Thought Still a Rare Quality.

The tremendous task of teaching men and women to think for themselves has been scarcely begun. All our very cleverest people are the creatures of a school of thought, or belong to some intellectual herd. Fearless, independent, tolerant thought is still as rare as science was in the fifteenth century.—Herbert N. Casson.

Detriment to the Community.

The man who misleads himself is unfortunate, but the man who misleads others for personal gain is an undesirable citizen.

Pronunciation of Z.

The pronunciation of the letter Z as zee is an Americanism. The English pronunciation is zed, from the Old French zede, which in turn is derived from the Latin zeta, the name of the sixth letter of the Greek alphabet, corresponding to the English zed. Shakespeare in King Lear, act II, scene 2, gives the English pronunciation, which is still in vogue: "Zed! thou unnecessary letter."

Philippine Forests.

The forests of the Philippines afford the greatest variety of wood in the world. Some of the hard woods are unexcelled for beauty and durability and a big trade is developing in exporting the timber to the United States.
