WEDNESDAY, OCTOBER 20, 1920.

### CRITICAL

Some time ago there appeared here an editorial commending the Oregonian on the stand it had taken in respect to one of Senator Harding's statements concerning the League of Nations covenant. This editorial was reprinted in full with approving comment in the latest issue of the Oregon Voter. And now today's mail brings this critical missive from Portland:

"Editor The Bend Bulletin: Your editorial, so full of praise for the Oregonian's editorial some time since, showing a trifle of anxiety because of Harding's flopping around on the League of Nations question. 'Your editorial is under the title, 'Cool Courage,' I assume, as I saw it in another publication.

"It is very fine of you and all others to blow your horns of praise WHEN said praise agrees with your ideas and then STOP blowing. As you very well know, the Oregonian has not kept its position that it took on that particular occasion. In fact, its changes make a sensible person dizzy.

"I am wondering if the average newspaper editor will ever learn that the American people are beginning to learn to read! It doesn't seem like it.

"Yours with hope for a change in editorial write-ups 'some day.'"

"L. R. SMITH."

In reply to Mr. Smith we venture the suggestion that newspaper editors are well aware of the fact that the people have learned to read. That is why newspapers are published. Mr. Smith's idea seems to be that, having learned to read, he has also learned to think. We trust this is so.

In one respect we feel that yesterday's suggestion that all the republican candidates on the ballot be supported at the polls by members of the party should be qualified. Occupying the position we do, we think it hardly the thing to urge support for the republican candidate for county judge. We know him well, we know the circumstances under which he happens to be in the office, and we know that his wish is not for the office, but simply to do the job well in case the voters prefer him for it. He will be quite willing, we happen to know, to leave the office if his democratic opponent and friend is preferred.

### Unique Moccasins.

Braves of the Passamaquoddy Indians at the Pleasant Point (Me.) reservation do a thriving business among summer visitors by the sale of moccasins made from the feet of seals. Seals are proudest in Passamaquoddy bay. The Indians kill many of them each year. The hides are tanned and used for various purposes and the feet are worked up into footwear both for their own use and for commerce. The fact that there is always a claw, or nail, left for each of the five toes makes these articles of footwear unique and gives them an appeal to the tourists who visit the reservation.

### Virtues of Bare Feet.

Eye was reputedly barefoot, and Nausicaa played ball all the better because she went unshod.

Helen of Troy at the most wore sandals, and the sandal is the compromise between the shoeless and the shod. It is easier to make sandals than to make boots.

In Ireland and Scotland the children have run barefoot for many a day, and the wit of the one and the enterprise of the other show that there is nothing really demoralizing in going without shoes and stockings.—London Chronicle.

### A Slight Omission.

Bertie—Good heavens! What a sight you are!

Reggie—Just as I was leaving the house to come to the club my wife pelted me with flowers.

"But that doesn't account for your bruised and battered appearance."

"No, you see, she forgot to take them out of the pots!"—From the Edinburgh Scotsman.

**Father Noah**  
 Father Noah built his ark, just behind the village pound; and he heard some fool remark from each guy who snooped around. All the alecks, all the wits, joshed him as he hewed his planks; all the sports were throwing fits, laughter sounded from their ranks. Why should Noah build an ark, when there was no water near? It was folly, rank and stark, his absurdity was clear. Father Noah toiled along, heedless of the jeering mob, nailing shingles with a song—he was Johnnie on the job. When the ark was fit to sail, all the sky grew dark and dour, there were gusts of wind and hail, then it rained three feet an hour. Had he cared for what men said, when he built his Shamrock Five, all the beasts would now be dead which are very much alive. All the elephants and fleas would be resting in their graves; all the cows and bumblebees would have perished in the waves. If we know we're doing right, that our goal is safe and sane, we should heed no comments light from the frivolous and vain. Every man who bravely works at a useful task or trade, finds some cheap, derisive smirks on the loafers' mugs displayed. But he chortles and he sings as he plies his gleaming tools, for there are no grievous stings in the empty words of fools.

### JEWELS USED IN WATCHES

Hard Substance is Needed to Withstand the Constant Friction Which Wears Away Moving Parts.

