## SHEVLIN-HIXON TO SHOW FILMS IN SALES WORK

Manufacturing Process  
Is Screened

PREVIEW HELD HERE

Reel to be Taken to Seattle  
by Frank R. Prince for  
Caption Writing

Moving pictures of lumber manufacturing operation of The Shevlin-Hixon Company in the Deschutes country of Central Oregon, from the time the giant pines are felled in the woods to the placing of the finished product aboard cars for shipment to all parts of the nation, will be used by the local lumber company in its sales work. So far as known, The Shevlin-Hixon Company is the first lumber concern in the United States to illustrate with moving pictures its timber operations.

Knowledge that the interesting story of the transformation of the Central Oregon pines from the raw product into lumber, boxes and other timber products, will be told in about 1,000 feet of films to patrons of The Shevlin-Hixon Company in the Minneapolis sales territory and to prospective buyers, was given out last night in connection with a preview of the films in the local office of the lumber company. The preview was seen by a group of the mill officials and invited guests.

The "movies" of the timber operations in the Deschutes country were taken under the direction of Frank R. Prince of The Shevlin-Hixon Company, editor of the Shevlin Equalizer. Prince was assisted in making the pictures by H. B. Dammon, special field officer of the Four L's, and by heads of the various mill departments. Prince will leave Sunday for Seattle with the films, where they will be captioned. Two copies of the films will be made. The original is to be kept in Bend and the copies are to be sent to the head office of the company in Minneapolis.

Woods Pictures Taken  
Although the pictures shown in the mill office last night were not the finished product, they gave a graphic illustration of the conversion of the great pines from trees into lumber. The first reel was preceded by a few "shots" of Bend, followed by several scenic views of the upper Deschutes territory and of Paulina falls. The first reel fully illustrates the history of a pine from the woods to the mill pond. The work of the "big wheels" and tractors, the McClifford loader and the Lidgerwood were also depicted. Several excellent views of pines in the process of falling were obtained by Prince in making the pictures.

The second reel illustrated the work of taking the logs out of the mill pond and into the mill and through the giant saws, the planers and on to the green chain. The process of the manufacture of lumber was followed step by step through the mill, the dry kilns and the yards. Virtually every machine in the plant used in the manufacture and handling of lumber, including the Gerlinger carriers, was pictured.

Fire Scene Shot  
After the three main films were shown, Prince threw on the screen several pictures which are to be used as inserts. One of these films was taken in the company's box factory, where a board was followed through the plant to the place where it came out ready for shipment. The work of making boxes for a nationally known condensed milk company was also shown.

One of the most interesting pictures shown at the preview was a movie of a fire at camp No. 2, taken last week. Prince happened to be on the ground with his movie camera when the fire broke out and not only got good views of the woodsmen in the fight against the forest fire but also obtained "shots" of the work of a locomotive engine and water tank, used to check the flames. The name of The Shevlin-Hixon Company picture when completed will be "Pondosa Pine," bearing the sub titles "Shevlin Quality" and "Operations of The Shevlin-Hixon Company at Bend, Oregon."

### STOCK LEADS IN COUNT

(Wall Street Journal Financial Review)  
WASHINGTON, Aug. 1.—Exclusive of 1,726 contested ballots, Daniel F. Steck, democrat, is today leading his opponent, Senator Smith W. Brookhart, by 68 votes in the complete recount of 24 of Iowa's 100 precincts.

## Georgia Mayor and Female Cabinet

Mayor Robert M. Hull of Savannah, Ga., and his women's cabinet which he has invited to assist in the running of the city by suggestion. The women function in addition to the regular board of aldermen and can advise, but not legislate.

## Spots Fire In Forest Without Leaving Bed

Lookout's Glass House Demonstrates Advantages

Blaze Seen From Top of Black Butte Is Located In Privately Owned Green Ridge Timber

Demonstrating anew the advantage of living in glass houses, Mrs. Hazel McKinney, forest service lookout stationed on Black butte, dominant peak in the Metolius country, last night at 1:25 a. m. spotted a forest fire from her bed in the standard lookout station, more than 5,000 feet above sea level.

