WAX ON THE TOES

Waxing heels and toes of stockings with a bit of candle wax is routine hose economy long ago in wooden-shoe lands of Europe, and it is a practical way to meet stocking problems today.

Tests showed the simplest and most effective method is merely rubbing a piece of candle wax or paraffin on heels and toes before each wearing. Even if the waxing is not repeated until after several launderings, enough wax remains to make stocking feet durable.

If only a thin film of wax is applied, it will not interfere with the proper laundering of the stockings or change their appearance.

Over 22,000 new oil wells were drilled during 1944 in the United States.
