Food Forecasts For Year Made

Washington, Dec. 30 (AP)—The agriculture department today presented the following forecast on individual food items for the first three months of 1945.

Meat—supplies reduced because stocks are low, and production will decline 10 to 12 per cent. Pork will be particularly short but better grade beef may be more plentiful.

Potatoes—a spring famine may be in the making with an 18 per cent smaller crop, increased military requirements, and early inroads on supplies.

Butter—"significantly" smaller supplies reflecting a production rate 11 per cent below the same period a year ago.

Poultry—declining supplies because reduced output and sharply increased military procurement.

Milk—somewhat more plentiful than a year ago when there was talk of rationing. Cream will fall far short of demand but more American and cottage cheese is in prospect.

Eggs Abundant
Eggs—abundant supplies to assure consumption at record levels.

Canned vegetables—somewhat less than was available from last year's pack because of larger military needs, small carry-over supplies and heavy consumption at record levels.

Canned vegetables—somewhat less than was available from last year's pack because of larger military needs, small carry-over supplies and heavy consumption during the early part of the pack year. Fresh vegetables will be less plentiful because of a 16 per cent drop in production.

Canned fruits—will be even scarcer than last year but supplies of fresh and frozen fruits may be larger.