In commenting on the achievement of Mrs. McKinney last night, W. O. Harriman, assistant supervisor of the Deschutes national forest, explained that standard lookout towers are so constructed that fire observers can see all parts of their field, windows virtually encircling the structure. This method, Harriman further explains, differs markedly from the system of early days, when lookouts were stationed at springs or watering places, making several trips to the summit of their respective peaks daily to hunt for fires.

The blaze sighted by Mrs. McKinney from her bed last night is in privately owned timber in the Green ridge country, north of Black butte. That the fire should flare up at night is considered unusual. It is believed to have been started by the electric storm which passed over Central Oregon early last night, leaving a wake of fires which were being sighted by lookouts through the day. Two lightning caused fires were reported from the Edison ice cave country, west of Big river, this morning.

Because of the pall of smoke that is hanging over the Central Oregon forests today, lookouts are experiencing much difficulty in spotting fires. This smoke is believed to have been blown here from Western Oregon and from Washington.

## HEAVY RAINSTORM FLOODS FACTORIES

Four Inches Fall In Eighteen Hours In Detroit

(U. P. Leased Wire to The Bend Bulletin)  
DETROIT, Mich., Aug. 1.—Eighteen hours of continuous rainfall which at times reached almost cloud-burst proportions, placed the city on a near flood basis when it stopped early today.

Estimates of the damage done in this section range from \$1,000,000 to \$5,000,000. No lives have been reported lost. Five large automobile factories were either wholly or partly forced to close down, due to the influx of water; thousands of basements were filled with from three to six feet of water; several miles of street pavement was wrecked, while telegraph, telephone and transportation facilities were paralyzed.

At one place where a creek overflowed, a motorboat spun up and down a principal thoroughfare over lawns and through back yards, three quarters of a mile from the creek basin. The weather bureau stated more than four inches of rain fell during the storm.

Factories which were affected were Ford's Highland Park plant, Hudson, Chrysler, Continental and Packard motor companies.

### ONE DIES IN GUN FIGHT

(U. P. Leased Wire to The Bend Bulletin)  
HOUSTON, Texas, Aug. 1.—One man was killed and another seriously wounded today in a gun battle in the identification bureau at police station between officers and a negro. The negro, Ed Robinson, was killed. R. R. Riefel, identification expert, was wounded.

## LICENSE NO. 200,000 GOES TO BEND MAN

C. W. Nelson First Ever to Have It In Oregon

Automobile license No. 200,000, state of Oregon, was received here this week by C. W. Nelson, a resident of Bend.

This is the first time that the number 200,000 has ever been given out by the office of the secretary of the state. Licenses in Oregon never before having reached this number.

Prediction that the 200,000 mark would be reached soon in auto registration in Oregon was made this week by Joe Dunne, president of the Oregon State Motor association, when in Bend on a visit.

Nelson, proud owner of the license which is a notable mark in the history of automobile in Oregon, is an employe of The Shevlin-Hixon Company, living at 1945 Baltimore avenue.

### CHILE EXPECTS PERSHING

(U. P. Leased Wire to The Bend Bulletin)  
ARICA, Chile, Aug. 1.—General Pershing, who is to preside over the Tacna-Arica plebiscite, is due here tomorrow aboard the Rochester. He has sent his thanks for arrangements made for housing the American group.

## Women of County Will Finance Building at Fair

Plan Launched by Pioneers Club of Terrebonne to be Considered at Meeting Here On Wednesday

Plans for the erection of a women's building on the Deschutes county fair grounds at Redmond, to be constructed in time for this fall's fair, will in all probability definitely materialize at a meeting to be held in Bend Wednesday afternoon at 2 o'clock in the Elks' hall.

This information was obtained here today from Mrs. R. S. Dart, member of the Bend Civic league, in her announcement of the plans of women in the Central Oregon country to erect a combined rest room, greatly needed on the fair ground, and exposition building. The plan for the erection of a women's building was launched by the Ladies' Pioneer club of Terrebonne.

The meeting in Bend Wednesday is to be attended by women not only from Deschutes county, but also by women in the Powell Butte community of Crook county, and also by residents of Jefferson county who are interested in financing construction of a women's building on the Redmond fair grounds.

