Members of Mrs. George Simerville's adult extension class in sociology left today for Salem, on a field trip in connection with their studies. In and near the

James P. Jensen, 76, Dies in Bend

James Peter Jensen, 76, died last night at the home of one of his three sons, Clarence J. Jensen, of 34 Marshall, where he had lived for several years. Funeral services will be held Saturday at 3:30 p. m. from the Niswonger-Winslow chapel, with Rev. Carsten F. Brien, of First Lutheran church, officiating.

Mr. Jensen was born August 13, 1872, in Denmark. He became an American citizen in 1893, in Iowa. In 1900 he was married to Anna Christina Neilsen, who preceded him in death in 1922. He lived in Iowa until 1910, when he moved to Idaho. In 1923 he came to Bend and was employed by Brooks-Scanlon, Inc., and The Shevlin-Hixon company until 10 years ago, when failing health forced him to retire. Since then he had made his home with his son.

His three sons are James P., Walter T. and Ivan F., all of Bend. He also leaves one daughter, Loretta Moser, of Gladstone; one granddaughter and one great-granddaughter.

SPEAKER NAMED

Gilchrist, May 13 (Special) — Principal Raymond Oehlerich announced today that Dr. Gordon A. Sabine, professor of journalism at the University of Oregon, will deliver the commencement address May 27 at 8 p. m. in the Gilchrist high school gymnasium.

Baccalaureate services for the class of 1949 will be conducted in the gymnasium Sunday evening, May 22, by Rev. K. A. Tobias, of Eugene.

Liberty Held Threatened by Material Aims

Wilfred Wellock, lecturer, traveler and authority on world events, told a capacity crowd last night at First Christian church that the spiritual implications of liberty have no meaning for the "mass man" who, he said, is forced into materialism by the workings of a society which makes him function merely as a machine, and not as a human being.

"Instead of democracy spreading it has receded while culture wanes and the quality of life falls even in the countries which boast of their advanced civilization," he charged. In order to restore some of the precious values which existed in the pre-industrial area, communities must create small social units, integrate agriculture to industry in these units and develop new industrial techniques that will enable industry to be on a small scale as far as possible, he said.

Developments Outlined
Outlining economic developments since the end of the first world war, the speaker said that in 1914 the outlook appeared to promise the production and spread of abundance and security against want; of education and culture and of democracy to the ends of the earth. The promise was not fulfilled, he said, and "after 35 years of perpetual crisis, we are haunted with a fear of the future."

In the last four years, he said, Britain and the United States have had a monopoly of the world's markets and now, as a result of increased industrialism that came with war-time production, they are encountering a reluctance to buy, and thus a shrinking of world markets. "Before long it will suddenly be realized that the world's machine productive power is far greater than its spending power and that a major economic breakdown is inevitable unless fundamental changes in economic policy are undertaken, he warned.

Too Much Speculation
The policy of the industrial revolution, he continued, was that of capturing markets by means of perpetually cheapening commodities. This meant more and more speculation, with workers being robbed, little by little, of personal responsibility, creative opportunity and vital social or community contracts.

To find a way of escape from the insensate struggle for world markets, Wellock suggested that the right of every country to a reasonably balanced economy, and the logical and inevitable consequences of that right, must be accepted. This will cut down the area of world trade to dimensions which will remove the strains and stresses that cause war. There would still remain a wide field of trade, but it would be an exchange of surpluses in things which the various countries produce or grow themselves. Friction would be non-existent in this restricted field, he said.

Wellock came to Bend under auspices of the American Friends Service committee. He was sponsored here by the Bend Ministerial association, with Mrs. George Simerville, a member of the Oregon commission for UNESCO, assisting with arrangements.

Water Survey

mately half way to Bend, and at the Bend plant of the Pacific Power & Light company.

Too Much Dilution
Sampling was continued for three days and then discontinued after it was impossible to detect any further return of dye because of the extreme dilution.

By these tests it was determined that about 80 per cent of the water leaving Deschutes river at the time via "Lost river" was not returned to the river proper above Bend and was, therefore, not available for irrigation.

Approval for use of the dye was given by the Oregon state engineer, and the Oregon state game commission made no objections. Before the dye was used it was determined that it would not harm the water supply of those dependent upon river water for domestic and livestock use. The dye was found not to be injurious to fish. Assurance was also given the bureau by the University of Colorado medical school and the Oregon state board of health that the dye used in small quantities was nontoxic to humans.

Check Underground Streams
The bureau also hopes to make a study of the underground streams in the Bend vicinity. Reports have been made that septic tank operations have uncovered underground streams in the residential area. Taylor said that if such findings, when made, were reported immediately to the bureau so that a technician could make an examination, much could be learned about the underground water conditions here. It would be helpful also, Taylor added, if persons drilling in the vicinity would report the types of formations they come across in their operations.

Oregon Still Has Teacher Shortage

Salem, May 13 (U) — Another teacher shortage faces Oregon schools, says Dr. Louis Kaplan, director of teacher training at Oregon College of Education at Monmouth.

Dr. Kaplan told the Salem Lions club Thursday that Oregon pub-

lic schools will need an estimated 1,000 new teachers this fall, but the state's educational colleges will graduate about 300 new teachers this spring.

Dr. Kaplan observed that Oregon has 1,500 teachers under emergency certificate, covering those with less than the required training for teachers. He said continued employment of "emergency teachers" is responsible for

some of the current criticism of results of Oregon's educational system.

MR. BATSON HASN'T EVEN LEFT HIS ROOM FOR MEALS, WHO SHALL I SAY... NEVER MIND CALLING HIM, JUST GIVE ME HIS ROOM NUMBER.

MEANWHILE, IN JEAN POND'S HOME... IN THE OLD DAYS WHEN JIGGER JACKSON OWNED THIS PLACE, MRS. POND, A LOT OF SQUARES VILLED THEIR HEADS OFF IN THIS ROOM, BUT NOBODY EVER HEARD THEM! JIGGER DID A NICE JOB OF SOUND-PROOFING.

COME TO THE POINT, MR. CHANNEL. JUST WHAT DO YOU WANT?

DON'T GET UP A HEAD OF STEAM, DO AS I SAY AND NOBODY GETS HURT. NOW SIT DOWN!
