

News of Tumalo Community

Tumalo, July 21 (Special)—Mr. and Mrs. John Rippen left for Portland last Wednesday. Rippen was scheduled to go through a clinic at the veterans' hospital.

Mrs. Ralph Zeigler and daughter, Clea, returned home Sunday from a short visit to Portland.

Mr. and Mrs. Charles Porter had as their house guests recently Mrs. Porter's parents, Mr. and Mrs. Pat Quinn of Caldwell, Ida.

Mrs. Carl Hatch was released from the St. Charles hospital last week following a week's stay there.

Nancy Heatt left Friday for her home in Portland following a visit here at the home of her aunt, Mrs. H. A. Scoggin.

Mr. and Mrs. Fred Sneed and sons, Keith and Clay, visited at the Dr. J. F. Hosen home at Seio Wednesday, and Thursday morning they went on to Portland to attend the funeral of John H. Lewis, brother-in-law of Shepard.

Nancy Perry returned home last week from Los Angeles, where she had visited her grandmother and other relatives for a month. Nancy made the trip to Los Angeles with her aunt and grandmother, who were driving home following a six weeks' trip to Europe.

Mr. and Mrs. Andrew Suhre and children, Helen, Wayne and Warren, spent the week end of the Fourth in California where they visited a sister of Mrs. Suhre at Oroville. Mrs. Suhre recently returned from St. Louis, where she was called because of the illness and death of her father. Mrs. Suhre made the trip east by plane.

Recent guests at the Clarence Halderson home were his brother, Olaf, together with his sons, Ole and Thomas, and their wives, all of Eugene. The party visited here last Sunday. Other recent guests at the Halderson home were Mrs. Halderson's parents, Mr. and Mrs. Frank Herman of Eugene, and her brother and sister-in-law, Mr. and Mrs. Ray Herman of Corvallis. The two Herman families visited here over the Fourth.

Ralph Saylor and son Lowell, of Hermiston, stopped here overnight Saturday and again Monday of last week, at the home of his uncle and aunt, Mr. and Mrs. T. G. Becker. Saylor and son stopped to and from Tule Lake, where they went to visit another son.

Mr. and Mrs. M. A. Couch had guests recently from Orland, Calif. They were Mr. and Mrs. M. J. Schroeden and two daughters, Mrs. Schroeden is a niece of Mrs. Couch.

Mr. and Mrs. Ralph McLean have had two of McLean's brothers, Max of Sweet Home and Don of Prairie City, as guests during the past week. Mrs. Max McLean also accompanied her husband here.

The J. W. Martin family have had as their guests the past week Martin's brother, Vern, and his wife and son, Leaman. Joe Kelps, a friend, also accompanied the Martins here. The visitors came here from Steubenville, O., and

Bats Do Not Feel Animosity, View Of Professor

San Francisco (UP)—One of the most popular misconceptions about bats is that they are mad at people.

Bats don't care about people, yet their prime enemy is probably man.

That and a wealth of other hitherto little-known facts about bats are the result of a study into every phase of the life of the bat made by Dr. Robert T. Orr, professor of biology at the University of San Francisco.

Dr. Orr, in his studies over a two-year period, observed his bats under every condition. Because of their stand-offish, nocturnal habits, the little mammals with a 14-inch wingspread had to be trapped and brought into captivity before much study could be made.

Hibernation Studied

Orr had special cages built to study their hibernation activities during the winter. He placed the bats in a refrigerated room with the temperature constant between 40 and 50 degrees.

The bats were given no food for four and one-half months. They suffered no ill effects. It was found they lost approximately 25 per cent of their body weight, but gained it back in about four weeks when hibernation ended.

It was discovered, however, that the bats did need water and humidity during that time. They wake up every few days and seek water. Orr learned this by placing sand on the floor of the refrigerated room. Every few days he inspected the room and found fresh bat tracks on the floor.

It was found also that bats must hibernate in a locality where the temperature is constant. If the weather turns suddenly warm, they awaken and swarm out to look for food. But in winter the insects which bats thrive on are scarce and many of the bats die.

