## FIRE DESTROYS BATTERY SHOP

### PROPRIETOR DRIVEN FROM BED IN EARLY MORNING—LOSS IS HALF INSURED—SHORT CIRCUIT THOUGHT CAUSE.

Fire shortly after 7 o'clock this morning gutted the battery shop of H. R. Riley on Greenwood avenue, completely destroying the battery equipment and badly damaging the building. Riley, who was sleeping in a room at the rear of the building, was driven out of bed by the flames. The cause is believed to have been a short circuit in the battery room, as the fire started there.

The loss in battery equipment was about half covered by insurance, said Riley. Two cars belonging to him were in the front part of the shop, and were badly scorched before they could be taken from the building.

Acting Fire Chief John Taylor estimated the loss at between \$2,000 and \$2,500. The insurance amounted to \$1,200.

The fire department made a good run, and extinguished the roaring fire in the battery shop in short order with the effective use of two hoses, using pumper power.

Firemen seem to be particularly unlucky in having fires on their own property. Riley is the third member of the department to have a fire in the last year, the others being George Stokoe and Emil Hess. W. R. Riley, father of the proprietor of the shop, has recently sold his interests in La Pine with a view to taking part in the operation of the shop which was destroyed this morning.

Milkman is Sought
