BUDGET LAW CHANGES

Since the amended budget law carried the emergency clause it became effective last week when signed by Governor Snell. Budgets for the next fiscal year beginning July 1 are therefore to be made in accordance with its provisions. Perhaps it will be of interest both to budgeteers and the tax paying public to have pointed out some of the changes in the law as it now stands.

With respect to the publication of estimates the most important change is as to the figures with which comparisons can be made. Thus, where formerly the law required the publication of the figures of expenditure for three years previous and the budget estimates for six months of the current year the new law calls for a showing of the expenditures for two years only and the budget allowances for the current year. This seems to us to be a desirable change. Cost of publication should be reduced while the figures to be given should be ample for the purposes of comparison. The re-enactment of section wipes out the amendment adopted two years ago and rejected by the supreme court. The ill-advised effort of the league of Oregon cities to cut down on the information to be given the public through published budgets is also rebuked.

A change, suggested without doubt by the time lag be-tween the beginning of the fiscal year or budget period (July 1) and the first tax collection date (November 15), is that allowing the retention of unexpended balances up to 10 per cent of the total estimates for the coming year as a working balance. Hitherto such balances were set off in full against

the proposed expenditures.

The provision of the former law that has made trouble hereabouts in the past—that no municipal corporation officer could serve on a budget committee—has been amended. The prohibition is now against service by an officer or employee of the corporation for which the budget is being made. A new feature is a provision by which budget committee members shall be named, after a rotation routine has been established, for three years. The thought here is, of course, to retain the services of experienced committee men. We discussed the sub-ject in this column some months ago. Still another new provision in the law is the requirement

Washington, March 27 (10)—As a patron, by mistake, of a steak-easy, I think I can tell the OPA and congress something about the black market in meat.

A couple of well-heefed citizens from New York invited me to dinner last night. They said they knew a good place.

We got in a taxi, drove to a hamburger stand about 12 blocks

"You want something special in the way of steak?" the shirt sleeved proprietor asked. We said we did. He walked into his oversized refrigerator, and came out with three of the most magnificent tenderloin steaks you ever saw. They were two inches thick, dark red, perfect.

He broiled 'em to order and while we waited we nibbled shrimp and drank beer.

Bend Lieutenants Meet in Pacific

The story of how two former guards in the Deschutes national forest, each of whom is how a lieutenant (ig) in the navy, met in the south Pacific, was told in a letter received today by members of the forest staff here. The letter was from Lt. Bob Hudson, who told of meeting Lt. Art Jurin while both were engaged in landing operations.

Lt. Hudson said that he had participated in the landings on Luzon, and that his craft had taken the famed First cavalry into the invasion of that island.
