# Army Removing Secrecy From Newer Weapons By Fred Scherff (United Press Staff Correspondent) Fort Myer, Va. (19 — The army has removed the wraps of secrecy from more than a score of its mine can be detonated simply by dialing its code number, much as one uses a dial telephone. The controlling radio has a range of eight miles on land and 20 at sea. A new radar aiming device of anti-aircraft guns is in the final stages of development. It tracks the course of a plane, aims and fires the battery automatically. Another radar unit has been designed to keep searchlights focused on enemy planes. This is a portable device, weighing only one ton. Also exhibited was a new sound

Topping the list were an im-proved, high-velocity 90-mm. gun and an aluminum pontoon bridge, and an aluminum pontoon bridge, both designed primarily for use with the new Gen. Pershing tank, a 10-inch mortar described as the "world's biggest," various automatic weapons with increased fire-power, a radio-controlled mine, several radar detection devices, and sound equipment to locate enemy small arms fire.

Most of the items at the exhibit were listed by the war denait.

vices, and sound equipment to locate enemy small arms fire.

Most of the items at the exhibit were listed by the war department as secret. Many had not been put into mass production yet and very few sent to overseas battle a reas. Reporters were therefore amazed when they were told by Gen. Brehon Somervell, commander of the armed service forces, that they could write about them without restriction.

New 90-mm. Gun Ready
The new 90-mm. gun has the terrific muzzle velocity of 3,750 feet per second, 500 feet more than the 90-mm. now in use against the Germans. This gives the projectile power enough to pierce 14 inches of armor plate at 300 yards, or knock out one of the yaunted German Tiger tanks at 11,000 yards. The top range of the yaunted German Tiger tanks at 11,000 yards. Its main differences from the older model 90-mm, are that it is longer and has a heavier expellent charge. It will soon be in use overseas, an official said.

The first of the aluminum pontoon bridges designed to carry loads up to 50 tons are now enroute abroad. They feature 60 foot pontoons and a roadway more than 12 feet wide to accommodate the Pershing tanks, which are broader than the Gen. Shermans. In tests, the bridge has been thrown across waterways at a rate of 900 feet in 8 hours.

The pontoons can be broken down into two parts for easier transportation. The deck planks, the pontoons can be broken to more than the commander of District 12. Prineville; and Fred B. Corn, department quartermaster from the color of the commander of District 12. Prineville; and Fred B. Corn, department quartermaster from the color of the parts of the variety of the veterans of the variety was announced here to day. Decision to organize the auxiliary was announced here to day. The post of the newtyling the auxiliary was announced here to day. The post of the newtyling the auxiliary was announced after the auxiliary was reached after the formal institution of the newtyling the auxiliary was reached after the formal institution of the newtyling the auxiliar

The pontoons can be broken down into two parts for easier transportation. The deck planks, also of aluminum, are hollow so they will float if dropped overboard.

Mortar Shoots 250 Lbs.

The 10-inch mortar is a huge weapon, standing about 15 feet high, which can lob 250 pounds of steel and explosives 9,600 yards. It has a built-in crane to carry the projectile to the muzzle.

yards. It has a built-in crane to carry the projectile to the muzzie of the mortar and drop it in. The mortar is now being placed in mass production.

The automatic weapons designed to lay down a heavier fire than ever before included a 20 mm. cannon for use in aircraft and a 50-caliber machine gun. The rate of fire of the cannon has been increased from 650 to 850 rounds a minute while the machine gun can now fire 1,200 shots instead of 750 in the same amount duty, but were even awarded duty, but were even awarded duty. instead of 750 in the same amount

Notice of Timber Sale NEW TURKEY PORT OPENS forms provided therefor, marked Ankara (17) — The new port of Iskenderun, built by British firms, Unit" and addressed to the Super-Intendent, Warm Springs Agency, Warm Springs, Oregon, will be reopened. The formal opening followed inauguration of the use of a second road between Mersen Olukishla.

40,000,000 TRUCK TIRES Akron, O. (19)—Since Pearl Harbor, America's rubber industry has produced 40,000,600 heavy light selection method of 75,000, duty truck tires—an astonishing 000 board feet, log scale, of pon-

record considering the fact that

derose pine, sugar pine, and western white pine, of which pondersos pine is more than 99 percent of the total. In addition to the pines, the unit contains about 46, 50,0000 board feet of Douglas fir, larch, cedar, and other species but these will not be cut except as necessary in clearing roads, construction of bridges, camps and other logging development purposes. All timber of these species cut prior to March 31, 1946, will be paid for at two dollars per thousand feet B.M. Scribner Dedimal C Log Scale. Each bid must state the price per thousand feet, Scribner Decimal D Log Scale that will be paid for ponderosa pine, sugar pine, and western white pine timber that will be cut and scaled prior to March 31, 1946. Prices subsequent to that date are to be fixed by the Secretary of Interior in accordance with the procedure described in the contract. No bid of less than five dollars and twenty-five cents per thousand feet B.M. for the ponderosa pine, sugar pine, and western white pine will be considered Bids will be limited to the maximum prices allowed by the Office of Price Administration under its "Maximum Price Regulation 460-Western Timber" which became effective as of August 31, 1943. This regulation is on file in the Office of the Superintendent, Warm Springs Agency, Warm Springs, Oregon, and is available for review. Each bid must be accompanied by a certified check on a solvent bank in the amount of \$20,000.00 payable to the Superintendent, Warm Springs Agency, Oregon. The deposit will be returned to unsuccessful bidder, or retained as liquidated damages if the bidder shall not execute the contract and furnish satisfactory bond for \$20,000.00 within sixty days of notice of acceptance of bid. The right to waive technical defects and to re-

ject any and all bids is reserved. derose pine, sugar pine, and western white pine, of which ponder- If more than one bidder subits the If more than one bidder subits the maximum bid allowable under O. P.A. regulation 460, the contract may be awarded to the bidder most in need of timber for the continued production of lumber for war purposes. This sale is being made for the purpose of preventing serious losses from beetle attack and the contract will require the payment of cash penalties for failure to comply with minimum cutting requirements osa pine is more than 99 percent quire the payment of cash penarties for failure to comply with minimum cutting requirements except when relieved therefrom by the officer approving the contract. The contract will specify that all designated timber shall be cut and removed from the unit prior to April 1, 1954. It will be necessary for the successful bidder to transport logs and equipment to and from the Whitewater logging Unit across National Fores lands. All bidders should contact the Forest Supervisor. Deschutes National Forest, Bend, Oregon in regard to access road construction requirements. For copies of the contract, regulations, map of the sale area, blanks for submission of bids, and other information, apply to the Superintendent Warm Springs, Oregon, Dated this 1st day of May 1945. Oscar L. Chapman, Assistant Secretary of Interior. 139-145-150-2-8-14c
