EXPRESS COMPANY MAKING READY FOR NEW PACKING RULES

Steps were taken today by Agent Samuel Roome in charge of the city express office, to prepare for the new express packing requirements, which go into effect on December 19. He has been advising express shippers to study the new rules, which have been approved by the United States Railroad Administration, so that they may be able to adjust their packing methods to the forthcoming new standards.

The new regulations, which are embodied in what is known technically as supplement No. 5 to express classification No. 26, all shipments sent by express weighing over 25 lbs. must be packed in wooden containers, or cartons of fibre-board, pulpboard, or corrugated strawboard material, of specified "test strengths." This means, according to Agent Roome, that after December 19, packages over the 25 pound limit will not be accepted for forwarding by the American Railway Express company, handling the express business for the entire country as Agent of the Railroad Administration if only paper wrapped. Nor will ordinary paper boxes, wrapped or unwrapped, be accepted as suitable protection for these heavier shipments. The regulations, however, do not affect shipments under 25 pounds.

Regular shippers, Agent Roome stated today, will not be mystified by the new regulations, as they follow very closely the packing requirements long in vogue in the freight service. The express regulations however, allow a little more latitude in the size of the carton used. The enforcement of the new rules was postponed until December 19, so that shippers would have plenty of time to prepare themselves for this change in express packing standards. He expressed the opinion that these new rules will not work any hardship on shippers, but should operate distinctly in their interest, as the rules will provide additional safeguards for merchandise in transit. Moreover, they will establish a uniformity of express packing rules which heretofore has been lacking. The new order does not affect the movement of food products by express, which ordinarily shipped in crates or barrels.

"We believe," stated Agent Roome, in explanation of the new regulations, "that the shipping public will welcome the new standards when they understand them, and the reasons for putting them into effect."

Never before in the history of the country has the express rate been fixed such proportions as it has assumed today. At the same time, there has been comparatively little increase in the amount of car space available for this business. We have been asked to carry heavier shipments and commodities of every conceivable kind.

result, individual shipments have had to be strongly enough packed to be able to stand up for themselves, and owing to the lack of uniformity in this regard the new regulations were formulated and finally approved by the Railroad Administration. The stronger containers required, we believe, will very perceptibly help to improve the express service and to protect the miscellaneous articles of merchandise traveling through this channel from damage or interference enroute.

An extensive educational campaign is planned to explain to express shippers how the new requirements will operate in the various trades which depend upon the express service for the movement of the bulk of their output and also to instruct express employees regarding acceptance of matter for shipment under the new standards. Agent Roome is able to supply shippers with copies of the Supplement No. 5 to Express Classification No. 26, in which the new rules are outlined in detail.

FAIR AND WARMER TO BE SHOWN AT LIBERTY

Coming Sunday to the Liberty theatre is May Allison in one of her new Screen Classics, Inc. Specials, "Fair and Warmer," the Melynn & Co. success, by Avery Hopwood. The picture is an adaptation of one of the most successful farces ever presented on the American stage. Its run in New York for two years, and elsewhere for fully as long, and its extended vogue in London pronounce it that.

The advent of Miss Allison, easily one of the most captivating of modern picture comedienne, in a new picture is event enough; but in so celebrated a piece as "Fair and Warmer" those who follow the screen here will be given an exceptional treat.

The story concerns the tribulations of two young married couples. In one case the young wife complains that her husband, Billy, is so perfect that he is dull; and in the other case the young husband, though he adores his wife, employs just the tactics Billy should take advantage of—he goes out of his way to keep his wife guessing. And when circumstances cast together Billy, and the apparently neglected Blanny, the results is one of the most absurdly funny series of situations ever contrived, even by Mr. Hopwood, who is admittedly the premier farce writer today in America.
