Philodorian Society Installs New Officers

Last Wednesday evening the small reception room of the Marion hotel was the scene of the installation of the new Philodorian officers. After the usual ceremony was observed the new and old officers all gave short talks. Mr. Sherwood, the new secretary, told of the founding of the Philodorian literary society. In 1883 there were four societies in the university. They quarreled with the board of directors over some matter, and part went to new quarters down town, while some remained at the university. Those who remained organized the Philodorian and Philodorian literary societies.

After the installation service the Willamette glee club was introduced and entertained in their inimitable manner. Coch Schell of the Salem high school says that his crew is in good shape and in a hurry to get after having lost the Albany game and for this reason Willamette will have two big interests at stake at the due game tonight.

Spokane Lumber Firm Makes Large Price Reduction

Spokane, Wa., Feb. 24.—As a means of looking toward stabilization of the lumber market, price reductions which it was declared would amount to 10 to 20 percent under present prices, were announced here today, by L. S. Chase, manager of the Weyerhaeuser Sales company, distributing agency for eleven lumber mills controlled by the Weyerhaeuser interests.

The reduced prices, it was declared, would remain effective at least until June 1.

An announcement of the reduction of prices to the January level, effective immediately, declared that the demand for lumber exceeds the supply, car shortage and other transportation difficulties have restricted deliveries, price advances have been frequent and irregular, and buyers have bidden against each other until the demoralized condition of the lumber market threatens to discourage all construction.

Lumber prices now are \$5 to \$25 per thousand above the January prices and further advances are in prospect. It is declared. The output of the company's mills, which will be run on full capacity, will be turned to the retailer and the industrial consumer, with the elimination of the speculator to the fullest extent possible, it is stated.
