IDLE MONEY!

One can hardly pick up a newspaper that he does not read a list of robberies of individuals in sums ranging from a few dollars to thousands of dollars.

The man walking home is held up; the clerk carrying a suitcase containing payroll money is held up; members of clubs are relieved of their roll while sitting in their easy chairs. Women are robbed and children are no exception to the rule.

No man knows when he may be next. It seems folly to carry large amounts of cash when a banking account and a check book would serve the same purpose.

It is claimed that three billions of dollars are hidden around houses and carried in pockets by the people of the United States. All this is subject to almost instant destruction by many causes. If this were deposited in banks, thus releasing it for useful purposes, it would go a long way toward financing necessary business today, besides affording the depositor a source of protection and income.

THE FIRST NATIONAL BANK OF BEND can safeguard its customers against losses from robberies if its services are taken advantage of.
