CLUB WILL AID RAIL EXTENSION

Development of Greatest Importance To Bend Is Sought.

Interest of the Bend Commercial club in proposed and rumored railroad development in Central Oregon crystallized today into action when a committee was appointed by the club directors to conduct a thorough investigation of all matters pertaining to railroad construction, and to take steps, after its investigations are completed, to try to secure the development which will be of greatest advantage to Bend. Members of the committee are R. S. Hamilton, D. G. Pherson and C. S. Hudson, with two more members to be named, one from each of the mills.
 Information will be sought, not only as to what the railroad companies plan to do or may decide to do, but along the lines of the amount of business which a railroad would find to do in the new territory which it will touch, the effect on Bend as a distributing and marketing point, and on freight rates and local conditions.
 Over 50 men have been given employment through the Commercial club bureau, it was reported by L. Antles, secretary. He now has places for 14 men, most of them on ranches. S. W. Hubble was elected to membership in the Commercial club.
