This is the car that keeps them all guessing as to its wonderful power. The man that knows what a car is expected to do, after riding in this Baby Grand, always says "Where does it get its power?" "What is the gear ratio?" "What do you put in the gas?" and a lot of questions like that.

The facts are that this car is such a wonderful performer on high gear, has such phenomenal power, when throttled down to a snale's pace, that it keeps one guessing.

The price is right, the performance is right, the service is right.

The gear ratio is 3 61-100 to one on high gear-much higher than other cars, but the long stroke motor gives it flexibility that it astonishing.

No car, regardless of the number of cylinders, will out perform it at a speed less than 15 miles per hour, and this is the test of power.

This car is pleasing to the eye-has genuine leather upholstering-Hot Spot intake manifold in fact all the high grade features found in high priced cars.
