Three Months \$1.50	Three Months \$2.00
One Month \$0.50	One Month \$0.60

All subscriptions are due and PAYABLE IN ADVANCE. Notices of expiration are mailed subscribers and if renewal is not made within reasonable time the paper will be discontinued.

Please notify us promptly of any change of address, or of failure to receive the paper regularly. Otherwise we will not be responsible for copies missed.
Make all checks and orders payable to The Bend Bulletin.

MONDAY, SEPTEMBER 13, 1920.

VALUATIONS AND TAXATION

To those who keep in touch with taxation matters the news that the county valuation for 1920 will be less than that for the past year will be received with concern. The valuation of the public utilities, yet to be received, may increase the grand total over last year's figures, but the decrease in the assessments made by the county assessor creates an unfortunate situation, and leads to the conclusion by those uninformed as to county valuations that we are going back instead of ahead.

In one way, of course, we are going back. That is, the timber is being cut off and as yet, at least, the loss is not being compensated for by increases in other forms of property. This was one of the possibilities we endeavored to present in an editorial "The Death's Head," appearing here late last year, in which it was urged that now was the time to begin the development of other resources to take the place of the timber when it was all gone. The point is now brought more forcibly home by the cold figures.

No one, however, familiar with the possibilities of development in this section will agree that we are going back. Confidence in the future characterizes every resident of the Deschutes valley, but we have got to make that future for ourselves and in the meantime—pay high taxes.

As we have so often said before, taxes depend on what is spent. The rate is the relation between what is spent and the assessed valuation. To the individual the relation is between his own property and the total. Faced as we are with a lower assessed valuation and the need of increased funds for running our various governmental agencies, we can expect for next year both a higher tax rate and a higher tax in dollars and cents. This will be especially true in the county where, in the past, increased values and the 6 per cent tax limit law have operated to lower the rate.

In short, our only hope for a lower tax rate is in an increased valuation and for lower taxes in decreased expenditures and new property values to be added to those now existing.

It is with regret that The Bulletin announces today the coming discontinuance of Mr. Woelflen's connection with the paper and his departure from Bend. Except for a year and a half during the war, when he made an enviable record at the Presidio and with the 13th Infantry, Mr. Woelflen has been connected with The Bulletin since the summer of 1915, in the period following his discharge from service as part owner. During all this time he has taken an active part in whatever was done for the betterment of Bend and, both in his business and social life, has made a host of friends. All will join his business associates in the regret they feel at his leaving and, with them, will wish him the fullest measure of success and good fortune in his new enterprise.

Women Demand Grit.

If you have the grit you can command respect. The world doesn't want any fawning apologies. That may serve a purpose under some "weak sister" circumstances, but never under the greatest need. Some folks wonder why it is that "all the world loves a lover." The fact is a lover must have grit. Women want their heroes to be leaders, daring, irresistible. They want men who do things. They even like to be made do a few things they protest but enjoy just the same. Weaklings do not dare such audacity. They fear they will lose the maiden's smiles. As a matter of fact it's the daring and the assurance that wins. "Faint heart never won fair lady" we are told. Even in lovemaking you must have grit. And what's more the fellow that does not have grit doesn't deserve to win. Why should a woman waste herself on a molly-coddle? Be a man if you would win.—Grit.

Mild September

When fair September's at the gate, a lot of troubles pull their freight. "At last," we sigh, "we may expect a climate soothing and correct; so let the timbrel and the lyre be sounded, though we still perspire; let joyful music echoes wake, e'en though we sizzle, fry and bake." September, month of queenly charm, too often proves a false alarm. She can be hotter than July, and August, too, and not half try. But we forget the breaks she's made, when she, in Autumn leaves arrayed, comes, promising an early frost, and coolness, heedless of the cost. We're glad to take her at her word, and say she is a peach, a bird, for we're so sick of summer heat, with pavements melting in the street, of torrid days and burning nights, and weepful wails of weary wights! September seems to herald Fall, and Fall's a boon to one and all, when there's a chill in every breeze, and we've a decent chance to freeze, and catch bad colds and have the flu and all the ills that ever grew. Our furnaces we soon must stoke, and get our greatcoats out of soak and ask the coal man if he'll wait six months for payment for his slate. September stirs up thoughts like this; what wonder if we're filled with bliss?