Life Span Uncertain

Female bats give birth only once a year and their babies are born feet first, comparable to human birth.

"The life span of the bats has not been determined yet," Orr said.

Some of his bats are three years old and are still well. "But in the east," he added, "bats have been reported at 13 and 14 years of age and still going strong."

The bat's prime enemy probably is man, Orr said, and that seems to be true only in this part of the world. In the Orient bats are considered omens of good luck.

Part of Orr's research was done during a night's stay in a bat cave in San Luis Obispo county. "The bats didn't make any attempt to attack us," Orr said. "In fact, they did their best to stay away. Bats are smart animals."

Canada Claims Bomb Knowledge

Ottawa, Ont., July 21 (UP)—Canada knows how to make the atomic bomb, but doesn't intend to, government officials said today.

Discussing American top-level discussions about sharing atomic secrets with Britain and Canada, Acting prime minister C. D. Howe said:

"Canada has asked for no information on atomic energy from the United States."

Howe, Canada's minister of trade and commerce and the cabinet minister responsible for all atomic energy research, is acting chief executive during the vacation absence of Prime Minister Louis St. Laurent.

"We could make a bomb if we wanted to," Howe said; "maybe not as good as the American one, but a good bomb, nevertheless."

He emphasized, however, that Canada is not interested in producing atomic bombs, but instead is working on peacetime atomic energy uses.

"We're still selling uranium ores to the United States, and we're still exchanging certain classified information on atomic research and developments with them," Howe said.

"There is, of course, some classified information we don't get—for example, how to make the bomb," he added.

plan to make their home in Bend. A social evening, devoted to the playing of table games, was held at the Tumalo grange hall Friday evening. Pinochle and bingo were played. On the supper committee for the meeting were Mrs. Andrew Suhre, Mrs. Charles Porter, Mrs. Clarence Halderson and Mrs. Vale Lantz.

Fayet Scoggin and mother, Mrs. A. H. Scoggin, went to Lebanon Sunday to take Grandma Scoggin back to her home there, following a visit here of several weeks.

Mrs. L. A. Hartford and daughters, Peggy and Patsy, accompanied her daughter, Shirley, and a friend to Crater lake Sunday.

Mr. and Mrs. Vern Hartford picnicked at Suttle lake Sunday.

Grange Sunday was observed with special services conducted by Dan McCallum at the Tumalo Community church.

Professor Laraine E. Dunn, Mrs. Dunn, and two sons visited at the home of Mr. and Mrs. J. A. Chamberlin the first of the week. Professor Dunn is with the University of Nevada at Reno.

Mrs. W. L. Wilson and daughter, Marjle, went to Eugene last week to see Mrs. Wilson's mother, who has been quite ill. Marjle remained in Eugene to work in the bean harvest.

Displaced German Parlays \$50 Into Fortune, in Japan

By Peter Kalscher (United Press Staff Correspondent)

Tokyo (UP)—A refugee German artist who was 19 when he arrived in steerage class at Nagasaki in 1940 with \$50 in his pocket is today one of the biggest business men in post-war Japan.

His name is Shouei Eisenberg, originally of Munich and, thanks to Hitler, of Geneva, Luxembourg, Strasbourg, Brussels, Paris, Antwerp, Rotterdam, Shanghai and now Tokyo. He started by painting oil portraits of a few Japanese tycoons and wound up becoming a tycoon himself.

I first met Eisenberg early in 1946. He had a small shop on the Ginza, Tokyo's Broadway, where he sold cheap toys, nicknacks and curios. He still was taking commissions for oil portraits, a source of income which dried him over the war years.

Last week he greeted me in the lobby of a Hong Kong hotel and returned to Tokyo on the same commercial air liner.

Interests Extension

I learned that in three and one-half years Eisenberg had become the president of three companies, owned two factories, acquired

one-third of a seven-story Tokyo office building, a whole one in Osaka and had branches all over Japan. He also owns housing developments in which most of his 1,200 employees live.

