### GOOD TIMES AHEAD

Prosperity is within our reach in America.

All we need to have and to hold it is a sane, sure grasp on its simple elements.

They are Industry, Integrity and Faith.

These are the cardinal virtues of human relations. They are the underpinnings of healthy, natural business life and the foundation of a wholesome social system.

They are the fountainhead from which progress springs.

A well-known business economist has called them the "Fundamentals of Prosperity."

Buying is the backbone of prosperity. An active market means more employment, steadier earnings; benefits are passed around.

The call of today is for cheerful thinking, willing working and constructive action by you—everybody—NOW.

Tomorrow's change for the better will come about through the combined efforts of each and everyone of us.

By sheer force of numbers and co-operation, by the high power of heart and mind, we can put business on a firm, stable basis.

We can do this because all of the material factors making for better business are right.

Let us link our faith with industry, our vision with courage, and forge ahead.

Let's make an uncommon effort toward a common end—Good Times.—A message from the Associated Advertising Clubs of the World.

#### TRAFFIC SUGGESTIONS MADE

Bend, Ore., Oct. 12, 1921.

To The Editor:  
You asked for suggestions on automobile parking on business streets. Here's one.

The system adopted in Pendleton is very practical—a reserved and marked strip along the center of streets in which cars are parked in oblique positions, being entered from either side. The several advantages of this system are obvious.

On the Pacific and the Columbia River highways the custom of dimming lights when meeting other cars is practically universally observed, there being very few violations of this requirement. This does not seem to be observed by drivers in the rural districts in Central Oregon. Furthermore horsedrawn vehicles do not carry head or tail lights, as required by law. The pitch of lights on autos, as required by law, do not permit a driver to see the road very far ahead. Consequently he comes suddenly upon a load of hay or wood when to all appearance the road ahead is clear. In the event of collision and damage in circumstances would most likely fall upon the driver of the horsedrawn vehicle.

Motorists are entitled to protection through the enforcement of the law pertaining to lights on vehicles of whatever kind.

I hope this observation will be as welcome as suggestions called for on street parking.

**Dutch Concert.**  
 A Dutch concert is a so-called concert in which every man sings his own song at the same time that his neighbor is also singing his, a practice not necessarily so national as convivial. There is another form of Dutch concert in which each person sings in turn one verse of any song he pleases, some well-known chorus being used as a burden after each verse. When every person has sung, all sing their respective songs simultaneously as a grand finale.

### Motor Madness

My shining car no more you see around my stately residence; the windshield's hanging from a tree, the axles are astride a fence, and wearily my weird I dree, and wonder why I have no sense. "Don't go so fast," I have been told by many wise and prudent guys, "or soon a wooden box will hold a delegate about your size;" their counsel was as good as gold, but prudent counsel I despise. And so I stepped upon the gas and made my gilded wagon fly, and I would let no auto pass, however fiercely it might try; and sage advice like sounding brass appeared to me, as I whizzed by. "I've warned you once, I've warned you twice," the friendly speed cop to me said, "and if I have to warn you thrice, a prison cot will be your bed; or maybe you'll be laid on ice, with tapers at your feet and head." My pastor urged me to reform, and use my small supply of brains; "all day," he said, "the sapheads storm along the pike in noisy wains, and soon the coroners will swarm, and sit on your and their remains." And so I went my dippy way, and laughed at maxims and at saws, at frantic speed I pushed my dray, and busted all the traffic laws; and now you see me here today, the worst old wreck that ever was. Learned surgeons try to make me straight, but they are worried and perplex; apothecaries near me wait, and pastors, with their timely text; and staid morticians, at the gate, are saying that their turn is next.

Rear Admiral Newton A. McCully, United States Navy, is a bachelor. When the people of the Crimea fled en masse last winter before the Russian Red Butchers, thousands of children were left without parents. McCully's ship was at Sebastopol, and he picked up the six waifs shown above. He brought them to America on his ship, and has legally adopted them. They are shown going to school in Washington, where Bachelor McCully has set up a home at last for himself and them.

#### Lines to Be Remembered.

He who calls in the aid of an equal understanding doubles his own; and he who profits by a superior understanding rubs his powers to a level with the height of the superior understanding that he unites with.—Edmund Burke.

#### Why It Exists.

An Arizona entomologist claims to have discovered usefulness in the chigger. We don't know what it is, but our guess is that the chigger exists solely for the purpose of giving people something to do when they might otherwise be comfortably doing nothing.

#### Seemed Only Explanation.

Wilbur had seen the various peddlers come through the alley with horses and wagons pulling their wares. So when the sawdust grinder appeared one day carrying the bulky machine on his back there seemed to be but one explanation possible to the lad. When the man came near enough Wilbur asked sympathetically: "Mister, is your horse dead?"

#### Inventor Well Rewarded.

For his invention of lubbitt metal, a soft, anti-friction alloy used for bearings, Isaac Lubbitt received a reward of \$20,000 from Congress.

### PIPE ORGAN INSTALLED FOR LIBERTY REOPENING

Announcement has been made of the reopening of the Liberty theatre Tuesday night, with the picturization of one of the oldest, yet, most popular stories ever told on the screen: "Way Down East."

Unusual interest is attached to this opening performance owing to the fact that it will be the introduction of the first pipe organ in Bend. A Wuritzer unit organ has been installed and the entire theatre has been refinished and decorated, during the time it has been closed.

If possible, "Way Down East," produced by D. W. Griffith the genius of the screen bids fair to eclipse even the enormous vogue enjoyed by "The Birth of a Nation."

This picturization of the famous stage success furnished by Lottie Blair Parker and Joseph Grier goes much farther than the original tale. Mr. Griffith has begun where they halted. He has not made it a provincial thing; attempting to explain nothing he has welded a theory of eternal love and in so doing has removed his people from time and period. Possessed of a vision and mentality too great to be handicapped by anything, he has brought forth an epic far more than clever—it has the ring of genius. The simple fun of plain people is brought forth in greater measure than the stage play version could ever hope to attain and offers keen contrast to the sufferings and woe of Anna Moore, her hopes and struggles. Probably the greatest cast of capable players ever

assembled for a motion picture production was engaged in the making of this work and it ends in a thrilling climax of spectacular scenes amid the veering flaps of a New England blizzard and the explosive breaking of a river ice gorge, all of which enthrall as only a Griffith effort can move audiences. The tender moments, the tragic episodes, the laughable situations and the stirring scenes are accentuated by unusual orchestral accompaniment, pronounced the most ambitious yet attempt in the theatre.

#### Like Father, Like Daughter.

The tendencies of the father are usually handed down to the daughter, while the son inherits those of the mother.

## Better to be Slow and Sure Than Fast and Sorry--

Just because a speed cop doesn't stop you every time you step on the accelerator and watch the dial of your speedometer creep up to 40 and 45 miles an hour is no reason why you should not use good judgement. Be your own speed cop. Remember when you drive too fast you endanger the lives and property of other people as well as your own. Besides fast driving damages the road more than anything else.
