Buick even keeps the Sun in its Place

Of course, this new glass—which reduces glare and incoming sun-heat—is a Buick feature in '52

Here Here Here Here

WITH all the new things we've had to talk about in 1952 Buicks, we're just getting around to this one. It's called "Easy-Eye Glass"—a new kind of glass with a cool, soft, blue-green tint, which filters the sun's rays entering your car—cuts down their glare and heat. You'll appreciate the "glare control" at any time—and when you hit your first stretch of hot-weather driving you'll find that this glass does a great job of keeping the heat out of your lap. We know—because thousands of happy Buick owners already have this new comfort feature. The rest of the automobile industry is just beginning to discover what Buick discovered a year ago. It's a great idea, which costs you very little extra if you order it when you're buying a new car. But this still leaves the other folks with a lot of catching up to do. You'll look a long way before you'll find anything that approaches a Buick's million dollar ride. You'll look a long way before you'll find anything so completely satisfying as Dynaflo Drive.* You'll find it hard to match the style and beauty and harmonious good taste of a 1952 Buick's interior trim and fabrics. And when it comes to what you get for what you pay—we'll gladly match price tags with the field. Have you had a good look at the '52 Buicks? That's something you ought to do soon.

Equipment, accessories, trim and models are subject to change without notice. (Optional at extra cost—available on most models. (Not presently available in Massachusetts.)
**Standard on ROADMASTER, optional at extra cost on other Series.*

Sure is true for '52

When better automobiles are built **BUICK** will build them.
