Purcell Offers Explanation of Tape Recording

PORTLAND (UP)—Police Chief Jim Purcell, Jr., yesterday submitted to public view his explanation of a tape recording of some of his official telephone conversations which was found in the home of a man indicted in connection with Portland's vice and corruption probe.

The explanation was contained in a detailed report submitted to the city council and to the press by Mayor Fred L. Peterson.

The report was critical of Sheriff Terry Schunk, Peterson's opponent for mayor here next Tuesday, and accused the sheriff of laxity in law enforcement.

Peterson and Purcell had been under fire in some quarters to explain why tape recordings of some Purcell conversations with H. G. Malson, superintendent of state police, had been found in a raid on the home of Raymond Clark, employe of night life figure James Elkins.

The raid, subsequently ruled illegal, had been conducted by Multnomah county sheriff's officers on a warrant obtained by District Attorney William Langley, also indicted by the grand jury.

Purcell said the recordings were made by himself to monitor conversations with Malson and were not the result of illegal wiretapping as later charged. The police chief said it was inadvertent that the tapes were left with the recording machine Clark had used to gather information about Portland's alleged underworld for The Oregonian's expose series. Purcell had made the machine available to The Oregonian and Clark was working with the newspaper, the report said.

Purcell explained that he had previously not made the information public since his department was under investigation by state police and he considered it improper and poor policy for him to become publicly embroiled in the controversy.
