

ling Pressure on Market

By Elmer C. Walzer (United Press Financial Editor) New York, May 10 (UP)—Selling pressure increased on the stock market today. Prices had their first break since March 26, on a record volume.

Two reasons stood out for the selling. The top one was the inflation as expressed by secretary of the treasury that the administration will fight any proposals for general tax relief at the present time. The second, losing in favor, was that the market was entitled to a drop at this time to consolidate the recent gains.

Added to these were rumors of a Japanese attack on the Philippines. The market was held up long now that Germany was out of the conflict. The market was said to be responsive for weakness in the rail issues where losses ranged more than 2 points. Steels were depressed substantially in early highs. Aircrafts, however, ran counter to the trend with gains running to nearly 2 points in Douglas.
