

Railroad Shares Bolster Market

By Elmer C. Walzer
(United Press Financial Editor)
New York, Jan. 24 (UP)—Renewed interest in railroad shares lifted the general list of stocks fractions to around a point today after a small early decline. Trading was light.

Wall street viewed the pickup in demand for railroad stocks as an indication that recent heavy selling in that group may have been overdone. The undertone of the market, moreover, in the five previous sessions of decline had been such that any concentrated buying in any group of leaders would have provided the necessary stimulus for a fair recovery, analysts said.

During every one of the previous five sessions when prices were down on the average, good selective buying had been evident among the "peace" stocks and traders believed there was just too much loose money around seeking someplace to go to permit too extended a decline in stock prices.
