

N.Y. REPUBLICANS PUT RATIFICATION PLANK IN PLATFORM

(Continued from page one)

court of justice to bear and decided in accordance with the principles of law and equity, disputes that are justiciable in character arising between nations, and for an international conference, meeting at stated intervals, to declare and to revise the rules on international law and conduct; and to urge upon the civilized nations as a long step forward in promoting permanent peace, their assent to such a code of law defining the rights and duties of nations, such as was adopted by the American Institute of International Law at Havana, republic of Cuba, on January 23, 1917, known as the recommendations of Havana.

"The chief enemy of democracy based upon universal suffrage and majority rule no longer is the arbitrary government or of a hereditary aristocracy but the cruel and relentless domination of a class bent not upon protecting liberty and equality of opportunity but upon exploiting all who are not of their own kind and group. We support and urge the most vigorous measures to prevent by education the spread in this country of the doctrines of this dangerous and undemocratic movement.

"We earnestly urge upon the legislatures of those states that have not yet acted on the spending amendment to the constitution of the United States that it be promptly ratified in order that women generally may participate in the elections to be held in November next for president, vice-president, the senate and the house of representatives.

"The wage worker is entitled, as a human being, to a proper wage, reasonable hours and healthful conditions of labor and a voice in determination of circumstances in which his personal co-operation shall be given. The strike is a weapon of industrial necessity and should be made increasingly necessary and infrequent by the better organization of industry and by the neutralization of a combination or combinations on industrial relations.

"Increased production, stimulation of enterprise, checking of private extravagance and waste, and the reduction of public expenditures are a national necessity. Our system of taxation and of business regulation should be immediately revised, with the definite purpose to promote rather than to prevent enterprise and production.

"We urge the prompt passage of legislation to authorize a national budget."

POLES NEARLY FINISH PACT

Warsaw, Wednesday, Feb. 18.—Poland's peace program to be submitted to the Russian soviet government is nearing completion and will be communicated to France and England for approval before being dispatched to Moscow. Premier Millerand of France and Lloyd-George of Great Britain have already been consulted on several of the chief points.

RECOVERED COIN AFTER FIFTY YEARS

Fifty years ago when the foundations were being laid for the Washington statue in front of Independence Hall in Philadelphia, John Nash, then a policeman, threw a two-cent piece into the hole being dug for the foundations. Recently when some changes were being made to the statue, Nash recalled the incident and stirred up the dirt and uncovered the coin. It will be hung in Independence Hall. Incidentally, Mr. Nash recalled that two cents had a buying capacity at that time treble that of today.

STUNT TO CURE HICCUGHS

A Spanish physician claims to have been very successful in curing stubborn cases of hiccoughs by this treatment: The patient lies down and draws up his knees until his thighs are pressed tightly to his abdomen; the lower part of the legs being pressed against the thighs by bending the knees. The position is held for several minutes. The effect of this is to press the abdominal organs up against the diaphragm until the diaphragm ceases its spasmodic contraction.

LADY LIMERICK

It was recently announced that Lady Limerick is willing to offer herself as a candidate for Parliament, and she has now confirmed that statement. It is not her intention to come forward as a nominee of a political party, but to stand as an independent candidate.

STATE IS ADVANCED IN COMMERCIAL WAY AT ASTORIA SESSION

(Continued from page one)

political questions in the state.

Publicity Tax Favored.

Approval of a tax levy in the state and communities to advance publicity work was expressed in resolutions passed during the convention, Mr. Denton said. This would automatically end campaigns often conducted by civic organization—such as the Commercial club publicity fund campaign in Salem now—for funds to promote general publicity for the state that should be provided by the people generally, he explained.

Astoria is wonderfully developed, Mr. Denton said. He declared that "Salem will have to look well to its laurels and move in a co-operative spirit if it is to hold its place with Astoria." Astorians have recognized the resources of the city, he said, and have worked them out.

H. C. I. Discussed.

The high cost of living came in for discussion also at the convention, Mr. Denton said. It was generally felt among the delegates that a gradual readjustment of commercial affairs throughout the country will ensue, bringing conditions back to normal. No immediate relief from high prices could be seen by the retail men.

Home products week was conducted in Astoria at the same time as the convention, Mr. Denton said, and he declared that Salem was "by far outstanding."

The capital city came in for representation at the huge banquet Tuesday evening, however, Mr. Denton when bottles of Salem's famous Apple lined the lengthy festive board.

DECLINE OF THE PARLOR

One of the large manufacturing companies of the United States is engaged in the construction of a great number of homes for its employees, and while there are many novel features in the way of making conveniences, the most striking thing about the homes is the total absence of the usual parlor. The space is thrown into the other rooms. It looks as if the parlor was out of fashion.

COAL IN THE PHILIPPINES

A vein of coal has been discovered in the Philippines which is said to be up to the quality of the Chinese fields. The amount has not been ascertained, but it is certain that it will answer the demands of the islands for many years.

INFECTION'S RATE OF TRAVEL

The rate of spread of infectious diseases is determined not only by the nature of the transportation facilities of the region or the era, but towns and villages, mainland and island, are invaded early or late or preserved entirely from attack according as they lie within or without the avenues of approach or are protected by inaccessibility, as in instances of remote mountain settlements and of islands distant from the ocean lanes or frozen in during winter periods.

