

Michael Cooler, technology instructor for Wallowa County Alternative Education Program, helps Linden Arntsen sort through the possibilities for a computer coding project.

STEM SESSION

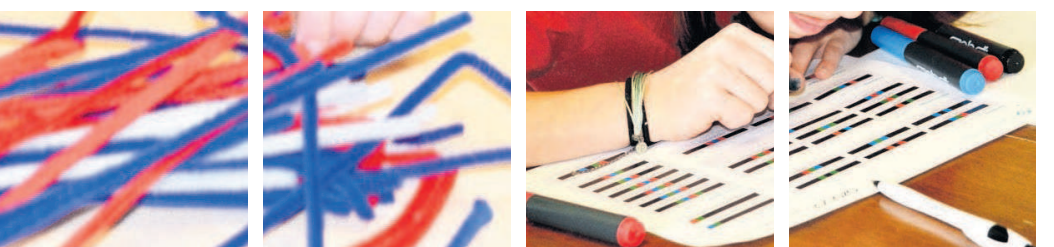

Fun and learning are the focus of Building Healthy Families event

Camdyn Weer contemplates choices for a coding project.

Left: Lauren McBurney, left, and CeCe Curry working on designing a snowflake to demonstrate symmetry in nature.

Paul Wahl/Chieftain

Caleb Taggart, center, and Marshall Taggart work on designing a curling stone, which would later be used to demonstrate the various science components of the Olympic sport during the Jan. 26 Family Science, Technology, Engineering and Math Afternoon, sponsored by Building Healthy Families and Wallowa Resources. David Midrexler, who has a science background, brought his children and stayed for the fun. A similar event for middle school students is 5:30 p.m. Tuesday, Feb. 6, at Building Healthy Families.