The principal reason for the deterioration of any piece of machinery is because the constant friction wears away the moving parts and interferes with the regularity of the mechanism. A watch, being a machine in which absolute uniformity of speed is essential, it is necessary to reduce this friction to a minimum—either through constant oiling, the use of ball bearings or some very hard material which will withstand the wear and tear of constant friction. The first two of these methods are not feasible in so small a piece of machinery as a watch, so certain very hard jewels are placed at various points to counteract the rubbing caused by the moving parts.

Watches are generally equipped

with 7, 15, 17, 19, 21 or 23 jewels, the 15 and 17-jewel types being the most popular. Intrinsically, the jewels, used in the manufacture of watches are of little value, but from the standpoint of service and the specific purpose which they serve they are invaluable. The jewels usually used in watchmaking are the hardest of the precious stones, diamonds, sapphires and rubies, and of these the most generally used is the sapphire, which combines hardness with comparatively reasonable price.

### POWER IN RADIUM WATCH

Owner of Radiolite Timepiece is Also Possessor of Vast Power Plant.

The possessor of a radiolite watch or one having a radium dial by which the time can be detected at night, is also the possessor of a vast power plant of no mean proportions, accord-

ing to a writer in the Electrical Experimenter. There is sufficient radium on your watch to haul your trunk home if it could be properly applied, says this author.

As the matter stands, the innocent-looking radium dial does not seem to possess any extraordinary amount of concentrated energy, but this is only apparently the case, and not actually so, for the reason that while the amount of activity manifested by the radium paint on the dial is small, this effect will keep up for 2,500 years, provided the zinc sulphide, with which the radium is mixed so as to produce a glow, holds out that long. The zinc sulphide in most cases gives out in about eight to ten years.

Now, if we could but find a way to make the radium release all its energy in a few hours, instead of spreading it over 2,500 years, it would not be difficult to make a motor that would utilize this energy.

### NOTICE TO CREDITORS

In the County Court of the State of Oregon, for Deschutes County.

In the matter of the estate of Tillie Bates, deceased:

Notice is hereby given that George Bates has been appointed administrator of the estate of Tillie Bates, deceased, by the County Court of Deschutes County, Oregon.

All persons having claims against the estate of Tillie Bates are hereby notified to present them, duly verified, with proper vouchers, to said administrator at the law offices of R. S. Hamilton, in the First National Bank Building, Bend, Oregon, within six months from the date of the first publication of this notice, to-wit: Within six months from the 20th day of October, 1920.

**GEORGE BATES,**  
 Administrator.  
**R. S. HAMILTON,** Administrator,  
 Attorney for Administrator,  
 115, 121, 127, 133, 139c.

### SUMMONS

In the Circuit Court of the State of Oregon, for Deschutes County.

The Bend Company, a corporation,

Watch For  
**LOVEN'S**  
**BIG**  
**OPENING**  
**DAY**  
 in New Location on  
**Bond Street**

plaintiff, vs. Mrs. Edythe B. Wilson, defendant.

To Mrs. Edythe B. Wilson, the above named defendant:

In the name of the state of Oregon, you are hereby required to appear and answer the complaint filed against you in the above entitled case and cause on or before the 4th day of November, 1920, which is more than six weeks after the 22nd day of September, 1920, the date of the first publication of this summons, and if you fail so to appear and answer, for want thereof, the plaintiff will apply to the court for the relief prayed for in the complaint, to-wit: For a decree of this court forever barring and foreclosing any and all right of the said defendant in and to the property described in the complaint as follows: Lot 11 of Block 10, Highland addition to Bend, according to the duly recorded map and plat of said addition now on file and of record in the office of the County Clerk of Deschutes County, Oregon, or any part thereof, and that the contract in plaintiff's complaint mentioned be cancelled and that the defendant's right in and to said property and contract be forever cancelled, barred, and held for naught, and that the defendant have no interest therein, and for such other and further relief as to the court may appear just and equitable.

Service of this summons is made upon you by publication thereof in The Bend Bulletin for six consecutive and successive weeks, under and by virtue of an order made and entered on the 22nd day of September, 1920, by the Honorable T. E. J. Duffy, Judge of the above entitled court.

The date of the first publication of this summons is the 22nd day of September, 1920, and the date of the last publication thereof is the 27th day of October, 1920.

**E. O. STADTER,**  
 Attorney for Plaintiff,  
 First National Bank Building, Bend, Oregon.  
 91, 97, 103, 109, 115, 121c

Put it in The Bulletin.