Since the county fair board has no money for the erection of the proposed building, women of Central Oregon are to finance the construction work. This work is to start about September 1, according to plans.

Such a building as the women propose to finance is greatly needed on the fair grounds, according to people who have attended the fair in past years.

Several Terrebonne women have recently visited Bend in the interest of the building, which, it is estimated, will take about \$650 to erect.

## Driver Struck by Bird, Cars Collide, Two Hurt

UMATILLA, Aug. 1.—Clarence Roemhild of Crane, Oregon, and G. M. O'Neill of Dayton, Idaho, are under the care of physicians here today, after a collision between a flying bird and an automobile driver. Roemhild was riding with Bernard Sager along the Columbia river highway Friday. Just as Sager, at the wheel, attempted to pass O'Neill's car, a flying bird struck him on the forehead blinding him momentarily and causing him to swerve into O'Neill's car, which overturned. Roemhild's back is seriously injured, and possibly some vertebrae are displaced. O'Neill has a broken nose, cuts and bruises.

## KLAMATH COURT FREES OFFICER PENDING TRIAL

Bond of \$1000 Required From McBride

LEVENS BAIL GIVEN

State Dry Chief, Indicted For Larceny, Regrets Filing of Charge

(U. P. Leased Wire to The Bend Bulletin)  
KLAMATH FALLS, Ore., Aug. 1.—Charged with malfeasance in office on an indictment returned by the grand jury, L. L. McBride, state prohibition officer, was released on bond of \$1,000 Friday evening. The specific count against McBride is failure to return to the court a warrant obtained for searching a house.

Bail of W. S. Levens, state prohibition commissioner, also indicted, was fixed at \$500, which was furnished by Klamath friends.

"I'm not worrying over the outcome," said Levens. "Why should I be? I'm not guilty of any violation. Of course, I'm sorry the indictment was returned. People throughout the state won't understand it."

Discussing the indictment against Levens, charged with larceny of a Luger gun from a Mexican suspected of bootlegging, Caleb Jones, retiring district attorney, said the law requires all property taken in such a raid to be turned over to the court.

"Levens said this town was the worst in the state," Jones said. "Maybe we can redeem ourselves by starting in and enforcing the law without discrimination between rich or poor, citizen or enforcement official."

### ALCOHOL KILLS BOY

(U. P. Leased Wire to The Bend Bulletin)  
ASTORIA, Ore., Aug. 1.—Frank Lampas, 35, local fisherman, was a victim of acute alcoholism here last night. He died as he was being carried into a ward at St. Mary's hospital here.

## Torrid Weather Finished With Snow In Texas Town

(U. P. Leased Wire to The Bend Bulletin)  
EL PASO, Texas, Aug. 1.—Torrid July weather went out here with a flurry of snow, climaxing a month of uncertain temperatures.

Although the mercury registered around 100 early in the week, overcoats were comfortable here last night. Intermittent flurries of snow fell during the afternoon, and the mountain ranges near the city were obscured at times by the low-lying snow clouds.

### FIRE LEVELS CANNERY

(U. P. Leased Wire to The Bend Bulletin)  
VANCOUVER, B. C., Aug. 1.—Damage estimated at \$220,000, partially covered by insurance, resulted from a fire today which completely wiped out the plant of the National Cannery company.

## \$600,000 IS TOO MUCH

Remember that next Thursday you do not get a chance to vote separately on the questions whether under existing conditions the city should acquire the water plant of the Bend Water, Light & Power Co. and whether it should go to the Tumalo for a new supply. You vote on one question only, whether Bend shall issue \$600,000 in water bonds.

We have pointed this out before and after reading Mr. Foley's advertisement in yesterday's paper we think it desirable to mention the fact again, for the impression one might otherwise have is that the opportunity will exist to vote on the two questions separately.

"Learned arguments have been advanced recently," Mr. Foley says, "purporting to give reasons why the city should not own the city water." We assume that the reference is to matter appearing in this space, and on that assumption point out that the "learned argument" has been more devoted to giving reasons why the \$600,000 in water bonds should not be voted than to the municipal ownership idea which is only a phase of the election.

