BEND PROBABLE MEETING PLACE FOR NEWS MEN

ASTORIA ROYAL HOST, SAYS GUEST

RESOURCES ARE SEEN

Docking Facilities, Flour Mills, and Salmon Canneries Contribute to

Prosperity of City Which Entertained Journalists.

Astoria is a royal host. Astoria gave the newspaper editors of the state a three days' round of pleasure, interspersed during the State Editorial association's convention Friday, Saturday and Sunday, during which Bend was recommended as the state's city to entertain . the lak daubers in 1921. This was the report of a Bend newspaper man who attended the convention.

Few cities in the Northwest occupy the prominent position in development that is manifested by the big port at the mouth of the Columbia river. Under construction is one of the largest port docks in the worldin fact, second only on one dock, situated in Hamburg, Germany. Recently there opened the thoroughly modern flour mill of the Astoria Milling company, with a capacity of 4000 barrels daily. This flour milt. constructed of concrete, is considered by milling experts to be the last word in sanitation and efficiency.

The canneries along the Columbia at Astoria are turning out their capacity of the famous Columbia river Chinook salmon.

Clatsop county has recently voted a tremendous bond issue of nearly \$3,000,000 to finance the huge construction of docks to accommodate the heavy export and import trade coming via the Columbia.

The editors of the state adopted resolutions favoring legislation lookthe print paper situation throughout looking toward raising the legal rate for publication of legal notices in the state press, and encouraging legislation that will assist in the development of the port of Astoria.
