

Stock Market in Irregular Vein

By Elmer C. Walzer (United Press Financial Editor) New York, April 20 (UP)—Stocks opened and closed on a note of irregularity. A rally sandwiched between these periods lifted all averages and sent the utility average to a new high since July 31, 1937.

When the opening irregularity failed to bring in new selling, the list rose easily but the recovery lacked support of volume and when week-end evening-up operations developed late in the day the market was unable to absorb selling. Prices drifted down from the best levels of the day, and many leaders finished at losses.

Volume Is Noted Leading railroad stocks furnished a relatively large volume. They headed the midday recovery with Santa Fe making a new high at 98, up two points. Nickel Plate, Pere Marquette, and Allegheny Corporation issues had wide gains—one to six points, the later in Pere Marquette Prior preferred. Santa Fe subsequently lost most of its rise and the high grades slipped back, some to net losses. Heaviest trading of the group centered on New York Central and Chicago North Western certificates.

Matches have been made with a non-poisonous sesquioxide of phosphorus since 1911, when the formula was discovered by William A. Fairburn and made available to match manufacturers; poisonous phosphorus had been used previously.

Time to Change "Underwear"

No one wears "longies" in hot weather. You don't drink hot beverages in the summer. You eat lighter foods. Well—your car needs a different grade of oil for hot weather driving. So turn into our driveway and let us do a thorough, clean job for you before you demand a summer workout from your car.
