

Hughes Most Sought After By Glamor Girls

New York, March 21 (UP)—Who's the most sought after date a girl could have?

Take it from the Broadway experts, it's Howard Hughes. He drives beautiful and glamorous girls around in battered jalopies. He wears tennis shoes in night clubs. He frequently needs a hair cut and his clothes usually can stand a pressing. Many a girl has sat for an hour in a restaurant with him without a word of conversation being exchanged.

He's worth \$145,000,000 but he doesn't scatter diamond-studded trinkets, or glossy furs. In fact, he gives his girl friends very little but his company. But Broadway thinks the motion picture academy ought to award him a special oscar as the film colony's outstanding escort. At one time or another his name has been linked with that of:

Billie Dove (one of the most beautiful of silent screen stars), Ida Lupino, Marian Marsh, Katherine Hepburn, Ginger Rogers, Nancy Carroll, June Collyer, Patricia Wilder, Mary Maguire, Wendy Barrie, Rochelle Hudson, Frances Drake, Linda Darnell, Ava Gardner, Lana Turner and dozens more.

Hughes' unorthodox technique, often discussed in the night clubs and restaurants of the big street, does not even include the romantic approach. Usually when a girl catches his expert eye he assigns one of his associates to telephone her and ask for a date. Sometimes the girl says no, but more often she is waiting at the appointed hour. And she generally keeps waiting because Hughes is likely to show up late, casually passing off the tardiness as due to business.

Reds, Argentina View Wheat Pact

Washington, March 21 (UP)—Russia and Argentina watched from the sidelines Saturday as some 40 nations put the finishing touches to a wheat pact that would shut off these two nations from half of the world's market.

Exporting and importing nations were able to reach agreement on terms yesterday only by freezing the soviet out of the negotiations, after Russia refused to compromise her demands.

The pact, scheduled to be signed early next week, would assure the other three major wheat exporters — Canada, United States and Australia — a minimum market for about 450,000,000 bushels a year for the next four years.

France and Uruguay, minor exporters, will be given small shares in the export quota. Acting conference chairman J. C. Van Esche of Belgium indicated the U. S. share of the market probably would be about 165,000,000 bushels a year, or about one-third of its present export rate.
