ALICE MARIE HIRN

Wedding bells to ring soon

Special to The Bulletin

REDMOND — Wedding bells will ring soon for Miss Alice Marie Hirn and Roger Edward McGee of Portland, according to an announcement made this week by Mr. and Mrs. John Hirn of 706 S. Tenth Street, Redmond.

Vows will be exchanged by the pair September 2 at the Messiah Lutheran Church in Portland. The bride-to-be is a 1960 graduate from Redmond Union High School. She attended Pacific Lutheran University and now is enrolled at Portland State College.

McGee, son of Roger E. McGee and Mrs. Virginia McGee of Portland, also is attending Portland State College. He was graduated from Benson High School in Portland.

New honors are received by Jackie

RAVELLO, Italy (UPI) — Mrs. Jacqueline Kennedy, 30, was Monday named an honorary citizen of Ravello, a distinction that escaped such illustrious guests of the past as King Victor Emmanuel III, composer Richard Wagner and actress Greta Garbo.

Mayor Lorenzo Mansi said the American first lady would be officially honored a week from Tuesday for her charm and natural dignity—and in the hope she will return.

"We want to express our gratitude to Mrs. Kennedy for picking Italy in general and Ravello in particular for her vacation. If she is a citizen of Ravello she will have to come back," he said.

Wagner, Garbo and the late king in the past spent holidays in this picturesque town on the Amalfi Coast. But they were never given honorary citizenship.

Mrs. Kennedy, spending a prolonged holiday here with her daughter, Caroline, 4, and her sister, Princess Radziwill, apparently slept late today after a shopping trip Sunday night to nearby Positano. She and her sister left their rented villa after 11 a.m.

Mrs. Kennedy, in a setting of old world charm, Sunday night accepted an award as "the most elegant woman of 1961."

JAIL JEHOVAH'S WITNESSES

VIENNA (UPI) — Five members of the Jehovah's Witnesses sect have been sentenced to jail by a Hungarian court, according to reports in a Communist party newspaper.

They were accused of "belonging to and furthering an underground organization hostile to the state," the newspaper Hajdu-Bihar Naplo reported.

Railroads seek ICC approval of merger plan

WASHINGTON (UPI) — Two of the nation's largest railroads went before Interstate Commerce Commission (ICC) examiners Monday with their marriage proposal that one railroad can survive cheaper than two.

The Pennsylvania Railroad and New York Central Railroad started down a long legal road they hoped would lead to approval of the merger to create the nation's largest rail system.

The main argument of the two rail giants boiled down to this: A combined line could make money but the two operating separately could lead to financial disaster of one or possibly both.

Both railroads once were big profit makers. But the lines said that the Central lost $12.5 million last year while the larger Pennsylvania went $3.5 million in the red.

Cite Possible Savings

The railroads insisted that a combination of the two could result in annual savings of $75 million.

They argued that this would be accomplished by eliminating costly duplicating services and facilities where the two are now rival competitors, mainly between New York and Chicago.

The merger is being opposed by 24 railroad labor organizations who fear consolidation will mean a loss of 7,800 jobs over a five-year period.

The ICC also has received 41 applications from other railroads and interested parties who want to be included in the Pennsy-Central arguments. The ICC has accepted 30 of them.

Lengthy Hearings Expected

The hearings, being conducted by two ICC examiners, are expected to be lengthy and no decision is expected to be reached before 1963.

Even if the merger is approved, the railroad faces the possibility of Justice Department opposition on anti-trust grounds.

The Justice Department is one of the parties in the hearing but has not indicated what its position will be.

The two railroads operate about 10 per cent of the major track in the United States, and get about 15 per cent of total freight revenue and 15 per cent of passenger fares.

The two lines said the proposed merger would produce a rail system with assets of more than $5 billion, making it the 12th largest corporation in the nation.

NOTHING FISHY HERE

CATMANHAY, England (UPI) — The Catmanhay Angling Club awarded its fishing prize to a fisherman who caught a one-ounce bug. It was the only catch in the competition.

