

NEW FIGHTING PLANE BUILT

British Seek to Best German Ship

German Messerschmitt Has Top Speed of 370 Miles Per Hour

By Leon Kay
(United Press Staff Correspondent)
London, Dec. 21 (AP)—Great Britain is rushing production of a new type of fighting plane to combat the two-seater Messerschmitts which the Germans used in a big five-hour air fight over Helgoland bay Monday. It was reported today.

Faster and more powerful than the crack Hurricanes and Spitfires of the royal air force, the new plane already has been tested and has been put into full production, it was said. According to information so far made available, it is a Bolton-Paul all metal two-seater, with a multi-gun turret mounted behind the pilot's cockpit. It has a 39.5 foot wing-spread, its fuselage length is 39 feet and it has a 1,600-horsepower motor.

A second new model, the Blackburn Roc, is destined to play an important work in the naval aviation corps. The test model of this plane, a fleet fighter, was completed several months ago.

Germany used in the Helgoland bay fight its new Messerschmitt 110 two-motored fighters, reported to have a top speed of 370 miles an hour, mounting two small cannon and four machine guns forward and two movable machine guns in the rear.

British experts now assert with more firmness that Britain holds air supremacy. They say that the use of the new Messerschmitts to combat British North sea patrols was a sign of weakness. It is asserted that the British planes engaged in the Helgoland fight shot down at least 12 of 24 super-Messerschmitts sent against them.

Cattle Brands Must Be Recorded in 1940

Salon, Ore., Dec. 21 (AP)—A new cattle brand law requires the re-recording of all brands in the state between Jan. 1 and June 1 of 1940. Dr. W. H. Lytle, chief of the division of animal industry, explained.

Under the law, brands not re-recorded will be available for use. It also states that the validity of brands will terminate at the end of each ten-year period unless renewed. The 1940 re-registration will be the first under the new statute.

Redmond Directory Is Being Compiled

Redmond, Dec. 21—Compilation of a city directory for Redmond, now under way here under the direction of H. J. Kelley, is being used as an opportunity to take a census of the town and will also include contributory residential areas which lie just outside the city limits, Kelley said today.

Kelley is making a complete door-to-door census, ascertaining the names and occupations of husband and wife at each house, names and ages of children, names of other residents of the house, and post office box number where the residents are living in rented property. The work is now nearly half finished, he said, and is expected to be complete by about January 10. Three or four hundred books will be printed.

The completed volume is expected to answer a question much discussed here, namely, just how big is Redmond.