Twenty-seven-year-old Eisenberg is also the largest export agent for Japanese aluminum, enamel ware, copper and brass manufacture and communications equipment, and sells the lion's share of Japanese textiles and textile machinery to India and southeast Asia.

Two months ago he engineered a \$2,500,000 sale of Japanese telephone and cable equipment to the Indian government. Soon he will represent the Indian Baharat air lines, when it opens its Tokyo terminus. Eisenberg now is incorporated in New York as well as Tokyo.

Asked the obvious question, how did he get the snowball rolling? He replied:

"Bathtubs. Aluminum bathtubs and Chinese rugs."

Army Satisfied

He explained that in 1946 occupation officials ordered the Japanese government to furnish 20,000 bathtubs for army depen-

dent houses. The only bathtub factories in Japan turned out enameled iron tubs by a slow and costly process.

"With my portrait commissions during the war I invested in Chinese rugs," Eisenberg said. "I sold the rugs after the surrender for a good profit and bought a small aluminum plant. Then I turned quickly out a nice, cheap aluminum bathtub and showed it to the army."

The army was enchanted and approved the model. With the order as collateral, Eisenberg borrowed 2,500,000 yen from the Japanese government and sub-contracted the entire aluminum industry. "I nearly every American factory in Japan takes a bath in an Eisenberg tub."

"Myself, I prefer the old-fashioned Japanese tile tub," Eisenberg admitted.

In six months, concentrating on first priority army orders, Eisenberg gained control of the aluminum industry, brought the enamelware manufacturers to the point of ruin and then saved them by selling the Dutch East Indies a 100,000,000 yen export order for enamel pots and pans. In effect-

ing the rescue, Eisenberg also took over the industry.

This big, slow-moving, rather awkward Horatio Alger character with lank brown hair and blue eyes was declared stateless during the war but now holds a Polish passport which last October enabled him to leave Japan on a selling tour of the entire Far East and India. He had personal interviews with the premier of Ceylon and Indian Prime minister Jawaharlal Nehru.

Eisenberg speaks fluent German, Japanese and English, some Dutch and no Polish. His principal reading is American comic books. "They pass the time on plane trips," Eisenberg says.

In 1943 he married a pretty Eurasian girl. In six years they had four daughters, whose birthdays—like the number of Eisenberg enterprises—he has a hard time remembering. "I'm sort of the Eddie Cantor of Japan," Eisenberg said.

Eisenberg insists he had to quit painting because of eye trouble, but he is reluctant to discuss his early artistic career.

"I wish you wouldn't mention about it," he said. "If people re-

ACCIDENT FATAL
Myrtle Point, Ore., July 21 (UP)—John Huester, 75, Portland, was killed yesterday when the left front tire of his automobile blew out and caused the car to swerve into a pickup truck driven by R. J. Bliss, Myrtle Point. Bliss suffered cuts and abrasions.

MORE FLYING SAUCERS!
Klamath Falls, Ore., July 21 (UP)—They've been seen again. This time seven women in the Montgomery Ward credit office here reported Wednesday afternoon a flying saucer visited Klamath Falls skies for three minutes.

Twenty-three-year-old Grace Walters, chief supervisor of the office, said "when it (the saucer) turned over on its side, it looked

like the edge of a plate with a spot in the middle."
"The object made three passes around the city "as if it were trying to make pictures."

CARRIED INSURANCE
Seattle, July 21 (UP)—Air Transport Associates renewed an aviation insurance policy shortly before the firm's C-46 transport crashed here Tuesday night.

President Amos E. Heacock said he had mailed a \$20,000 check to the insurance company the day of the crash.

He said the company has coverage up to \$1,000,000 for passenger protection, and \$300,000 for public liability and property damage.

Growers tell us the Apricot Crop was never better—in abundance—in quality. Safeway buyers have provided us with the pick of the crop—at the year's best prices—for your selection and enjoyment. If you are interested in bonus quality apricots—now is the time to get them at Safeway.