MARY HELEN RESARE

Engagement news is announced

Special to The Bulletin

REDMOND — Mr. and Mrs. Clyde Resare of Redmond have recently announced the engagement of their daughter Mary Helen to Martin George Eakman of Bend.

Miss Resare is a 1962 graduate of Redmond Union High School and is now employed with the Bank of Central Oregon.

Eakman, a 1961 Bend Senior High School graduate, is the son of Mrs. Eldora Eakman of Salem. A U.S. Forest Service employee, he will attend Central Oregon College this fall.

The couple plan an early spring wedding.

Republicans get blunt warning

PORTLAND (UPI)—Oregon Republicans heard some blunt and not very flattering words about themselves from speakers at the state Republican Leadership Workshop here Saturday.

Robert C. Ingalls, editor and publisher of the Corvallis Gazette - Times, said the public thinks of the Oregon Republican Party as "a stodgy, confused, weak, tired, pro-business, anti-labor faction run by 'the Portland crowd.'"

Ingalls is chairman of the Committee on Party Growth.

Ingalls called for party workers to emphasize the positive appeal of the party and reverse the "negative, sterile" image which he said prevails.

Keynote speaker Howell Appling Jr., Oregon's secretary of state, ended the session with a call to work at reducing the Democratic registration edge in the state.

Bonneville Power Administration was created just 25 years ago

By Ann H. Pearson
UPI Staff Writer

PORTLAND (UPI)—A quarter of a century ago Monday, President Franklin D. Roosevelt scratched his name across a controversial act creating the Bonneville Power Administration (BPA).

Today, giant white slabs of concrete harness the Columbia River and her tributaries at 15 points. Five more dams are under construction.

Humming lines, enough to ring the nation, will carry 31 billion kilowatt-hours of power this year to wholesale agencies in the Northwest power pool that feeds Oregon, Washington, Northern Idaho and Western Montana. BPA supplies 60 per cent of all power for the area.

Since 1937, BPA has generated enough power to keep Seattle aglow and her industries rolling for 95 years.

The going has not always been smooth. Since 1958, Bonneville has operated in the red. The agency has been embroiled deep in the running public-private power controversy.

But it is looking ahead — to tripling its generating capacities in the next quarter century, to extending its transmission grid south and perhaps east for sale of surplus power, to a power treaty with Canada, and to lines that can wheel in power from a massive dam planned for Alaska's Rampart Canyon.

Nation's Largest

Since its creation, Bonneville has become the nation's largest hydroelectric utility operation. It serves 220,000 square miles and five million persons.

From 1940 to 1960, population in the Northwest grew 55 per cent; power, public and private, nearly 800 per cent. The per capita use of power jumped from 1,600 kilowatts a year to 9,000—more than double the national average.

The power is comparatively cheap. The agency's rate of $17.50 a kilowatt-year has remained unchanged since 1938. The average family pays a monthly bill of less than $10.

Bonneville wholesales its power to public and private agencies, who in turn distribute electricity to the consumer. BPA also sells directly to 19 large industries.

About half of the power sold by the power administration, either directly or through distributors, ends up in industrial use. The quarter century has seen a spurt of industrial activity in the Northwest. Industrial power consumption, from BPA and other sources, is about 25 billion kilowatt hours a year, eight times what it was in 1937.

Among industries served by the project are plants that put out about one-third of the nation's aluminum ingot production.

Bonneville and private power maintain an uneasy alliance. Some 40 per cent of BPA's power goes to private firms for distribution.

Protests Heard

The protests from the private companies become audible when BPA urges use of the Hanford, Wash., atomic works to generate power, or seeks to run its transmission grid into California for sale of surplus power.

The first project was the Bonneville Dam. From Bradford Island, about 30 miles up the Columbia from Portland, it flings stone arms across two channels, each about one-fifth of a mile long. One is the spillway dam to regulate flow. The other is the power dam, where ten turbines turn generators to make more than three billion kilowatt-hours of electricity a year.

In addition to neat, white administrative and guest buildings, rolling green lawns and bright flower beds, Bradford Island is laced with fish ladders.

