

# Steel Leads Mart Following Decline

By T. W. Kienlen  
(United Press Staff Correspondent)  
New York, June 4 (UP)—Demand for steel shares turned the stock market irregularly higher today after an initial decline.

Wall street quarters attributed the rise in steel shares to circulation of an investment council's prediction of "excellent" future domestic and foreign demand for steel tonnage.

General bullishness reflected a number of favorable news developments, including the decision of the United States supreme court upholding the right of stockholders to challenge orders of the securities and exchange commission affecting their companies.

Utilities, the largest group of listed companies subject to SEC orders, rose to a new peak since March 31, 1937, on gains ranging to more than two points in such issues as Columbia Gas and Electric preferred and Consumers Power preferred.

# Two Bend Sailors Back From Pacific

Two veterans of the Pacific war who were employed in the same plant in Bend returned, by chance, to this city over the week-end, on leaves from the United States navy. They are Kenneth Munkers, radar man third class, and Robert F. Iler, electrician's mate, second class. Before entering the armed services, they were employed at the Associated service station on Wall street, as assistants of Cecil Goodfellow.

# ELEPHANTS WATCH CLOCK

Rolla, Mo. (UP)—Lt. Col. Morris Suhre, just back from building roads and airfields in the flatlands of Assam, India, believes that elephants have the most effective trade union in the world. The colonel said no matter how hard he tried, he couldn't get an elephant to work more than four hours a day.
