

Threat of Coal Strike Watched By Government

Washington, June 21 (AP)—The government will maintain a "hands off" policy, at least until the week end, on the threatened nationwide soft coal strike, federal labor experts indicated today.

Officials said the federal mediation and conciliation service is keeping close tabs on the mine contract talks.

They said, however, that no federal action will be taken until negotiations between the United Mine Workers union and the soft coal operators take a "definite turn"—either toward a new contract settlement or a strike. The soft coal contract expires June 30—nine days from now.

Will Open Talks

John L. Lewis, mine workers president, will open talks with northern and western commercial coal operators tomorrow at White Sulphur Springs, W. Va. He will resume negotiations with the United States Steel Corp. on Thursday.

Lewis has not yet made any specific contract demands on the coal industry. But it is believed he eventually will ask for a shorter work week, an increase in industry payments to the union's health, welfare and retirement fund and, possibly, a wage increase.

Meanwhile, the soft coal miners were back on the job almost 100 per cent after a week's strike called by Lewis to "stabilize the industry." They will quit work again Saturday, however, for their annual 10-day vacation.

Bend Radio Men Assist in Test

Two Bend radio "hams," Carl Austin and Roy Michel, maintained a 24 hour watch on the national emergency circuit Saturday and Sunday in conjunction with a nation-wide test conducted by the Amateur Radio Emergency Corp.

During that time the two-man team handled 78 messages with "ham" operators as far east as South Dakota and as far west as the Hawaiian Islands. All equipment used in the test was of emergency nature. Transmitters and receivers used by the Bend operators were powered by a small gasoline motor-generator. Operators in the Hawaiian Islands, Canada, South Dakota, and California were all reached with a 40-watt transmitter.

Equipment was stationed in the Deschutes county courthouse during the period of the test.

The AEC made it clear that its statement was "in response to press inquiries."

"The AEC and the carbide and Carbon Chemicals Corp., the operating company at Oak Ridge, stated that no a-bomb uranium is lost at Oak Ridge, as has been reported in press dispatches," the statement said.

The atomic energy commission today flatly denied that any uranium for atomic bomb production has been "lost" at its Oak Ridge installation.

In a terse statement prepared by the commission at Washington and released here, the commission said "the technical facts on accounting for source and fissionable material at Oak Ridge have been reported to the joint congressional committee on atomic energy."

Chinese Reds Plan New Regime

Shanghai, China, June 21 (AP)—The new China news agency Monday quoted Chinese communist chief Mao Tze-Tung that communist China would become a "people's democratic republic" governed by a coalition of left wing parties.

The agency reported a speech by Mao in Peiping to a preparatory session of the "political consultative conference," a group Mao said would proclaim the new state and elect its government.

Mao said only the establishment of a coalition government would free the people of imperialism, feudalism and semi-colonialism.

He did not reveal when it would be formed. But he hinted its establishment would be proclaimed before the entire country was occupied by the communists.

Relations Possible
The communist leader said the "new China" was willing to establish diplomatic relations with foreign countries if they severed relations with nationalist China.

Mao was quoted as opposing imperialism and intrigues against the Chinese people.

"We are willing to establish diplomatic relations with any foreign country on a footing of equality and a basis of mutual benefit and mutual respect for sovereignty and territorial integrity, provided that foreign country is willing to sever its relations with Chinese reactionaries and would not give further assistance to Chinese reactionaries and would adopt truly, not falsely, a friendly attitude toward the peoples of China."

Mao said he expected opposition to the new regime.

"Reactionaries and imperialists are not expected to permit their defeat but will use all kinds of plots," Mao said. He added that the communists would win out.

Employers Hold Firm in Hawaii

Honolulu, June 21 (AP)—The Hawaiian stevedoring industry stood pat today on its contention that a 32-cent hourly wage increase asked by the striking CIO longshoremen's union was "unrealistic."

Testifying before Gov. Ingram Stainback's fact-finding board, employer spokesman Russell Starr said the companies' original offer of eight cents per hour was in line with the general economic conditions of the territory.

He said the offer was made after a study of 138 labor union contracts showed the average weekly wage increase in the territory was eight cents.

He did not reveal when it would be formed. But he hinted its establishment would be proclaimed before the entire country was occupied by the communists.

Communist Trial Defendant Jailed

New York, June 21 (AP)—Judge Harold R. Medina Monday remanded Gilbert Green, a defendant, to jail for the remainder of the communist conspiracy trial.

Green, during a tedious session, remarked:

"I thought we were going to be given a chance to prove our case."

Judge Medina turned to him and in a voice that could hardly be heard above the normal hum of the court said:

"Mr. Green, you are hereby remanded for the balance of the trial."

Green, chairman of the Illinois communist party, was the fourth of 11 defendants to be jailed since the trial opened. John Gates, editor of the Daily Worker, was sentenced to 30 days for contempt when he refused to answer a prosecution question. Two other defendants, Gus Hall and Henry Winston, who objected to the Gates ruling, were remanded for the duration of the trial, on the same day.