The passage of salmon and other seagoing fish upstream to their spawning grounds has been a major problem created by the big dams. The ladders, in effect a series of small waterfalls up which the fish travel naturally, are one answer.

Another, across the channel on the mainland where homes and offices for the Bonneville staff also are located, is the fish hatchery. Here fish eggs are hatched artificially and small fish raised in thousands until they can be released to swim to sea and mature before returning.

Bonneville also has a lock. Shipping passing through in the past decade averages one and one-half million tons a year.

Grand Coulee Dam, BPA's second project, remains the largest in the system—nearly four times the capacity of Bonneville.

In The Red

The power complex and its related irrigation and recreation facilities, already represent a $3.8 billion investment. Most of it is being repaid from power revenues. BPA is $20 million ahead of schedule in making repayments.

The agency, however, has operated at a deficit for the past five years, and was in the red $18 million this year. It blames an uneven construction pattern, making new contracts unsure; on growing project costs; on recent lumber and industrial cutbacks; and on a lack of markets for secondary power, the kind that is only available part-time.

BPA says $1 million a day in construction will be needed in the next quarter century to meet power demands. The agency also currently is pressing for a coordinated power development with British Columbia. Generators at Hanford, and long-distance, high-voltage lines to sell secondary power could be used instead of fuel-generated power.

Girls give style revue

Special to The Bulletin

PRINEVILLE — An elaborate and well - presented style revue was presented Thursday by the 4-H girls of Crook county, as an opening event of the Crook County Fair. Major fair activities will be held this weekend.

Narration of the production was done by Karen Jordan and Tresa Franks, two 4-H girls. Grand champion in clothing is Karen Jones and the grand champion in the knitting division was Dana Butler.

Only two girls may enter the state fair style revue from Crook county this year, according to Mrs. Maud Purvine, county home extension agent. They will be Karen Jones and Beverly Puckett.

Girls who won blue ribbons in clothing at the style revue were Janell Knoche, Cindy Welch, Maradee Johnson, Judy Harris, Bev Helton, Judy Vice, Anne Davis, Nancy Powell, Suzan Smith, Cheryl Baker, Jean Sharp, Marsha Wright, Suzan Minson, Terry Ann Vice, Sharon Peterson, Barbara Streetman, Neva Merritt and Janet Isaacson.

Blue ribbon winners in the knitting entries were Debbie Begley, Diane Jahns, Sylvia Stumph, Marsha Wright, Cynthia Harper, Barbara Streetman, Ernestine Blackwell, Nancy Powell, Debra Baker, Cheryl Baker, Charleen Hall, Sharon Peterson, Maureen Coffman, Nancy Cooley, Marlene Richter and Kay Coffman.

PUD proposal may go to vote

GRANTS PASS (UPI)— Members of the Josephine County Public Power Association have started circulating petitions seeking to place formation of a peoples utility district on the ballot here in November.

W. I. Davidson, president of the organization, said his group is highly encouraged by the recently-released state engineer's report on the feasibility of forming a PUD in Josephine County.

The public power association seeks to form a PUD for the purpose of lowering electric rates. In order to get the proposal on the ballot, 408 signatures of registered voters must be obtained and petitions submitted to the state engineer's office by Aug. 28.

The state engineer's report on the feasibility of such a district in Josephine County stated that "it appears possible that the district could operate as an economical electric utility."

It also pointed out problems, however, including the fact that lines would have to be constructed to bring in power since there is no source of power within the proposed district. Davidson said the PUD would purchase its electricity from the Bonneville Power Administration.

The proposed district would cover 1,028 square miles and would have a population of 31,110 and assessed valuation of $38,274,497.

Accident takes life of youth

PORTLAND (UPI) — Ronald Earl Jones, 19, Portland, was killed early today and his companion injured when their car plunged over a cliff on Rocky Butte and crashed into a tree.

Jones was identified as driver of the car.

Treated for injuries was Neil Pieg, 18, Portland.

Police said Jones was thrown from the car when it failed to make a turn, plunged off the road and into a tree.
