And the "Wonder-Oven" is bigger than ever to bring you added cooking convenience. Porcelain finish—choice of colors!

SORRY, YOU CAN'T BUY IT—The Futura, a streamlined experimental car, designed by Lincoln-Mercury, has just been unveiled in Chicago, Ill. Model Mario Blasko stands beside the car which incorporates the latest developments in automotive design. The automobile will be used as a laboratory on wheels and will undergo road testing.

Biggest Change In Dress Comes From Laboratory

By ELIZABETH TOOMEY
United Press Staff Correspondent
NEW YORK (UP)—The biggest change in the way we dress has come in the past 10 years not from fashion salons but from laboratories.
Hemlines rise and fall, but the real revolution is the growing use of synthetic fiber fabrics in clothing. Every member of the family is affected. And synthetic materials will reach an all-time peak in popularity this spring.
Entire Easter outfits, excepting shoes and hats, can be dumped in the Monday wash. Little girls can

wear sherry-colored fleece coats that once would have been ridiculously impractical. They go into washing machines now.

Men Pioneered
Men, traditionally behind women in accepting new fashions, actually have pioneered some of the combinations of man-made fibers and natural fibers used in women's clothes this spring.

Dacron and cotton mixtures went first into men's shirts. Now, after thorough testing in men's wardrobes, the dacron-cotton materials are being turned into scores of new women's styles.

Paris designers joined the American developers on a large scale for the first time this year to create entire collections from synthetic fiber fabrics. Givenchy designed a separate group of casual clothes made from orlon fabric. Most of his designs will be copied for sale here.

The favorite new way to use the latest tube fibers is in combination with various natural fibers. The

reason a new cotton blouse may be crisp and shining, for instance, is that it contains 10 per cent nylon.

It's Dacron
The reason a man's suit can go through a downpour and dry out without losing its shape or the crease in the pants is because it's part wool and part dacron.

A little girl's coat for spring can be the most fragile looking pastel plaid, with accordion-pleated panels in the skirt and a pale pink lining. It washes. The wool-appearing material is a combination of rayon and orlon, the pleats are permanent and the lining is nylon.

Little boys are naturals for such sturdy fashions. Washable suits, silky-looking T-shirts made of nylon stretch yarns that fit several sizes and orlon sweaters easy to wash and quick to dry made muddy playgrounds less of a hazard for junior's clothes.

Experts predict more developments to come, as the laboratory guarantees that we'll be wearing

Centennial Plan To Receive Study

PORTLAND (UP)—A three-month survey will be started in March to determine if it's practical for Oregon to celebrate its 100th anniversary of statehood with a big fair in 1959-60.

To pay for the survey, 24 Oregon counties have contributed \$10,000 according to Charles F. Bollinger, secretary of the Governor's Centennial Committee.

Stanford Research Institute will make the survey to determine whether a fair should be held on a state, national or international basis and where it should be located.

Fair supporters think Oregon could double its annual 125 million dollar tourist income if the fair were publicized nationally and ran for two years.

Anthony Gradenthaler of Baker committee finance chairman, said contributions from the 24 counties ranged from \$250 to \$1000. Portland and Multnomah county are raising \$20,000 as a beginning budget for the Centennial Committee.

TONSorial THIEF

The thief who broke into the barbershop of Carl De Prima apparently had but one thought in mind to be well-groomed. He stole only a scalp vibrator and a bottle of hair cream, value \$15.

more pastels, more pleats and more clothes with party personalities and work-day properties.

Sheppard Probe Delay Reported

BERKELEY, Calif. (UP)—Dr. Paul L. Kirk, noted University of California criminologist, said today he will be unable to complete his investigation of the Sheppard murder case by tomorrow as planned.

"I had hoped to have it ready by March 1 but I've been delayed," he said. "I can't say when it will be ready."

Kirk spent several days gleaning evidence from the Bay View, Ohio, home of Dr. Samuel H. Sheppard, convicted of second degree murder for the slaying of his wife, Marilyn.

William J. Corrigan, Sheppard's attorney in the widely publicized trial, retained Kirk in the name of the Sheppard family. The criminologist said it would be up to Corrigan to decide if his report will be made public.

Quake Recorded in South Pacific

SAN FRANCISCO (UP)—A two-our long earthquake that could have caused tremendous damage umbled through the South Pacific some 440 miles north of New Zealand yesterday.

Reports so far have been scanty, but Don Tocher, University of California seismologist at Berkeley, said the tremor registered an intensity of 7 to 7 1/2 on the Richter scale of 10.

Dr. Charles F. Richter, seismologist at the California Institute of Technology at Pasadena, said his instruments showed a magnitude of 7.8. The maximum ever recorded was 9.

Richter said it definitely was a "major and possibly even a great earthquake." An observatory official for the U.S. Coast and Geodetic Survey in Honolulu said the quake was strong enough to cause damage if it struck in a populated area.

The official said that on the basis of reports from observatories in Fairbanks, Alaska, and Manila the quake was centered near the Kermadec Islands about 440 miles north of New Zealand.

Valuables Held For Man on Spree

COEBURN, Va. — (UP) — A stranger walked into the station here and told Police Judge J. E. Brooks he wanted to leave some valuables while he went out to "get drunk."

Brooks obligingly took \$235 in cash, a watch and a pocket knife and locked them up.

Twenty-four hours later the man came back, asked if there was any storage fee and went merrily on his way to the railway station.

Rabies Danger Is Outlined

CHICAGO —(UP)—The American Veterinary Medical Association has warned of the danger of rabies in cattle. It said that the against rabies is under study.

Foxes, squirrels and even vampire bats in some areas of the country and in Mexico are spreading rabies, the association reported.

A test of a new rabies vaccine on more than 1,000 cattle in Georgia show an immunity to 70 per cent of the animals after six and a half months, the association said.

In Georgia, the association reported, more than \$100,000 worth of cattle were reported killed by rabies in four counties in 1952.

A report from Mexico to the association said that vampire bats spread rabies to cattle there. About 800,000 cattle have been vaccinated with virtually complete protection, while about 12 per cent of unvaccinated cattle became rabid, the report said.

Students Write History Text

NEWTON, Mass. — (UP) — Grade school pupils in Newton are getting a new text book—written by a group of high school students.

"A Young Citizens' History of Newton" started as a routine project by members of the high school's English Club two years ago.

Faculty advisor M. Roland Heintzelman was impressed by the students' research in local history. Under his guidance, a club member, Joyce Dudley, put them together in book form.

"This is the first time that school children have actually written and published their own community's history," Heintzelman said, "and the first time such a student publication has been used as a text for lower grades."

AGAINST UMT
MERIDEN, Conn. —(UP)—The Connecticut Temperance Society voted to oppose universal military training on the grounds that it would "stimulate the liquor habit."

Just Arrived! All the New FRIGIDAIREs for '55

Cold-Pantry! Imperial! Deluxe! Super!

Announcing! A New 30-Inch Cooking Center

The All New **FRIGIDAIRE "Thrifty 30" Electric Range**
Puts the luxury of big range capacity, and automatic features into compact kitchens!

Giant Oven Goes Clear Across
holds even more than ovens in the biggest ranges. Prepares a whole meal at one time. Large enough for the biggest turkey, or even 6 pies at one time.

More Working Inches
