NO OIL IN OREGON.

The Oregon Bureau of Mines and Geology has issued a report on the investigation of oil and gas possibilities of western Oregon by remembered that I had mentioned which is calculated to put a damper upon the hope of striking oil a letter that Karl Shepard told me to in any portion of the state west of the Cascades.

The report is by the firm of Harrison and Eaton, consulting fewel case geologists of Denver and Fort Worth, scientists of much experience and eminently successful as oil geologists in the commer- sneered, "do you?" cial industry, and is probably as reliable as it is possible to secure. Because the geologists employed by the great oil compan- of my greatest treasures for it tells. ies have reported similarly, after exhaustive investigation, none me of a fact of which I had almost months, 12.25 for six months. 14 per of them have made any attempt to bore for oil in Oregon, because indications that it exists are entirely lacking.

While, of course, it is impossible to know what lies under the earth's surface, the geological formation, particularly when

While, of course, it is impossible to know what lies under finds himself having undue interest the earth's surface, the geological formation, particularly when in a woman that can not return it, he it is exposed, as it is in western Oregon, reveals the story of its bye.

So M

But the such depths as to be impractical.

The geological formation of Oregon runs from the pre-Cretac-letter. eous and Cretaceous formations of southern Oregon to the Pleistocene and recent formations of the northern coast. The former Large Female Vote is found so metamorphosed, too badly shattered to be of any value as a producer of oil, badly folded and faulted. The latter formations contain nothing to produce commercial quantities of petroleum products, with perhaps the exception of shales near Newport of the Oligocene period-and these are not very promising.

Petroleum, commercially produced, had its origin in organic matter from animal or plant, or a combination of animal and plant remains. This organic material has been deposited in and ures will show for the period March to with dense fine grained material, such as silt or lime, under mar- Registrations made up to the present ine or saline water conditions, and produced shale and limestone, time indicate that the male voters When the material was coarse and sandstones and conglomerates will have to show more interest in Although 12 constables formed, the porous nature of the material allowed the decomposed the matter than at present as women are frequent registrants at the desk in and ten justices of the neacs must be organic remains to be removed or carried away, while the fine- the court house office. On one day May 21, no candidate has thus far filed grained shales and dense material, sealed in place the particles of last week more women than men inor otherwise signified an intention to organic material, which when subjected to geologic action, changed sured the suffrage privilege into petroleum products.

Stresses and strains in the earth's crust, transformed the or- male 6888, total Marion county 14,wheat crop is estimated at 310,000 ganic remains into hydrocarbons of petroleum. Some oil bearing bushels less than last year by F. Is shales show no trace of oil until subjected to bigh straining more prohibition lean and hungry look he had when Aunt Polly Woodchuck had said. Famous Actress Tells How She Uses Derwillo To **Beautify Her Complexion**

MISS LOUISE HUFF

New York—Miss Louise Huff, the clever young actress, is famous for her beautiful complexion. When her friends inquired about it she said. "It's all due to a toffst preparation called Derwille which I have used twice daily. The experience I have had prompts me to make my secret public. This wonderful Derwille in stantly beastified my sith and his continued use has made the results permanent. When Mae Edna Whier, the well known beauty specialist, was interviewed in reference to Missi Huff's remarkable complexion, stated: "Anyone can have a beautiful comparation when they know how. It's a rery simple process, I use the same article in my work, and until you try if you have no idea of the marvelous results. The very first application will astonleb you. Go to the toilet counter of any drug store or department store and get a bottle of Derwillo, then make the following test: Examine your skin critically before your mirror, note carefully its appearance, then apply Derwillo as directed. After you have made the first application look in your mirror again and note the surprising change. A peach-like color

mounts the checks; a baby softness comes to the skin; it makes the skin rosp-white, velvety and radisentibeautiful. It is wonderful for a darisallow skin, almy nose, freekletan, effy skin, sun spots, coarse porce
pimples, blackheada, chapped roug,
skin, ruddiness, wrinkles and man
other facial blemishes. Derwillo a
hair, It is superior to face powder
as perspiration does not affect it
therefore it stays on better. Hum