On the question of issuing \$600,000 in water bonds the dollar mark, referred to by Mr. Foley, is one of the standards of measurement. He himself makes it one when in this advertisement he agrees that \$600,000 is too much to spend. THAT IS WHY THIS BOND ISSUE SHOULD BE VOTED DOWN. If it is authorized by the people you can be sure it will be spent.

Mr. Foley's company would like to sell its water system to the city. That is why so low a price has been placed on it. On the whole subject of voting \$600,000 in bonds Mr. Foley is plainly in doubt as his half hearted statement indicates. He has no idea that his company is going to risk the health of the community in order to make a profit on their water business. He is definitely opposed to spending \$600,000 for a water system and so, we believe, are a majority of his fellow citizens.

Mr. Foley points out that the spending of the bond issue, if voted, will be in the hands of a water board. Here again the people should have details of the plan. They should know who are to be members of the board and what the salaries are to be.

Do not be misled by talk about pure, cold Tumalo water. The city's own engineers say that the Tumalo is contaminated from the forest boundary down and the reservoir that they plan will mean that in the hot days of summer the water will not be cold.

## Relation With Mexico Better After Letter

(U. P. Leased Wire to The Bend Bulletin)

SWAMPSCOTT, Mass., Aug. 1.—James R. Sheffield, United States ambassador to Mexico, and his wife, paid a surprise call at the summer White House and discussed with President Coolidge the situation in Mexico, which was made acute by Secretary Kellogg's statement several weeks ago criticizing the Mexican government.

It was understood that Sheffield and the president came to the conclusion that the note has caused an improvement in the attitude of the Calles government.

Sheffield said he would return to Mexico shortly after September 1. The operation performed on him in New York last month was more serious than announced at that time. Sheffield said, adding that he was now well on the road to recovery. Sheffield left New York two weeks ago on a house boat and cruised along the coast, arriving at Marble Head yesterday.

## Fair, Hotter Weather, Sunspots Indicating

(U. P. Leased Wire to The Bend Bulletin)

SANTA CLARA, Cal., Aug. 1.—"Fair and warmer" weather for the Pacific coast this month is promised in the sunspot weather forecast issued here by Father Jerome Ricard, University of Santa Clara. Predictions include:

The Sierras and Rockies, including Arizona and the northwest, are due for rain August 5-6-7, with some clouds and possible sprinkles in parts of California.

A warm wave is due to develop from this, continuing August 8-9-10.

The northwest, Arizona and plateau sections are due for more rain and refreshing coolness August 11-15-16, with the whole coast experiencing alternate cool and warm waves August 17 to 22. Arizona may get another sprinkle August 29.

## COOLIDGE LIKES FURTHER SLASH IN TAX LEVIES

Madden Outlines Plans For Reduction

CLOSE TO BED ROCK

Little More Possible In Way of Economies After This Year, Is Believed

(U. P. Leased Wire to The Bend Bulletin)

SWAMPSCOTT, Mass., Aug. 1.—President Coolidge today is considering a new tax reduction plan, more drastic than any heretofore advanced. He approves most of the features of the plan which was laid before him by Representative Martin Madden, Illinois, chairman of the powerful house appropriations committee.

If the treasury tax experts say these rates will raise enough revenue to keep the government going the president will favor them.

With some details modified, it is probable that the administration's tax reduction bill will be this plan, to be known probably as the "Madden plan." Secretary of the Treasury Mellon has decided to keep away from the limelight in the tax discussion and Coolidge also wishes to avoid appearing in a dominating position, so the plan will not carry their names, it is believed.

Madden outlined the plan to President Coolidge at a conference at the summer White House yesterday and then left for Washington.

The plan would cut taxes down to \$350,000,000, Madden believes. He hopes through his committee to hold the government expenditures to \$3,100,000,000—or \$125,000,000 less than this year—but he and the president both have arrived at the conclusion that the expenses of government operation then will have been cut as far as they can be. Last year's appropriation reduction totaling \$375,000,000 and the \$800,000,000 slash of the year before have brought the government down to bed rock.

Under \$5,000 1 per Cent  
The other principal features of the "Madden plan" are:

Abolition of all federal estate and inheritance taxes.

