Beautiful Hair is the Crowning Glory of Every Woman--

But no man, too, looks more attractive with a good growth of hair than with thin or no hair at all on top of his head.

Mothers especially should not neglect their children's hair, once in a while a good electrical treatment with some nourishing ointment or tonic, will bring up circulation and start the hair to grow, a little investment for which the children will be thankful in later years.

The climate of this country is very hard on scalp and skin, therefore almost constant care is necessary to keep them in good condition. Mrs. Muller's electrical scalp treatments are guaranteed to correct all scalp troubles, and encourage a beautiful growth of hair.
