## Fear Encroachments of Nazi Germany

### Strengthen Empire Fences As Hitler's Drive Stirs Fears

Europe's next big headache will come from colonial conflicts, and the powers already are busy strengthening their imperial fences.

Germany, having fought its way back from the World War defeat, has kept alive the question of return of colonial possessions lost at Versailles. But Adolf Hitler has chiefly used the colonial issue as a weapon held in the background to further other immediate aims such as the dismemberment of Czechoslovakia.

Now many European observers believe the Fuehrer will turn toward restoration of the pre-war German colonies as his next step in building up the third reich as a great world power.

Under the Versailles treaty, Germany ceded all of its colonies to the various allied powers, which in Africa alone gained a total of 18,000 German population and more than 12,000,000 natives by the deal. German losses included:

**Africa**  
—The Cameroons to Great Britain.  
—Togoland to Great Britain.  
—Southwest Africa to the Union of South Africa.  
—East Africa to Britain and Belgium.  
—Far East  
—The Marshall Islands and Shantung to Japan.  
—Samoa to New Zealand.  
—New Guinea to Australia.  
—Nauru Island to Britain.

In connection with Germany's return to "a place in the sun," Hitler has talked about colonies chiefly in order to back up his demands in Europe. His desire to dominate central Europe and make Germany powerful on the continent—perhaps for an eventual clash with Russia—has overshadowed his interest in colonies.

# Four Sets of Twins Their Record

Mr. and Mrs. Oliver Bates of Los Angeles lay claim to some sort of a new record when Mrs. Bates gave birth to her fourth set of twins in a Huntington Park hospital. Left to right: Lloyd Bates, 9; Lorraine and Loreene, 12; Nurse Luva Vorhees; Mr. Bates; Betty and Byron; Mrs. Katherine Bates with twins No. 4; Martha Jean and Mary Jane.

ies, which at present might hinder the third reich more than they would help.

But if the Fuehrer does turn next toward a colonial settlement, he will find that other European powers have been busy in that field.

France has a vast colonial empire totaling 4,500,000 square miles and with a population of 60,100,000 stretching from Africa to Asia to America. It has been quietly at work on precautions against future dangers.

Two main objectives have been sought: First, to integrate the colonies more thoroughly into the French system; and second, to strengthen the military defenses of the empire.

Gen. Jules Buhner has been made chief of the colonial general staff and the minister of colonies has been admitted to the supreme national defense council for the first time.

Buhner became a member of the superior war council and the entire colonial defense system was reorganized.

Recruiting has been carried on for the colonial armed forces, with the object of putting a possible 50,000 more men under arms in Africa and

equal number flew from Djibuti, where they landed from steamships to the Ethiopian capital. Italy has been boycotting the French-owned railroad from Djibuti to Addis Ababa and doing most of its heavy hauling by truck.

Italian pacification of Ethiopia has not been as simple as reports published abroad would indicate. The natives in the Goujam region have been in armed rebellion for some time, and it is estimated that 20,000 of them are engaged in guerrilla fighting. The natives conceal their weapons and go about their work during the day and hours. At night they snipe at Italians.

While separating the evening milk, the threads on the tightening ring of the separator gave way, letting the top of the bowl fly off and the 27 discs whirl out. Robert received a quite badly cut right arm which necessitated several stitches and the separator was badly wrecked.

A small crowd attended Sorosis Wednesday at the home of Mrs. Bert Allison. The next meeting will be Monday after the frost Sunday evening that all the growers had been wanting to mature the potatoes. Several growers, Harold Lister, Lester Stephens and L. Parrish, dug and shipped last week, but the bulk of the crop is still in the ground. "Another employer, who has been paying many of his 6,000 workers 22 cents an hour, has threatened to shut down rather than boost the wages of these employees to 25 cents an hour. Still another would call every worker over 40 years of age 'handicapped' and continue to pay him a sub-standard wage.

"Some plants have been running in capacity for weeks to build up inventories preparatory to a shut-down which would be blamed on the fair labor standards act. Several shut-downs which have been attributed to the act have in fact resulted from the completion of seasonal operations."

"These delinquents, whose number and importance are magnified by their isolation, resort to subterfuge in an effort to camouflage their selfishness and blame the fair labor standards act for their own antisocial conduct.

"For example, certain members of this selfish KKK minority group have announced that they will close their plants Monday because of what they call their inability to comply with the wage and hour provision of the act.
