**O. K. Tall Their Fuse Blew Out!**

Their meeting was mutual. She being immediately attracted by his magnetic personality, while he was not repelled, for his lips soon made contact with hers, and the sparking grew intense. He proposed with lightning-like precision, then they were united. Their friends were electrified. Wasn't it shocking?—K. K. Loafbourrow in Detroit Free Press.

**Mince Pie.**

Mince pie was discovered in 1506, says an exchange. That's a long while ago, and yet a lot of us have still to learn that it isn't safe to eat it at night.

**Health Habits for Children.**

Health instruction and its result in the formation of habits, is the subject of a daily record of health habits for every child in the schools of Washington, D. C., according to the United States bureau of education. Blanks are marked after the morning daily inspection by the teacher. Each school day a mark is given for the pupil's observance of such habits as brushing the teeth, carrying a handkerchief, keeping a good posture, taking thirty minutes physical exercise. Thirteen health habits are noted. At the end of a month a rating is given to correspond with the daily record, and the sheet is sent home folded around the report card, to be signed by the parent and returned. It is expected thus to secure the co-operation of the home in inculcating health habits. Children showing extreme neglect are referred to the school nurse.

**The Library Pest.**

You get a book out of the library, and notice that some other reader has improved on the author by underscoring the printed text or penciled notes in the margin. Occasionally these show intense interest and deep thought. But librarians say most of the "improvements" are changes in punctuation. Some folks are so busy looking for other people's mistakes that they haven't any time for their own.

**Emerson at College.**

He found there but little nutriment suited to his appetite and estrayed off, though with some misgivings, to other pastures. In one of his journals long afterwards, he speaks of "the instinct which leads the youth who has no facility for mathematics, and weeps over the impossible analytic geometry, to console his defeat with Chaucer and Montaigne, with Plutarch and Plato at night." . . . In his own way he was industrious; feeling vaguely that, for him, power of expression was more important than philological or scientific training.—James Elliot Cabot.

**Costly Debauch.**

One of the calamities of medieval England was directly due to overindulgence in liquor. Henry's son and heir, William, was to sail from France on the White Ship. The Norman sailors got drunk just before they started for England, and the vessel was lost with all on board. It was a costly debauch, for by removing Henry's only male heir it opened the way for a civil war over the succession when he was no more.
