

PLAN DIVERSION WALDO LAKE FOR TUMALO PROJECT

The storage of 150,000 acres feet of water in Waldo lake on the middle fork of the Willamette river, involving the construction of a diversion tunnel under the divide to the head waters of the Deschutes river is contemplated in an application filed with State Engineer Cupper today by the Tumalo Irrigation district. According to the plans of the Tumalo district the water would be stored in Waldo lake and diverted to the lands in the project through the proposed tunnel. An investigation to determine the feasibility of this plan is already under way by the state engineer's office.

The appropriation of 20 acre feet of water from the head waters of the Willamette river is sought by the Enterprise Electric company for power purposes, according to another application filed today.

Other applications for water rights filed today follow:
By A. Bragg of Mt. Vernon covering the appropriation of water from Cummings creek for the irrigation of 49 acres in Grant county.

By Michael Dougherty of Pilot Rock covering the appropriation of water from the north fork of Butter creek for the irrigation of 70 acres in Umatilla county.

By Frank H. Howley of Vale, covering the appropriation of water Owyhee river for the irrigation of 65 acres in Malheur county.

By W. B. Bayles and C. V. Bayles of Dayville, covering the appropriation of water from John Day river for irrigation purposes.

By K. K. Brainard of Golden, covering the appropriation of water from Post Gulch and two springs for irrigation purposes.

By J. F. Hamilton of The Dalles, covering the appropriation of water from two springs in Wasco county for irrigation purposes.

By H. J. Biddle of Ione, covering the appropriation of water from Rhea creek for the irrigation of 12 acres in Morrow county.

By Wm. F. Fisk of Prairie City, covering the appropriation of water from Hosenburg creek for irrigation purposes.

By John Reeves of Innahwa, covering the appropriation of water from Hat creek for the irrigation of 6 acres in Wallowa county.

By Roy Edmund of Enterprise, covering the appropriation of water from Hurricane creek for irrigation purposes.

By George A. Boardman of Galice, covering the appropriation of water from the north fork of Galice creek for mining purposes in Josephine county.

By Dorsey F. Baker of Walla Walla, covering the appropriation of water from the south branch of Mud creek for the irrigation of 20 acres in Umatilla county.

appreciate it very much if the person or persons who borrowed the stage curtains will please return them.

After "Unroyal" Meeting, British Mission Doubts

Kiel, March 15.—The intense feeling still existing in Germany against England was manifested toward some British officers who accompanied the Inter-Allied Commission of Control on a recent visit here. The town was crowded with German sailors who were clean and smartly dressed. They passed by with averted faces, but civilians on the contrary showed the keenest interest and stared at the visitors, occasionally remarking "Gott strafe England." The British visitors took no notice and walked on followed by a train of small boys many of whom repeated in a childish treble "Gott Strafe England" at intervals.

The shopkeepers, however, were quite friendly and trade became very brisk.

Further evidence of the present attitude of the Germans was forthcoming at the Kiel Canal, where the children gathered on the banks invariably shouted out the old cry of "Gott Strafe England."

One man cried "We will have you yet" while the final effort at the close of the return journey was that of the optimist who proclaimed: "We shall have another war in five years time."

State House

An increase of 50 cents per month in the minimum flat rate for electrical service is sought by the Florence Electric company of Florence, Lane county, in an application filed with the public service commission Saturday.

With the exception of five miles of heavy haul the Pacific from Saven at Medford is in splendid condition for travel at this time according to Herbert Num, state highway engineer, who returned Saturday after a tour over that section of the state.

John W. Cunningham was a capitol visitor Saturday, in consultation with State Engineer Percy A. Cupper relative to the development of the lower unit of the Jordan Valley irrigation district, which it is hoped to have under water sometime in time for this year's crops.

Arguments in the case of George L. Green field vs. the Portland Central Labor Council and G. Heltkemper against the Portland Central Labor Council have been advanced for hearing on the supreme court calendar to March 22. Both cases involve the right of labor unions to maintain pickets before establishments whose employees have gone out on strike. The cases are before the supreme court on appeal of the plaintiffs, Greenfield and Heltkemper, the labor council winning in the lower court.

Salvation Army Commander Plans New State Work

One of the phases of the Salvation Army work which is to be enlarged upon in Oregon is the woman's phase. Coming to Portland from Chicago, Mrs. Commissioner Estill, wife of Commissioner Thomas Estill, who commands in the western territory, and herself

Mrs. Commissioner Estill, ranking officer in charge of the Salvation Army work among women in the territory, will be one of the big speakers at the convention of Oregon county advisory boards to be held in Portland March 17.

She will tell the advisory board members what are the Salvation Army plans for the home service program of 1920 of enlarging the scope of service to women.

Coming from a good English family, Mrs. Commissioner Estill 35 years ago began her Salvation Army work in the London slums, when in her girlhood. She has held high positions in Australia and was for 12 years in Japan, where she had charge of Salvation Army work with her husband, working with him in the administration of that territory as she is now in the administration of the western territory of the United States.

Mrs. Commissioner Estill is known as a splendid organizer and a keen observer. Much of value to the state of Oregon will result from her visit at this time, when the convention of upwards of 150 prominent business men of the state, members of the county boards, are gathered to consider the broad program of Salvation Army service in Oregon's rural district.

While here Mrs. Commissioner Estill will investigate facilities for conducting the Oregon program and make what alterations are necessary to expand it to include the service to be given the state at large.

