"That's what we were waiting for youse
guys to ask us,"—Philadelphia Record.

BASS MOUTH BAG FOR VANITY TRAPPINGS

Accessories of dress are as im-
portant to the well-dressed woman
as the selection of the most elabo-
rate costume. Millady's hand-bag,
this season has the fish mouth
opening with plenty of space in
the pleated silk bag below for all
the little vanity trappings.

Washington's Ice Melted.

George Washington put up ice. In
January, 1775, his diary showed he
filled a dry well under a summer
house and another well in a cellar.
Under date of June 5 he wrote in his
diary: "Opened the well in my cellar
in which I had laid up a store of ice
but there was not the smallest par-
ticle remaining. I then opened the
other repository, in which I found a
large store."

"Venerable Bede."

The Venerable Bede or Bede was a
Saxon churchman of deep piety and
great classical learning. He was born
about the year 672, at Jarrow in Dur-
ham, England, near the mouth of the
Tyne. He died in June, 735. Just as
he had completed a translation into
Saxon of St. John's Gospel. His chief
original work is his "History of the
Anglo-Saxon Church," written in Lat-
in.

"This house has Electric Service"

When you've said that, you've gone a long way
toward getting your lease signed. Because the mod-
ern woman wants a house she can turn into a home.
And one of the first essentials of a cheerful home is
the bright, inviting light of EDISON MAZDA LAMPS.

The housewife knows, too, that in the house with
electric service her work will be lessened and made
easier by electric flatirons, electric washers, vacuum
cleaners and the many other electrical appliances at
her command.

Your house will make it the preferred home.
It will be rent easier, and for more. Special terms
now. Take advantage of them.

Our wiring representative will call and give you
facts. Call or phone for information and estimates