PORT ARMS! AND KEEN EYES

She's the daughter of Count Morosini of Essex, N. Y., and, boys, notice the regular army rifle, the one with the kick in it. Miss Morosini is one of the best rifle shots in the country, recently attaining a high score at the national rifle meet at Camp Perry, Ohio. Notice the padding on the right shoulder.

Put it in The Bulletin.

Fish Nets, the First Lace.

Examine a piece of fine and costly lace. What is it fundamentally? It is a net. By origin it is a fish net. The first lacemaker was a fisherman, or perhaps his wife.

All of the beautiful laces we know today are developed from that clever invention, the fish net. They lack back, therefore, far into the prehistoric.

The first white men who came to America found no lacemakers on this continent, but they did find the Indians weaving fabrics of cotton, yucca and other fabrics, with elaborate pattern designs. They were particularly skillful at a certain sort of "drawn-work."

The California Indians of today make cotton lace, but the art has been taught to them by white people. The pottery they make for sale is sometimes adorned with this lace.

Which suggests mention of the fact that the early Indians often decorated their pottery with textile patterns by impressing the latter upon the clay while soft.

THE UNIVERSITY OF OREGON

—is maintained by the state in order that the young people of Oregon may receive, without cost, the benefits of a liberal education.

The University includes the College of Literature, Science and the Arts, the Graduate School, the School of Physical Education, and the professional Schools of Law, Medicine (at Portland), Architecture, Commerce, Journalism, Education and Music.

High standards of scholarship are made possible by an able faculty, well equipped laboratories and a library of nearly 100,000 volumes.

Supervised athletics are encouraged and every attention given the health and welfare of the students.

With a heightened confidence gained by the recent expression of public support, the University is now entering upon an era of large development and extended usefulness.

Eugene, Oregon

EXPLORER RETURNS

Raold Amundsen, the famous Norwegian explorer who had been unheard of for over two years and reported lost, has arrived at Nome, Alaska, with a few of his party. He has completed the first circumnavigation of the world between the northern coasts of Europe, Asia and America with many harrowing experiences.

Nuns Make Jockey Tights. Nearly all the striped tights worn by jockeys on European race courses are woven by the nuns of Sienna.

PROPOSE EQUAL PLAN FOR LEAGUE COUNCIL VOTE

(Continued from Page 1.)

one change of membership each year to maintain the necessary continuity of the council."

The other three amendments provide for:

1. The strengthening of the posi-

DAREDEVIL TO FINISH LOCKLEAR CONTRACT

Harry McLaughlin stands on top of sky-scraper two hundred feet above the street to show that his nerves are in good condition to take over the unfinished contract of the "Stunt" aviator Locklear, who recently lost his life performing in an airplane.

tion of the assembly by providing for a fixed annual meeting. It also proposes that on the demand of 10 members a special assembly meeting can be called at any time by the secretary-general.

2. The omission of the word

Electric Power Prods Production

Central Station Electric Power utilized through the efficient, flexible, easily controlled Electric Motor made possible war time production.

This same power has proved indispensable in producing peace time necessities.

Just as you add more men to your force when business warrants, so you may install more motors when power demands increase. The cost of electric power is in proportion to the work done. The profit-consuming "overhead" of other forms of power is cut to a minimum.

Our power man will gladly go over the whole situation with you.

Whenever you say,

Prepare For Winter's Wear

"PAINT UP"

As the hot sun's rays of summer leave their mark on your home's exterior, so winter's storms and icy blasts will bring wear and tear. Fortify your home against the element, by giving it a substantial coat of Paint now. We have it in any color or brand you desire plus the necessary equipment to apply it. Our price list contains the lowest figures in town. See it, see us, see and test our PAINTS. Come in and let us help you to select.

HEYBURN HARDWARE CO.

"generally" from the following paragraph in article 13:

"Disputes as to the interpretation of a treaty as to any question of international law, as to the existence of any fact, which, if established, would constitute a breach of any international obligation, or as to the extent and nature of the reparation to be made for any such breach, are declared to be among those which are GENERALLY suitable for submission to arbitration."

The purpose, it was pointed out,

of this suggestion is to make the obligation to resort to arbitration more absolute and more precise.

3. The last amendment concerns the economic blockade. It would permit the council to authorize a state in the vicinity of another state against which the blockade has been enforced, to maintain a certain degree of intercourse with the covenant-breaking state, provided that such action is considered by the council to be necessary to prevent the blockaded state from threatening or attacking its neighbor.
