## Hawes Announces Redmond School Off Probation

REDMOND, April 11 — Redmond union high school has been removed from the probation imposed upon it last April by the Oregon School Activities Association, effective at once. This news was included in the talk given at Thursday evening's annual banquet in recognition of the basketball teams by A. Oden Hawes, assistant secretary-treasurer of the association. He also congratulated the school, and all concerned — students, faculty, parents, friends, all members of teams, cheerleaders, etc. for their good record of the past year. He remarked that he had heard favorable comments from all over the state on Redmond's sportsmanship and general accomplishments in their sports program. The OSAA is the governing body for all athletic activities in the state.

Douglas Zitek was named the season's outstanding player, chosen by his teammates. His name will be engraved on the perpetual trophy kept in the school. Coach Marvin Scott presented letters to seniors Ed Schallhorn, Dave Skidgel, Bob Eberhard and Dale Schult, and to juniors Nick Haynes, Don Kissler, Larry Zitek, Wilbur Woolhiser, and Doug Zitek, and the team manager, Clyde Penhollow. Following his introduction by the evening's toastmaster, Gilbert Lieser, Scott reviewed the season's play and commended the excellent spirit he had found among the players. He noted that the league next year will include the same teams as this year, and a similar schedule of league and non-league games will probably be played. The varsity in this past season won 18 and lost four games, and constituted one of the best teams he has ever coached, Scott said.

**Excellent Record**  
The junior varsity team also finished with an excellent record, having nine wins and only two losses to their credit. Boys who played with the jayvees the past

season were named: Larry Baker, Jim Jones, Bill Rector, Earl Smith, Dean Short, Carroll Penhollow, Dale Hartman, Duane Eakin, Kirt Skinner and Bob Clark. Scott was jayvee coach also.

Arch Dunsmoor as coach of the freshmen team introduced his players. It was noted there are a number of younger brothers among the jayvees and freshmen who are following their older varsity brothers in basketball interest. Earl Schult, Joe Peterson, Gary Haynes, Darrell Woolhiser, Earl Smith, Dick White, Don McClure, Joe Beimler, Wilbur Durfee, Edward Frye, Mike Smith, Dick Sinton, Darrell Mallory and Bruce Plummer played for the frosh.

Following his talk Hawes showed colored movies on "King Basketball", illustrating the 1952-53 basketball rules, and showing some of the season's outstanding players, including Swede Holbrook of Oregon State college.

Members of the basketball teams were guests at the occasion Thursday night, with faculty members and other townspeople present as well. A turkey dinner was prepared and served by girls of the P.U.H.S. chapter of F.H.A., directed by Miss Dorrine Pocheu, home economics instructor. The affair was held in the health room.

## Annual East-West Tourney Sunday

The Bend Golf club will open the season officially Sunday morning, in the annual tournament between the east side and west side golfers. George Gove is captain of the west side team, which has won the tournament for the last several years. Welsh D. Evans will head the east side team, which reported to have been strongly reinforced this year by the importation of talent from Portland, namely "Wild Bill" Perkins, who arrived Friday afternoon to spend the summer in Bend.

A free breakfast for all tournament entrants will be served at the clubhouse between the hours of 9 and 10 Sunday morning, after which the competitors will tee off in foursomes. Matches will be played straight-across the board, without handicaps.

**FRESH BEAT O.C.E.**  
MONMOUTH, April 11 — The University of Oregon freshman tennis team defeated the Oregon College of Education varsity, 5 to 2, here Thursday. It was the first match of the season for Oregon.

## Film Strips Used in Training

First grade pupils at Kenwood school find places in their text books, as their teacher, Mrs. Violet Dahlin, prepares to flash corresponding filmstrip on the screen. This correlated study is part of the audio-visual program of the Bend Public Schools.

## Ray Howard Gets Education in Bend Schools Includes Audio-Visual Aids

Ray Howard, greenskeeper at the Bend Golf club for six years, now is greenskeeper and course supervisor at the Eugene Country club. He is the son of Mr. and Mrs. Raymond Howard, Route 3, Bend. They recently received a press clipping from the Eugene Register-Guard giving details of the move.

Howard is a graduate of the school of greenskeeping, University of Massachusetts. At Eugene he replaces Sam Zook, who resigned recently to take a position with the Waverly golf club in Portland.

Haldor C. Gilliland has replaced Howard as greenskeeper at the Bend Golf club.

## Lewis and Clark Nips OCE 6-3

PORTLAND, April 11 — Lewis & Clark college dropped Oregon College of Education, 6-3, in a non-conference baseball game here yesterday.

Gary Jackson got two hits in four times at bat and drove in three runs to pace the Pioneers. Gordy Robertson was the winning pitcher. Bill Palmquist was the loser.

