

**WILL INVESTIGATE MANY ANNULMENTS**

**New Avenue For Unhappy Couples  
Robs Divorce Court; Grand Jury To Probe Cases.**

(By United Press to The Bend Bulletin.)  
SAN FRANCISCO, April 4. — Divorces as a means of getting rid of troublesome mates are becoming unfashionable in San Francisco, according to Superior Judge E. P. Shortall.

Annulments are proving less cumbersome and quicker—in fact, quicker than Reno. As a result the grand jury is going to look into things a bit.

Persons who desire to travel their paths singly after failing to pull properly in double harness have discovered, Shortall says, that they can bring a suit for annulment, alleging the other member of the partnership had a previous mate, from whom there was no legal divorce. The case is tried and often, by agreement or on account of being unable to produce evidence, it goes uncontested. The marriage is annulled.

The minute the annulment is entered both parties are free to marry again, without the formality of waiting a year.

But what interests the court is why there have been no prosecutions for bigamy growing out of the many annulments granted on the grounds of bigamous marriage. Annulments have average as high as seven a day for a week during the last six months, court records show.

**SAYS ALL SHEEP MUST BE DIPPED**

**State Veterinarian Says State Law Will Be Enforced—One Dipping For The Healthy Animals.**

All sheep in Deschutes and Lake counties must be dipped once this spring, whether or not they are infected with any disease, according to the announcement made by the state veterinarian, Dr. W. H. Lytle, before leaving Bend Saturday for his headquarters at Salem.

Those found infected must be dipped twice, or until cured, according to the state law. Dr. Lytle stated. No sheep will be admitted into the national forests without a dipping certificate.

Dr. R. A. Parsons, government inspector, superintended the dipping of 1900 ewes and lambs for William McCormack of Deschutes Saturday.

**BLACKLEG VACCINE BEING DISTRIBUTED**

One thousand doses of blackleg vaccine have been received at the local headquarters of the Deschutes national forest from the United States bureau of animal industry and are being distributed today among cattle owners.

Jud Tunkins, who for practical purposes a philosopher and a student isn't near as much practical use in society as a person that plays a fair game of bridge.

Jud Tunkins says he never yet saw a man who said he loved work that wasn't more or less fickle in his affection.

**WAY FROM CRESCENT TO FORT ROCK OPEN**

**Millican-Fort Rock Road Open, But Driver Must Buck Snowdrifts—Other Roads Good.**

The road between Crescent and Fort Rock is now open and passable by automobile, according to Supervisor H. L. Plumb of the Deschutes national forest, just returned from a trip in that region. The Fort Rock-Millican road via Fox butte is also passable, but whoever attempts it must buck two feet of snow at the summit, he declares.

Snow will not leave that region for a month yet, Plumb believes, as the ground is still frozen. Other roads to the south are in good condition, although there is more moisture than usual at this season. Between La Pine and Fort Rock the road is rough, but muddy only in a few places, and nowhere is a car in danger of being stopped by mud. The China Hat cutoff between Sand Springs and Fort Rock will not be open for a month.

**WATER IS THROWN 100 FEET IN AIR**

**Fire Department Holds First Outdoor Drill of Year, Inspecting Downtown Hydrants.**

Outdoor drill was held yesterday for the first time this year by the Bend fire department, the engine being taken out for a practice run. The pumper was tuned up almost to its capacity, throwing a stream of water more than 100 feet in the air against a heavy wind. The pressure reached was 260 pounds to the square inch and water was "Siamesed" from two lines into one, giving additional force.

A number of hydrants were inspected in the downtown district, a run being made to each and connections made. The steamer suction for connecting the pumper to the large hydrant openings were attached for the first time and found practicable.

**Gender of the Sun.**  
In modern English literature the sun is invariably referred to as masculine and its gender is now so fixed. But in old English the sun was always termed feminine, as it is in Milton; Shakespeare, however, considered the sun masculine. The Germans still refer to the sun as feminine, while in French it is masculine.