SOCIALISTS DO NOT TRY TO DICTATE TO UNIONS, IS CLAIM

(Continued from page one)

Albany, N. Y., Feb. 20.—The socialist party never attempts to "dictate" to labor unions when strikes are to be called, but labor unions "striking for betterment of working conditions" may always rely on the assistance of the party, Otto Braunetter, national secretary, testified today at the trial of the five suspended socialist assemblymen. The prosecution has charged the party approves the general strike as a weapon for promoting its class struggle.

Horris Hillquit, socialist leader, yesterday predicted that control of the United States government would pass peacefully into the hands of the socialist party, when it enrolls the working class. He issued a warning, however, that "it is not impossible the people of this country will be compelled to supplement their political action with a little shooting." If the profiteering class revolts after the majority of the people are ready to introduce "substantial reforms" by "legal constitutional methods."

Testifying before the assembly judiciary committee, Mr. Hillquit denied that the socialist party intended to promote its program by other than "legislative action, parliamentary action, and in a peaceful way."

But while he asserted the party was not plotting bloody revolution to achieve its aims, he declared history has shown that "when the privileged minority is about to lose its privileges, it becomes desperate and tries to destroy reform or lawful revolutionary movement by force."

"In that case it will be up to the majority of the people to defend their rights against such lawlessness, powerful privileged minorities and in a case of that kind it may come to snoot-ling."

KEEPS TABS OF STARS

The utility of the Blink microscope as a means of detecting the proper motion of the stars is absolute. In comparing photographic plates taken by this means at an interval of 25 years the smallest proper motion that can be detected is 1/4 second per century, or five seconds per century. According to Innes there are about three such stars over each square degree on an average, or 129,000 in the entire sky. It is estimated that the number of stars with sensible proper motion will increase with the square of the time interval considered. Accordingly, when plates taken at a century's interval are available, it should be possible to detect the proper motions of some two million separate stars.

PAPER FOR FINLAND'S FORESTS

The shortage of paper in this country is being relieved by shipments from Finland, the very first consignment consisting of more than 20,000 bales. This material was loaded at Kota by women stowaways.

ALCOHOL AS A MOTOR FUEL

Alcohol alone is not suitable for use in existing types of high-speed internal combustion engines, such as are used in motor cars, but mixed with an equal part of benzol it forms an excellent fuel for this purpose.

THIEVES JACK UP CAR AND TAKE OFF TIRES

Police here Friday were endeavoring to locate the thieves who some time Thursday night jacked up an auto belonging to Henry W. Thiel, Salem Heights, as it stood parked in front of his home, and removed the tires from the front wheels. A wicker case containing tools valued at about \$20 was also removed from the machine.

This is the second case where thieves have bothered to jack up an auto and remove the tires that has been reported to police this year. The other one was when thieves broke into the garage owned by County Clerk U. G. Boyer, rashed his auto, and took off the tires.

Fighting Between Japs and Reds In Siberia Reported

London, Feb. 20.—Fighting has been in progress on the Amur river in Siberia between insurgent forces and Japanese. A Moscow wireless message states: "White" troops reinforced the Japanese and a fierce struggle is raging with the insurgents supported by Chinese, the dispatch declares.

In regard to the situations in south Russia a bolshevik communique today says: "Enemy ships have bombarded Genichesk (on the sea of Azov). Stubborn fight is occurring 25 versts northeast of Staxropol (on the left bank of the Volga)."

Take Your Choice of Poisons

Thirty-two new poisons were discovered during the great war in munitions experiments in the United States alone.

Yellow Mustard For Rheumatism

A good hot mustard plaster or poultice is pretty sure to overcome most rheumatic pains and even sciatica and gout but it's a messy affair and generally blisters.

Heat is absolutely necessary if you want permanent relief. Begy's Mustardine, made of true yellow mustard with other pain relieving ingredients added is just as hot, is cheaper, cleaner and more effective than the old-fashioned plaster or plaster and camphor blister.

Besides rheumatic pains and swellings Begy's Mustardine is speedily effective for lumbago, backache, neuritis, pleurisy, bronchitis, sore throat, chest colds and all aches and pains because heat eases pain—30 and 60 cents at druggists or by mail, S. C. Wells & Co., LeRoy, N. Y.

Commissioners to Hear Testimony on War Crimes

London, Feb. 20.—Persons living in Great Britain, France and Belgium who are witnesses against Germans accused of war crimes will not have to go to Germany to testify, it is declared in a Berlin dispatch to the Exchange Telegraph company today. Such witnesses, it is stated, will be examined by commissioners sent to the countries named.

How Soldier Dispersed Attacks

"For two years my stomach trouble was very bad, my doctor had to inject morphine on several occasions when I was stricken with these attacks. Since taking 4 bottles of Mayr's Wonderful Remedy I have been entirely well and am serving in the artillery, having been pronounced in perfect health by government physicians." It is a simple, harmless preparation that removes the catarrhal mucus from the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis. One dose will convince or money refunded.

SPRING FABRICS

It is fortunate indeed that our purchase of spring wash goods were made many months ago. Otherwise we should not now be in a position to offer much extensive assortments on display. The wash goods shown in our first display are quite as dainty, pretty and serviceable as any we have shown. And the prices are most attractive.