(Editor's Note: This is the 11th in a series of articles covering departments of the Bend Public Schools. Information for today's installment was obtained from John E. Prentice, director of audio-visual aids for the system).

The audio-visual aids department is one of the newer spheres of education included in the over-all program of the Bend public schools. While the recent trend has been to recognize this field of education, the skills of this area are as old as education itself.

Everything learned has to be an experience of visual or auditory nature. With the first blackboard, teaching was accomplished through visual experiences. The same with maps, globes, sand tables and a host of other visual aids. The auditory experiences began with the lecture or teacher explanation developed to radio and is now headed to the new medium of television.

This department is concerned with storage, ordering and servicing the teacher needs and curriculum needs as an aid to the process of education. The distribution of films, 16mm. movie film and 35 mm. filmstrip, is one part of this department's function as well.

One of the newer trends in the audio-visual fields has been the correlation of educational films to the text book. These film materials have one advantage of being correlated and integrated right into the area covered by the textbook, sometimes even using the same peoples and places as in the textbook.

**Film Strip Library**  
Materials which this department has on hand include a film strip library, now totaling 963 separate titles. This library covers such subjects as art, music, science, geography, history, reading, vocational occupations, health and physical education, and social science. In

the case where a text film is being used in connection with the text book, every effort is made to put the textfilm with the teacher and left there until the book is finished. Included in this film strip-library are 25 current event discussion filmstrips. These discuss problems facing the world, the nation and American communities. These filmstrips are edited by the New York Times, and are available to local organizations on request.

Another undertaking is the 16mm. education film program. As the cost of these films is exceedingly high, a rental program is the answer. For the school year 1952-53, the Bend schools will use a total of 610 rented films. The high school will use 360, the grades 250. The areas covered by the films rented are art with 19 films; English, 37; health and P.E., 134; industrial arts, 35; math, 2; music, 4; science, 177, and social studies, 204.

Most of the films rented are from Oregon State college in Corvallis, but other sources are the University of Washington, Washington State college and Oregon State Board of Health. Orders are placed with the different sources in the spring preceding the year of use.

**By Teacher Groups**  
The films to be rented for use are chosen by teacher film groups. Each grade or subject has its own group which selects what they will need for the following year and places requests with the department. During the year, evaluations are made of these films and if warranted, a reorder for the next year is easily accomplished.

Most of the leading educational films do not come from the companies located in Hollywood, Young America, Cornet Films, and Encyclopaedia Britannica films are some of the new companies to manufacture only educational materials. These companies got their start with the end of World War II, adopting the policy of film usage from the armed forces and entering into the business of manufacturing films for school use only. Each of the three has produced nearly a thousand different titles for school use. With the school experience behind these companies, it will not be long before the saying will come true, "More can be taught better and faster."

## Life of Doomed Man Prolonged More Than Year

**By DELOS SMITH**  
CHICAGO, April 11 — Melanoma, the "black" gnawing-death cancer, has been allowed to a walk by a new chemical treatment, the annual meeting of the American Association For Cancer Research was told today.

The chemical has so far given a doomed melanoma sufferer one year and one month of life more than he was warned to expect. The news of the treatment stirred interest among cancer specialists here. Melanoma is not called "black cancer" because of its color alone.

Dr. Sidney Farber, of the children's cancer research foundation and Harvard Medical School, said his still-living patient now is newly and finally doomed. Melanoma came back and hit deep, and the chemical no longer is effective.

The chemical is tri-ethylene-phosphoramide, put down in shorthand as tepa. It is related to the nitrogen mustard, which have limited effect on some cancers, and a chemical offspring of a chemical the Germans constructed just before World War II to give rayon a better finish.

Farber said his unique "black" cancer patient was made so free of the symptoms of Melanoma in three months of treatment, no physician could have diagnosed it. These symptoms had been so obvious even a well-informed layman might have made a correct diagnosis — five superficial-looking surface tumors of the face and head.

He gave the man tepa by muscular injection and by mouth almost daily for the three months, and right up to "the limit of tolerance," since tepa is highly toxic and can do severe damage to bone marrow, the stomach, and intestines.

When all symptoms were gone, there no longer was a diagnostic justification for such a powerful chemical. Farber stopped treatment.

For one year the man remained without detectable symptoms. Then it became evident that melanoma wasn't eliminated — it had only yielded ground, meanwhile "seeding" itself in the man's bones and deep in the lymph glands of the armpit. That "seeding" is going to kill him, and soon.

There was no suggestion that tepa is a "cure" for black cancer. Farber told reporters he regarded the results as a "happy accident" — happy because it prolonged the man's life and because from the study of tepa and its chemical modifications perhaps will come an effective way of treating melanoma.

The only effective way now is very radical surgery.