JOHNSON IS SINGLE CANDIDATE ENTERED IN DAKOTA PRIMARY

Bismarck, N. D., Mar. 15.—North Dakota faces the unique situation of a presidential preference primary on March 16 with but one candidate, Senator Hiram W. Johnson, entered. Intra-party delegation contests, pivoting about the non-partisan league, constitute the chief barbed wire entanglements on the voter battlefield.

Major General Leonard Wood and Governor Frank O. Lowden of Illinois, refrained from filing negotiations over a section republican state convention had voted that delegates to the national convention should go uninducted. William Jennings Bryan withdrew his name as democratic candidate.

The primary is to elect for each party a national committeeman, five presidential electors and ten national convention delegates.

Political observers declare both republicans and democrats have been divided on the issue of the non-partisan league.

There is considerable speculation as to whether republican delegates will be bound to vote for Senator Johnson at the Chicago convention. Under the state law the delegate takes an oath that he will faithfully carry out the wishes of his party as expressed by the primary.

For the first time in this state, women will vote for presidential electors but cannot vote for delegates to national conventions, although the state may be represented in those conventions by women delegates, one of whom has been nominated by each party.

Political Pot.

St. Paul, Minn., Mar. 15.—Minnesota's special primary at which republican voters will express their choice for president, will be held tonight between 7:30 and 8:30 o'clock, except in some counties where county chairmen have designed the time from 7 p. m. to 9 p. m.

Five candidates are on the ballots—Leonard Wood, Hiram W. Johnson, Frank O. Lowden, Miles Poindexter and Warren G. Harding. In Hennepin county (Minneapolis) Herbert Hoover's name also appears.

SAND BATHS FOR THE IMMACULATE JERBOA

The jerboa, a strange little animal that lives in Africa, looks like a tiny kangaroo and belongs to the same family as the rat, is called the cleanest animal there is. The jerboa digs a trench in the clean sand and rolls over and over in the sand, which is the hygienic method of keeping clean.

PUNISHMENT FOR PROFITEERS

The anti-profiteering campaign in England has resulted in the conviction of 1320 persons, with more in prospect. Many of these were handed prison terms and \$35,000 in fines collected.

A new level for the price of timber lands is the sale of a tract of 143 acres in Clatsop county for \$50,000.

VAN TRUMP ADVISES SPRAYING OF LOGANS TO INSURE BIG CROP

The commercial value of the loganberry crop is so great today that no grower can afford to be content with less than a 100 per cent yield, according to S. H. Van Trump, fruit inspector for Marion county.

Pointing to the fact that the average loganberry yield in the Salem section varies, in different yards all the way from one and one-half to five and one-half tons per acre, Mr. Van Trump makes a special observation bearing upon the indications that conditions are not what they should be in many yards.

Disease in All Yards.

Anthracnose is present in varying degrees of severity in every loganberry yard in this section and is an unsuspected but very serious source of loss to many growers. Careful observation indicates that this loss is not less than 5 per cent in the least infected yards, while it often amounts to 20 or 30 per cent, loss in the worst infected yards.

In the midst of the ripening season many of the fruiting lateral canes are observed, first to wilt, and finally to dry up with their half developed berries. This condition is commonly attributed to drought, but in most cases it is due to the ravages of anthracnose. Close observation will discover the characteristic bluish-black spots at the base of these dead laterals.

Anthracnose is due to the growth of a specific fungus, *Gloeosporium venetum*. This fungus growing in the tissue of the cane produces the characteristic dead spots in the cambium and bark. The fungus is reproduced each summer by the development of myriads of small spores which are scattered broadcast in the wind.

Sanitation Necessary.

Experience has shown that sanitation in the yards is of first importance.

The two secrets of real tea enjoyment are:

- 1. Buy good tea.
- 2. Don't boil it, nor let it steep too long—not over 6 minutes.

A third secret: Schilling Tea.

There are four flavors of Schilling Tea—Japan, Ceylon-India, Oolong, English Breakfast. All one quality. In parchment-lined moisture-proof packages. At grocers everywhere. A Schilling & Co. San Francisco

tance in the control of this disease. All fruited canes should be removed as soon as possible after the picking season is closed. These old canes and all trash along the rows should be burned and the ash applied to the soil.

A spray of Bordeaux, 4-4-50, should be given the vines in the spring before the leaves appear. This spray should be applied thoroughly, to cover every portion of the canes and the crown of the plant. A second application of the same spray should be given after the leaves appear and the new canes have made a growth of 4 to 8 inches.

After the fruit is set the yard should be given a final spray of the Burgundy mixture. This spray is made of: Sal-soda, 3 pounds, Copper sulphate, 2 pounds and water 21 gallons.

Wallace G. Thrill, district attorney of Wheeler county, has filed his candidacy for reelection.

STOP ITCHING ECZEMA

Penetrating, Antiseptic Zemo Will Help You

Never mind how often you have tried and failed, you can stop burning, itching eczema quickly by applying Zemo. Furnished by any druggist for 35c. Extra large bottle, \$1.00. Healing begins the moment Zemo is applied. In a short time usually every trace of eczema, tetter, pimples, rash, blackheads and similar skin diseases will be removed.

For clearing the skin and making it vigorously healthy, always use Zemo, the penetrating, antiseptic liquid. It is not greasy, salve and does not stain. When others fail it is the one dependable treatment for skin troubles of all kinds.
