

Railroad Shares Lead Recovery

By Elmer C. Walzer
(United Press Financial Editor)

New York, June 1 (UP)—Railroad shares led a broad recovery on the stock market today after further ease in early trading. Volume increased late in the day. Gains in the rails ranged to more than two points in some of the inactive issues. Canadian Pacific led the whole list in turnover and made a new high. Several other carriers made highs bringing the average to within striking distance of the eight-year peak made a few days ago.

Demand for the railroads reflected favorable earnings reports. Traders brought the group after a recent setback which did not progress as far as many had anticipated. Railroad equipment issues rose with the rails. American Locomotive made a new high.