Reducing the flat income tax rate on corporation from 12.5 to 10 per cent.

Making no change in the present personal exemption but decreasing the rate on the earners of smaller incomes. On incomes of less than \$5,000, Madden favors a one per cent normal tax in place of the present two per cent; on incomes between \$5,000 and \$8,000 he would cut the rate from four to three per cent; and on incomes above \$8,000 the normal rate would be cut from six to five per cent.

Elimination of all "nuisance taxes" including those on theaters, movies and club dues.

Enactment of a law providing that all government surpluses of \$50,000,000 or more at the end of the fiscal year should be rebated automatically to the secretary of the treasury to the income tax payers on a pro rata basis, instead of applying to paying off the principal of the public debt.

Adoption of a public building program of not more than \$25,000,000 a year.

## Chinese Credits His Gods With Saving Old Firetrap

(U. P. Leased Wire to The Bend Bulletin)

MARSHFIELD, Ore., Aug. 1.—The gods of Gow Why, Chinese grocer, saved the ancient structure of the Oriental from burning after sparks had set the roof afire. Gow told the fire chief that the gods of his ancient and honorable ancestors which grimace in his chapel insured his building against fire, tidal wave or earthquake. After the fire department had extinguished the blaze, Gow gave his gods credit for the act. Despite Gow's celestial insurance, fire officials are planning steps to have the building razed, as it has been condemned many times as a fire hazard.

## Portland Man Is Elected Grand Sachem of Redmen

(U. P. Leased Wire to The Bend Bulletin)

PORTLAND, Aug. 1.—Dr. F. O. Lehman of Portland was elected grand sachem of the Improved Order of Redmen and other officers were chosen when delegates to the two day annual state convention met this morning at Redmen hall here.

## CITY WATER BOARD PROVIDED, STATED

Mayor Fox Gives Statement Bearing On Bond Issue

In a written statement issued this afternoon Mayor R. H. Fox pointed out that in the case of local municipal ownership of a water system, administration of the system and its funds would be under the control of a water board.

He quoted from the city charter as follows:

"The income of such plant and the operation, maintenance, extension and improvement thereof, after said plant shall be so far completed as to be ready for operation, shall be in the hands and control of a commission to be known as the Bend water board, which shall be composed of not less than three freeholders of the city of Bend, whose salary, duties, term of office and appointment shall be fixed by the common council of the city by ordinance at or before the time when said plant is ready for operation. Said water board shall have entire control of all water funds and the disbursement thereof, and shall so keep the same as at all times to show the true cost of said system, its extension and yearly operation, the amount of outstanding water bonds and current bills, and the disposition of the revenues of said system, and shall make annual reports to the common council of the same and such other reports as may be called for by said common council. The members of said water board shall each give a bond to the city of Bend in such sum as the council shall determine for the faithful performance of their duties and the accounting of all monies that shall come into their hands by virtue of said office, the premium on said bond to be paid by the city of Bend."

Mayor Fox added: "As soon as the people of Bend have voted to own their own water system I will, in accordance with the above charter provision, appoint a water board consisting of eight citizens, one from each voting precinct in the city.

"I urgently request the citizens of their respective precincts to recommend a worthy and competent person for appointment."

## Expert From College Inspects Spud Fields

Work of inspecting potato fields in Deschutes county prior to seed certification was being completed this afternoon by E. R. Jackman, farm crops specialist of the O. A. C. extension service. Jackman, accompanied by W. T. McDonald, county agriculturist, was in Bend this morning.

Potato growers in Deschutes county whose fields are being inspected by Jackman are Phil Schmidt, E. M. Ely, James Underwood, H. J. Chonowith, W. C. Warner, J. W. Schrank, E. Allen, B. L. Trammell, R. L. Moore, Claude Mallory, S. W. Gould, Rasmus Peterson, A. J. Gonnason, W. C. Hudson, G. S. McCartney, J. A. Melvin, F. P. Reynolds, P. C. Burt and F. A. Schaefer.

Jackman came to Deschutes county this week from Crook county, where he inspected a number of fields. From Bend, Jackman and McDonald left today for the P. C. Burt farm.
