### Sinner available to address climate

**To the Editor:**  
 As a non-Catholic, I have to admire Pope Francis' bold embrace of mankind's responsibility to address

global warming. It seems as though the bigger the issue is, the more useless the politicians are for dealing with it. Global warming is such an issue. The military gets it, the insurance companies get it, NASA gets it, the tweety-birds in their mi-

grations get it, but not the politicians. Leadership will have to come from elsewhere. If there are Protestant ministers nearby of similar conviction, this sinner is available.
