

Stocks In Rally; Up 1 To 5 Points

By Elmer C. Walzer
(United Press Financial Editor)

New York, Feb. 21 (UP)—Stocks rallied 1 to 5 points today after three sessions of sharp decline had knocked 10 points off the industrial average.

Today's rally was ascribed to an improved technical position and to indications of a fight ahead to crack the wage-price policy for a more generous distribution of price increases. Also aiding were the declaration of the regular quarterly dividend of \$2.25 a share by American Telephone & Telegraph company; resumption of dividends by Homestake mining, and the usual \$1.50 dividend by Union Pacific.

Shorts covered in many instances on the belief that something bullish might develop over the long market holiday ahead. The market closes tonight for the week—reopening next Monday. Banks will close for Washington's birthday tomorrow, but reopen on Saturday.
