Ribicoff cracks at educators

WASHINGTON (UPI) - Abraham Ribicoff, secretary of health, education and welfare, said Thursday the Kennedy administration "took a licking" on its school aid bill because educators failed to

fight for the measure.

Addressing 900 college presidents from all parts of the na-tion at the annual meeting of the American Council on Education, Ribicoff threw away his prepared text and gave the educators a sharp scolding.

"Where were you educators as aid to education was done in at this last session of Congress?" he this last session of Congress?" ne demanded. "Every person in the education field was busy looking out for his own small ricce of the program. None of you was very interested it doing some-thing for education as a whole." Ribicoff said the administration will renew its fight for a broad based program for federal aid to education at the next session of

Congress.
"President Kennedy isn't a quit-ter and neither am I," he said.
"We got licked this past summer but we're going to make that fight again next year."
